Technical comments:

\* Page v, Foreword:

Check the change against ISO's stated intention to improve the involvement of industrially less advanced countries in standardization. Experts from these countries may not have the means to access machine readable information. In this case, it might be necessary for ISO Central Secretariat to offer a version with all parts printed out. Follow any advice from ISO Central Secretariat on this issue.

\* Linear B and Aegean Numbers:

Germany may comment on these scripts and characters in a later stage of the ballot process.

\* Osmaniya:

Sources such as <http://www.proel.org/alfabetos/somali.html> and <http://www.omniglot.com/writing/somali.htm> give significantly different versions of the Osmaniya alphabet (primarily concerning glyph and order of presentation). Germany does not have the expertise to evaluate the different presentations on the Osmaniya alphabet and therefore simply requests that the editor check the correctness of the listed characters against the cited sources.
