Title: Data Errors in SuperCJK 14.0

Keywords: (none)

Status: Individual Contribution

Data Errors in SuperCJK 14.0

U+21583 and dictionary references

IRG N1470 does NOT state that the ideograph referenced by KXI-1549.A8 is encoded in UCS or not. It is encoded at U+21583 but with virtual KXI-02145.291 instead of real KXI-1549.A80 according to SuperCJK 14.0.

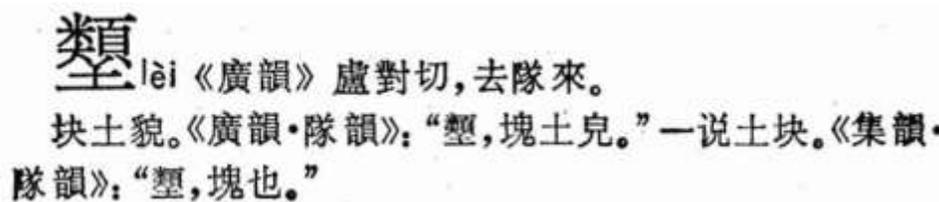

21583 08986 08986 0245.291 20872.050 𠄎 27	G_HZ	夏 𠄎
--	------	--------

U+21507 and dictionary references

IRG N1470 states that the ideograph referenced by KXI-1549.44 is not encoded in UCS, but it seems it is at U+21507.

21507 08810 08810 0242.281 10502.130 土 19	G_HZ T5-7334	類 類 𠄎 𠄎
--	-----------------	------------

According to SuperCJK 14.0, U+21507 is referenced by virtual KXI and real HZ Index 10502.130. If you look at the character in Hanyuda Zidian, the glyph and the explanations are as follows:

Because both glyph and the explanation match to the ones in KX, it should be considered as a data error in SuperCJK 14.0 and the KXI for U+21507 should have been exactly 1549.440 instead of 0242.281.

Subject: RE: late individual contribution

...there are more.

UCS	KXI	HZI
21553	0244.191	20867.180
	;KXI-->1591.980	
21556	0244.211	20868.020
	;1591.990	
21558	0244.231	20868.090
	;1591.A00	
05908	0244.241	20869.090
	;1591.A10	
2156C	0245.201	20871.070
	;1591.A20	
2156D	0245.201	20871.080
	;1591.A30	
21574	0245.231	20871.130
	;1591.A50	
21579	0245.241	20871.170
	;1591.A60	
2933D	1391.291	74349.060
	;1591.A70	

...

Basically all ideographs on page 1585 - 1631 do not seem appear in SuperCJK 14.0 (and in CJKU_SR.txt in UCS).
