N 823

TITLE : A minor change with one Kanji glyph in Unified CJK Ideographs

SOURCE: Zhang, Zhoucai
Convenor & Chief Editor
Editorial Working Group
CJK-JRG

ACTION: Correction in formal publication

DATE : 27 June, 1992

According to Mr. Koike Tateo, member of Editorial WG, CJKG-JRG, one Kanji glyph in CJK-Ideographs should be changed, although it is very minor change.

UCS Code: 90D2 (CJK V2.0)

JIS Code: 1-622D

Wrong glyph: 

Right glyph:

SUBJECT: Glyph change and DKW# change on the CJK V2.0
DATE: 1992.6.19
PAGES: 1 (including this page)

Dear Members;

1. I found out glyph difference between the CJK V2.0 and Heisei Mincho which is used in the ISO/IEC 10646 publication.
   - CJK V2.0 position 90D2
     source J:1-622D
     wrong glyph 
     right glyph 

   The right glyph is 1 stroke more than the wrong glyph, but I don't request order change. (minor maintenance)

2. DKW number of  (position:6C12) is wrong, but order is right. This character is not exist in the KXI and DKW. I propose to use DKW virtual for keep the order.

   wrong DKW# 17054 → new DKW# 17054v

Best Regards;

小池建夫
