Dear Lu,

Please find the cjk file needed to create ext C charts for fdam5. I have applied changes requested by IRGN1392 (except for the character sourced in TD-3C3C which would have required a new character) and resolution M52.2 from last meeting WG2 (there is unfortunately a typo in the resolution it should say 22A8F instead of 24799 for one the characters). It originates from the fpdam5 disposition of comments which had the details right, but the summary wrong concerning the KX source issue.

In total:

- 14 characters re-ordered
- 2 TD sources added
- 5 KX sources added back
- 2 KX sources changed

Michel

Subject: SuperCJK 14 and fpdam5 differences

Dear Lu,

The following shows the 11 differences I have so far between SuperCJK14/Unihan and what was provided to me for FPDAM5. All the experts have agreed on 3 of them (marked as OK below) as good changes.

The other 8 are new, even to most IRG members, so unless there is agreement among experts, they should be undone and we should go back to

the SuperCJK 14 version for amendment 5 and treat their update as a potential errata processed as a future amendment.

Table shows code points, new value provided by Wang Xiaming, SuperCJK14 value, current amd5 value, and comment (OK or ?)

03A6E 擲 ; New G_KX0463.211; S14/UniHan 0463.030; Removed ;?
Transient was 1062.441
22183 幪 ; New G_KX0338.240; S14/Unihan 0338.231; 0338.240;?
221CF 𪛗 ; New G_KX0342.180; S14/Unihan 0343.031; 0342.180;OK
22A8F 𢶏 ; New G_KX0420.160; S14/Unihan 0420.170; 0420.160;? see kx
source for 6287
2304A 𢶏 ; New G_KX0477.061; S14/Unihan 0477.020; Removed ;?
23057 𢶏 ; New G_KX0477.141; S14/Unihan 0477.140; Removed ;?
2305C 𢶏 ; New G_KX0477.181; S14/Unihan 0477.160; Removed ;?
23063 𢶏 ; New G_KX0477.201; S14/Unihan 0477.200; Removed ;?
24799 𢶏 ; New G_KX0712.071; S14/Unihan 0711.110; Removed ;OK
2605F 𢶏 ; New G_KX0929.190; S14/Unihan 0929.290; 0929.190;OK
26B20 𢶏 ; New G_KX0354.030; S14/Unihan 1022.060; 0354.030;?

We need to get this clarified by end of this week (WG2 is in session) to finalize amendment 5 content. By default I will go back to SuperCJK 14 values for the 8 entries where we have disagreement.

Michel
