

Universal Multiple-Octet Coded Character Set
UCS

ISO/IEC JTC1/SC2/WG2 IRG N 1290

Date: 2007-5-31

Doc. Type:	Member body contribution
Title:	Activity Report form TCA
Source:	TCA
Status:	Input to IRG
Action:	For Your Information
Distribution:	IRG Members and Ideographic Experts
No. of pages:	5
Medium:	Electronic

1. Status of CNS 11643:2007:

In Taiwan, a new (or revised) standard shall be reviewed by a technical subcommittee and then approved by the committee of national standard. The new version of CNS 11643 (i.e., CNS 11643:2007) had been reviewed by the technical subcommittee for Chinese information processing in several months. It passed on April, 2007. Then, it was approved by the committee of national standard on May 24, 2007. It will be published by BMSI (Bureau of Standards, Metrology and Inspection, the organization for standardization in Taiwan) on July, 2007.

The true type fonts for the ideographs in planes 1-7 of CNS 11643:2007 are provided by the MOE (Ministry of Education) in Taiwan, named MOE standard fonts in Song style (another one is named MOE standard fonts in Kai style). These two set of MOE standard fonts had been reviewed by three individual ideographical philologist groups in about 3 years. Totally 62 Chinese dictionaries had been referenced for reviewing the MOE standard fonts. They are listed in the Appendix (p.p. 3-5).

Some characters in planes 3-7 of CNS 11643:2007 had been modified by MOE in fonts even sharps. TCA is now comparing CNS 11643:2007 against the old version of CNS 11643 to find all modified characters. We will submit the result to IRG after the checking work finished.

2. The 1st Taiwanese vocabulary:

[The 1st Taiwanese vocabulary](#) was published by the MOE on May 30, 2007. It consists of 300 frequently used Taiwanese words. Most of characters used for those Taiwanese words are from traditional Chinese characters but spoken in Taiwanese rather than

Mandolin. This vocabulary is available for downloading form the web page http://www.edu.tw/EDU_WEB/Web/MANDR/index.php.

3. New characters for Taiwanese and Hakka:

The MOE had collected 2,518 Taiwanese characters and 2,772 Hakka characters. From them, MOE found 33 new characters outside UCS. TCA double check those 33 characters and found that 9 characters should be unified. TCA proposed to add these 24 characters to CJK-D. Please refer to the document IRG N1305.

Appendix: Reference list Dictionary for reviewing characters in the planes 1-7
Of CNS 11643:2007
