2 Introduction

This is a proposal to add characters, numerals as in Tulu Unicode proposals ¹**Unicode additions for Modern Tulu Lipi** (2024) by KTSA, and previous proposals by KTSA ([L2/21-019](#), [L2/22-034](#)), and which are not proposed in [L2/22-031](#) or the recently accepted Unicode Tulu-Tigalari character sets. ¹KTSA has details on the evolution of modern Tulu characters and efforts by various scholars along with Karnataka Tulu Sahitya Academy to address the current needs of Tulu digital literacy and its standardization. “A language is a foundation of civilization”- Panini. Scripts are fundamental in expressing a language. We are at the cusp of losing Tulu scripts due to its non-use, as well at a stage to resuscitate by connecting our dear mother tongue Tulu to technology such as fonts, keyboards for a digital realm of possibilities for a new avatar to cherish for the next millennium rather than just being a spoken language. Tulu-Tigalari scripts have been a lifeline for all our ancient manuscripts for the longest time since Brahmi and

used by many languages and Tulu needs it even more now given that is a live language spoken by millions and use Kannada script for Tulu.

This proposal briefly goes over the character/alphabet sets, numerals that are very essential for its usefulness in daily use of Tulu and given that they are missing from recent acceptance of Tulu-Tigalari script. Kindly note, ¹KTSA has difference tables between Tulu and Tigalari also documented with glyphs, fonts and handwritten words and challenges in code point for ligatures and consonant additions.

೨ (2)	113F2	TULU NUMERAL 2
೩ (3)	113F3	TULU NUMERAL 3
೪ (4)	113F4	TULU NUMERAL 4
೫ (5)	113F5	TULU NUMERAL 5
೬ (6)	113F6	TULU NUMERAL 6
೭ (7)	113F7	TULU NUMERAL 7
೮ (8)	113F8	TULU NUMERAL 8

೩ (9)		113F9	TULU NUMERAL 9
೪ ಏ or ಁ		113CB	TULU VOWEL Back part of mouth sound ARCHAIC
೫ (10 or X)		113FA	TULU NUMERAL 10
೬ (100)		113FB	TULU NUMERAL 100

See Table on Page 31 for side-by-side comparison of Modern Tulu requested above and recently approved codepoints for Tulu-Tigalari character sets as well with most Modern Tulu alphabets/numerals in Page 47 . It appears recently approved Tulu-Tigalari set uses EE (U1138B), and OO (U11390) codepoints compared to the E,O used by current Devanagari script (U90F,U0913) for Sanskrit and apriori Tulu-Tigalari was used for most Sanskrit manuscripts.

Figure 10 and others show continued use of vowel combinations for E, ಎ. Please note the tiny hook in the ligature for EE at the bottom, ಲಿಗೇಚರ್ that distinguishes from the ligature for E. Several words are also illustrated in ¹KTSA.

3.3 Vowel ಓ O, ಒ in Kannada (ಓ ಓ, ಒ ಒ in Kannada script)

The common way of representing O is ಓ. Various words rendered in different fonts can be found in ¹KTSA proposal. Several words demonstrate the glyph rendering, code points with various fonts. This is another Vowel needed and requested by KTSA for modern Tulu use and scholars collectively endorsed the shape of OO for Unicode and textbooks.

Kindly note that only one E, O has been allotted in recent unicode character set for Tulu-Tigalari and can lead to significant confusion in modern use. Tables below show more words, differences in code oints, rendering etc. Let us look at various combinations of other characters where there can be code point mismatches between KTSA proposed modern Tulu and Tigalari alphabet sets.

3.10 Numeral 0 (0)

Numerals are historically found in astrology and Tantra charts in Tulu manuscripts. 0 is typically not used in old Tulu, however modern Tulu uses and needs zero 0 and glyphs are similar to Kannada 0.

