In response to [GitHub #618](#), error report on my proposals 24-234R *Unicode request for barred letters* and 25-016 *Unicode request for letters of the RFE phonetic alphabet*, I request changes to the names of at least the first two characters below, and possibly all five:

- U+1DF43 – all small-cap character names contain the missing word ‘letter,’ and nearly all follow suggested pattern.
- U+1DF54 – the Character List had the correct name, but it was miscopied under Properties.
- U+1DFCD..U+1DFCF – it is no longer clear why these were named ‘superscript’ rather than ‘modifier.’ Only U+207F SUPERSCRIPT LATIN SMALL LETTER N follows that pattern. The proposed characters are described as ‘modifiers’ in the proposed chart subheading and in the figure captions in the proposal. Assuming SEW concurs, these should also be changed.
