

ISO/IEC JTC 1/SC2/WG2/
Ideographic Rapporteur Group

Source / Contribution Identifier: Japan

Meeting: IRG#30 @ Busan, ROK

Title: CJK D V3.0 Review by Japan

Keywords: (none)

Status: Input to the editorial group discussion

Short Description:

Proposed Conclusion / Requested Action: None

Arguments / Text of Contribution:

CJK D v3.0 (IRG N1401) is the first multi-column code chart of the next repertoire (i.e. Extension D), and we can see the designated glyph shapes on the chart. Japan reviewed this document and found many questionable unified pairs out from M set. To examine character pairs should be unified or not, Japan tried to check their evidences. However, there are very few documents registered and we could not find evidences for most characters.

Japan requests more information on the characters if we need to discuss at the next meeting. Remember IRG has agreed to submit complete information for their proposals as resolved in M27.5.

See attachment for the list of questionable characters.