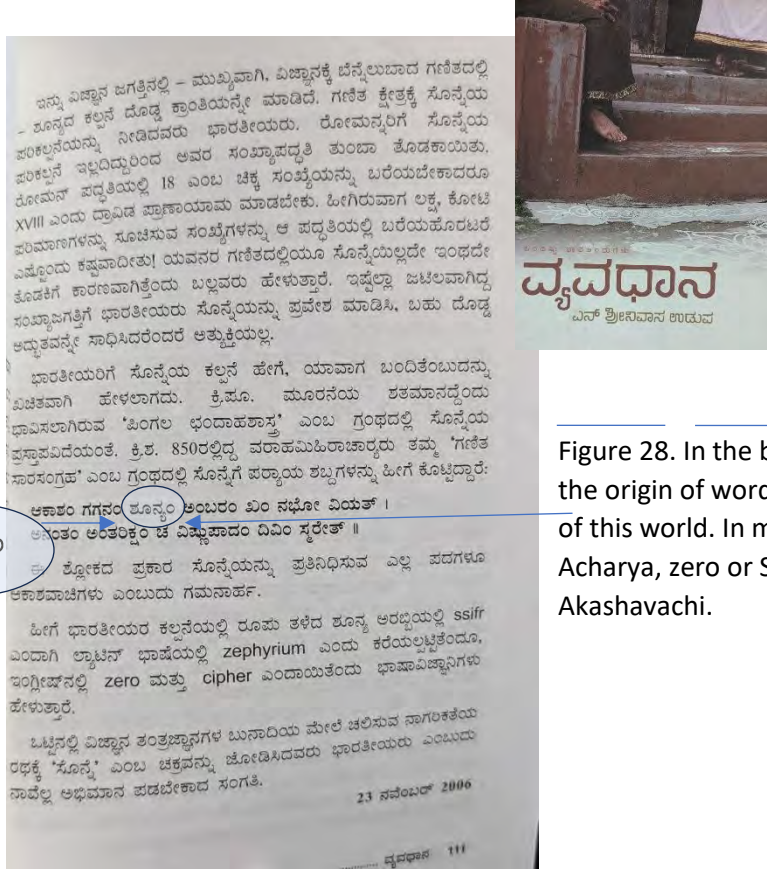

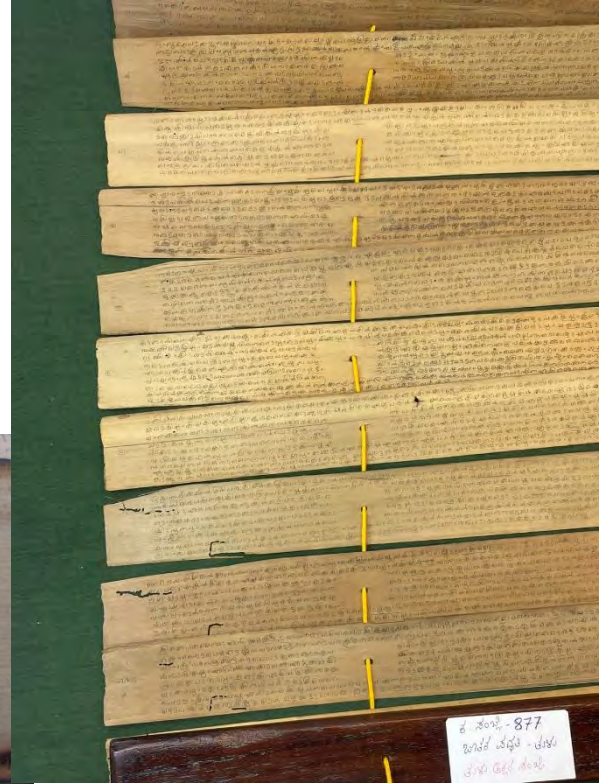

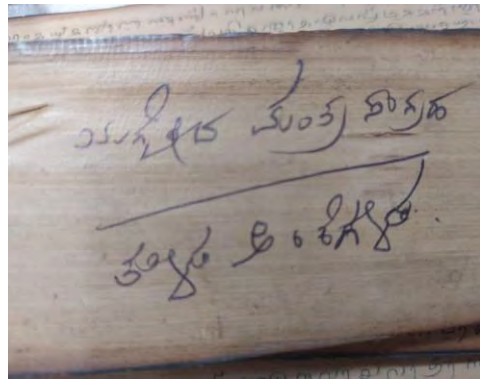

Figure 28. In the book Vyavadhan by N. Srinivasa Udupa the origin of word Zero comes from Latin Zephyrium, out of this world. In mathematical treatise by Varahimi Acharya, zero or Shunya in sloka is referred to unearthy or Akashavachi.

Similarly requested set of numerals in modern Tulu are below. In addition, we do not see allocation of numerals in the recently accepted Tulu-Tigalari set. The proof of below manuscripts on numeral usage is clear and scholars had approved it for modern Tulu at KTSA meetings and w (10) is also requested in addition to below. Tulu calendars are is use for a long time and numerals are consistent as requested glyph sets and details of various calendars from 2014 or so are in ¹KTSA.

