

Universal Multiple-Octet Coded Character Set

UCS

ISO/IEC JTC1/SC2/WG2 **IRG N1421**

Date: 2008-06-06

Source:	Committee for Unification of Computer Chinese Character Encoding, Government of Macao Special Administrative Region
Title:	Activity Report of Macao SAR with reference to June 2008
Meeting:	IRG#30 in Busan, R.O. Korea
Status:	For your information
Distribution:	IRG Members and Ideographic Experts
Medium:	Electronic

1. The Committee for Unification of Computer Chinese Character Encoding in Macao SAR has submitted our comments (N1447) to Macao characters in CJK D v3.0 on 2008-06-05. Our comment is divided into the following parts: CJK_D M set, attributes, miscellaneous, questionable, unification and missing characters. We would be greatly appreciated if the IRG could help to follow up this.
2. Internally, the Committee for Unification of Computer Chinese Character Encoding in Macao SAR has been working in full effort to establish and publish the “Macao Information Systems Character Set”¹ standard. Besides, we are also arranging related administrative and technical solutions, in order to implement the unification framework successfully.
3. Due to intensive working schedule, we sincerely apologize not be able to join the IRG#30 meeting. Any input / changes for Macao characters, please contact our Committee’s members: Mr Simon Chan (kmchan@safp.gov.mo) and Mr Clement Chau (cchau@safp.gov.mo) before any decision is made. Once again, we greatly appreciate the effort of all IRG members.

¹ “Macao Information Systems Character Set” is a character set that Macao public departments will use to exchange information. It is based on ISO/IEC 10646 standard plus the characters in Macao Supplementary Character Set (MSCS).
