ISO/IEC JTC1/SC2/WG2/IRG N1448

Date: 2008-06-05

Source:	China
Title:	Reply to IRGN1388, Explanation of KX
Status :	characters in CJK_D
Actions required	
Distribution:	To be considered by IRG editors
Medium :	IRG#30, Busan
Appendix:	Electronic

As required by IRGN1388 (CJK editorial group report of IRG#29, San Jose) Item 2.4, China prepared this paper to explain CJK_D characters which are from Kangxi Dictionary.

2.4 other issues related to CJK_D

China was requested to prepare a document on problems of Kangxi representatives (康熙字典字頭字) and on possible wrong Kangxi glyphs for further discussion. TCA was invited to help China to find the counterparts of 3 raised compatibility characters. (ref: IRGN1384 item 2 China)

Issue of IRGN1384 Item 2 a):

3 characters were put to Compatibility Area for TCA, but they are Kangxi representatives (康熙字典字頭字) so China submitted them to CJK_D. China would like to invite TCA provide convincing reasons if TCA insists to reject these 3 characters in CJK_D.

China also requests IRG members to submit their compatibility characters to IRG for first review before being accepted by WG2.

04925 犀 G_K1605.38 XI	From KangXi Dictionary,No 38 of Page 1605.

Note: 慌 03030 G_K0398.09 is not in current CJK_D v30, China suggests to add it to CJK_D.

Issue of IRGN1384 Item 2 b):

It is found that 2 characters in CJK_B are not from Kangxi Dictionary but mistakenly marked KX indexes. Therefore, China suggested to modify the corresponding fonts in CJK_B and their indexes. The 2 corrected characters were submitted to CJK_D.

Suggestion:
25F3C: Remove G source (G_KX) but keep T source in CJK_B, encode KX true glyph (CJK_D 06232) in CJK_D.
21507: Keep G source (G_HZ) and T Source, encode KX true glyph (CJK_D 01763) in CJK_D.

b) 2 characters have incorrect glyph