3.11 1 Tulu Numeral (1) (numeral glyph rendered using TuluSiri font)

Tulu numerals are used consistently over the years in alphabet books by Rastreeya Saksharata Samithi (National literacy mission 2009) and Namma Tulunada Trust (2012).

Calendars have been consistently using Tulu numerals, Tulu Kala Konde by Rastriya Saksharata Samiti since 2014 and also by Namma Tulunada Trust and is a necessity. Its existence is seen in several manuscripts and consistently used over the years and warrants Unicode allocation.

¹KTSA proposal requested for a separate character position (U11B54 Pavanaja) an independent half vowel, rather than adding a VIRAMA on U, ು. Since the consonant joiner is separated in Tulu-Tigalari, it is unclear if the behavior is the same as U11384 (Tigalari U) + U113CE (Virama) = ು̣. It is unclear if the allotted Tulu-Tigalari behaves as below, (vowel modified) or will it add as a iscii consonant conjoiner if any letter added next to it ?

Key Details for the New U Virama or Half U

1. **Position:** It will have the same **above position** as **U+113CE**, since it is placed over the base glyph U, ು.
2. **Functionality:** The new mark will likely indicate a half vowel or suppress the inherent vowel for specific use cases in Tulu-Tigalari.
3. **Combining Class:** For consistency with viramas across Indic scripts, this new mark will retain the **canonical combining class of 9**.
4. **General Category:** **Mn (Non-Spacing Mark)** remains applicable because it modifies the base glyph without occupying independent space.

Syllabic categories

Not applicable

Positional categories

Indic_Positional_Category=Top

113CB; Above # Mn TULU HALF U

Positioning and Usage: (if Tulu-Tigalari is modified)

- **Position:** This mark will appear **above the base character 2**, just like U+113CB page 47, table R.
- **Interaction with U+11384:** When combined with **U+11384 (TULU-TIGALARI LETTER)**, the rendering will place the virama directly above the base glyph, indicating a suppressed inherent vowel or a half vowel.

Example:

If the base glyph is **U+11384**, and this new virama is **U+113DE**, the sequence would look like this:

1. **Base Character:** U+11384 (TULU-TIGALARI LETTER **2**).
2. **Modified Character:** U+11384 U+113CE (LETTER + VIRAMA).

Rendered Output: The glyph for U+11384 with a virama placed above is as **2̣** (U113CB in table right page 47)

5 Acknowledgments

We would like to thank our committee of scholars Dr. R Bellur, Dr. Pravinraj S Rao, Dr. Kekkunnayya, Dr. Guru Prasad, for their seminal contributions to Tulu and digital Tulu. We would like to thanks to KTSA president Tharanath Gatty for his continued support to Tulu Unicode. We thank Dr. Deborah and Dr. Kucera for their guidance and support on Tulu Unicode efforts. A. Administrative

1. Title:	Proposal for the Inclusion of Modern Tulu Lipi Characters and Numerals
2. Requester's name:	<i>Dr. Pravinraj S. Rao on behalf of Karnataka Tulu Sahitya Academy (KTSA) and supporting scholars</i>
3. Requester type (Member body/Liaison/Individual contribution):	<i>Individual Contribution under KTSA Tulu Unicode Committee</i>
4. Submission date:	<i>24-12-2024 Tulu Stability file revised on 04-02-2025</i>
5. Requester's reference (if applicable):	<i>KTSA Proposal Modern Tulu Stability (2024)</i>
6. Choose one of the following:	
This is a complete proposal:	<i>This is a complete</i>
(or) More information will be provided later:	

