Title: Additional Unified Ideographic CJK Characters
(HCS–B)

ISO/IEC JTC1/SC2/WG2 N 822

Source: China

92/6/29

Status: National Body's Proposal

Action
Requested: Consideration and review by CJK–JRG and WG2

China would like to propose the document HCS–B to CJK–JRG for extension of the Unified Ideographic CJK Characters.

HCS–B contains 8279 Chinese Hanzi including G3–unique, G5–unique, TE–unique and G5∩TE characters which are not included in the Unified Ideographic CJK Character Repertoire and Ordering V1.0.

Although those characters are from Chinese sources, more than 90% of them can be found in Dai KanWa Jiten(大汉和), and more than 70% of them can be found in Dae Ja Weon(大字源). Therefore, we regard them as part of the Unified CJK Ideographs instead of merely consolidated Chinese Hanzi.

The TENTATIVE HexCode assigned to each character is for reference only.
