TCA has submitted the some of the modified font data(including modified font)to chief editor and will submit the rest later.

Korea will submit the modified font data to chief editor before the end of 31st of January.

2. Editor's meeting on Extension A 1.1:

In the editorial meeting, IRG editors reviewed the reports on Extension A 1.1 from TCA(IRGN416 and N417), and report from Japan (N424).

Japan proposed to remove the character 1773(JA-2360) which has been coded in BMP. Thus Japan will have 661 characters in Extension A and there will be 6584 characters in Extension A.

TCA propose to add another 74 missing intersection of T_ column into Extension A(IRGN417). Since TCA did provide the table with font, the chief editor will check this later and distribute the result.

TCA also submitted another report on Extension A which concern only Korea's font. Korea claimed to have sent a new font data to Mr.Zhang, so Korea will check it themself .

The next version of HQP and extension A will be printed before next IRG meeting that is to be held at the first week of May, 1997 in China.