B. Technical – General

1. Choose one of the following:		
a. This proposal is for a new script (set of characters):		
Proposed name of script:	<i>Modern Tulu Lipi</i>	
b. The proposal is for addition of character(s) to an existing block:		
Name of the existing block:		
2. Number of characters in proposal:	<i>87 Number of the Block</i>	
3. Proposed category (select one from below - see section 2.2 of P&P document):		
A-Contemporary <input checked="" type="checkbox"/>	B.1-Specialized (small collection) <input type="checkbox"/>	B.2-Specialized (large collection) <input type="checkbox"/>
C-Major extinct <input type="checkbox"/>	D-Attested extinct <input type="checkbox"/>	E-Minor extinct <input type="checkbox"/>
F-Archaic Hieroglyphic or Ideographic <input type="checkbox"/>	G-Obscure or questionable usage symbols <input type="checkbox"/>	
4. Is a repertoire including character names provided?	<i>Yes</i>	
a. If YES, are the names in accordance with the "character naming guidelines" in Annex L of P&P document?		
b. Are the character shapes attached in a legible form suitable for review?	<i>Yes</i>	
5. Fonts related:		
a. Who will provide the appropriate computerized font to the Project Editor of 10646 for publishing the standard?		
<i>The Tulu digital font was initially developed by Dr. Pravinraj S. Rao in 2009 and was named "Taulava" Later developments incorporated Kannada phonetics, with contributions from Nishkal Rao, who developed the Tulu Siri and Pravin S Rao developed Unicode fonts " Tulu Shri" fonts through Malayalam Kathik keyboard layout</i>		
b. Identify the party granting a license for use of the font by the editors (include address, e-mail, ftp-site, etc.):	<i>Dr. Pravinraj S Rao (KTSA), Email:[ktsa.unicode@gmail.com]</i>	
6. References:		
a. Are references (to other character sets, dictionaries, descriptive texts etc.) provided?	<i>Yes</i>	
b. Are published examples of use (such as samples from newspapers, magazines, or other sources) of proposed characters attached?	<i>Yes, including Tulu calendars (2014-2025), textbooks, and printed media Ex(Jnathipada Sanchya) and Tulu Lexicon</i>	
7. Special encoding issues:		
Does the proposal address other aspects of character data processing (if applicable) such as input, presentation, sorting, searching, indexing, transliteration etc. (if yes please enclose information)?	<i>Yes</i>	
<i>Details in KTSA Proposal Modern Tulu Stability Final (2024)</i>		

¹? Form number: N4502-F (Original 1994-10-14; Revised 1995-01, 1995-04, 1996-04, 1996-08, 1999-03, 2001-05, 2001-09, 2003-11, 2005-01, 2005-09, 2005-10, 2007-03, 2008-05, 2009-11, 2011-03, 2012-01)

C. Technical - Justification

1. Has this proposal for addition of character(s) been submitted before?	Yes
If YES explain	<i>Revised and resubmitted based on the Unicode Committee's feedback (ref: L2/23-021, L2/23-055)</i>
2. Has contact been made to members of the user community (for example: National Body, user groups of the script or characters, other experts, etc.)?	Yes
If YES, with whom?	Scholars, teachers, and community groups, including All American Tulu Association (AATA) and Tulu Academy
If YES, available relevant documents:	
3. Information on the user community for the proposed characters (for example: size, demographics, information technology use, or publishing use) is included?	
Reference:	<i>Modern Tulu Lipi is used in educational, cultural, and digital literacy programs in Tulu Nadu and abroad (e.g., USA)</i>
4. The context of use for the proposed characters (type of use; common or rare)	
Reference:	<i>Frequent use in calendars, textbooks, certificates, public events, and digital content creation</i>
5. Are the proposed characters in current use by the user community?	Yes
If YES, where? Reference:	<i>Refer to Tulu calendars, school materials, and KTSA-endorsed publications since 2008</i>
6. After giving due considerations to the principles in the P&P document must the proposed characters be entirely in the BMP?	Yes
If YES, is a rationale provided?	<i>BMP is preferred for compatibility with modern digital systems</i>
If YES, reference:	
7. Should the proposed characters be kept together in a contiguous range (rather than being scattered)?	Yes
8. Can any of the proposed characters be considered a presentation form of an existing character or character sequence?	No
If YES, is a rationale for its inclusion provided?	
If YES, reference:	
9. Can any of the proposed characters be encoded using a composed character sequence of either existing characters or other proposed characters?	No
If YES, is a rationale for its inclusion provided?	
If YES, reference:	
10. Can any of the proposed character(s) be considered to be similar (in appearance or function) to, or could be confused with, an existing character?	No
If YES, is a rationale for its inclusion provided?	Minor differences are clarified in the proposal with visual example
If YES, reference:	
11. Does the proposal include use of combining characters and/or use of composite sequences?	Yes
If YES, is a rationale for such use provided?	Ligatures and half characters have been tested for usability
If YES, reference:	<i>On KTSA PROPOSAL</i>
Is a list of composite sequences and their corresponding glyph images (graphic symbols) provided?	
If YES, reference:	
12. Does the proposal contain characters with any special properties such as control function or similar semantics?	No
If YES, describe in detail (include attachment if necessary)	

13. Does the proposal contain any Ideographic compatibility characters?
If YES, are the equivalent corresponding unified ideographic characters identified?
If YES, reference:

No
