

Title: Proposal for changing the source reference information for 1,417 G-Source characters

Source: Boris Zhang (张博泓)
Status: Individual Contribution
Action: For consideration by IRG and China
Date: 2025-04-12

1. Introduction

According to IRG N2689, there are now new references for some G-source characters in Unicode 17.0 (Alpha Review). But 3 sources (GHC, GCH and GCY) whose reference forms are "GXX-hhhhh", which seem to be confusing with just codepoints next to the sources as references. These 3 source reference forms should be changed into new ones.

There are currently 601 GHC-Source, 624 GCH-Source and 192 GCY-Source characters in total. The proposed source reference value will be based on the evidence of the character. The versions used for proposed references are shown in the table below.

Source	Version of Dictionary
GHC	《汉语大词典》（第一版）
GCH	《辞海》1999年版 普及本
GCY	《辞源》建国六十周年纪念版

2. GHC-Source (*Hanyu Dacidian*)

For all 601 GHC-source characters, 538 characters can be found in the dictionary. 63 others cannot be found in the dictionary. 19 characters whose sources could be changed to other ones (GHZR, GZH, GGFZ and GCE), and remaining 44 characters should be changed to GU-source.

3. GCH-source (*Ci Hai*)

For all 624 GCH-source characters, 611 characters can be found in the dictionary. 13 others cannot be found in the dictionary. 7 characters whose sources could be changed to other ones (GHZR and GZH), and remaining 6 characters should be changed to GU-source.

4. GCY-source (*Ci Yuan*)

For all 69 GCY-source characters in Ext. B and E, 37 characters can be found in the dictionary. 32 others cannot be found in the dictionary. 28 characters whose sources could be changed to other ones (GHZR, GZH and GCH), and remaining 4 characters should be changed to GU-source.

For more details on GCY-source reference values, see IRG N2838.
