

# Complete Charts for PRI 456:

## Registration of additional sequences in the Adobe-Japan1 collection

Updated on May 27, 2022

These charts show the representative glyphs for the Ideographic Variation Sequences proposed in PRI 456: *Registration of additional sequences in the Adobe-Japan1 collection*. For more details on this submission, please see <http://www.unicode.org/ivd/pri/pri456/>.

These charts are indexed by the code point of the Base Character, and display for the proposed sequence the following information:

- ▶ the corresponding glyph in *Kozuka Mincho Pr6N R*
- ▶ the sequence identifier in the form of the corresponding Adobe-Japan1-x CID
- ▶ the line to be added to the *IVD\_Sequences.txt* file, but without a Variation Selector specified

These complete charts show all the sequences which are proposed.

CID+19130 in the Adobe-Japan1 collection will be mapped to U+31350 in Extension H. PRI 456 proposes a new sequence for U+31350 that corresponds to the same sequence identifier, as shown in the table below:

Sequence Identifier	Registered Adobe-Japan1 Sequence		PRI 456
	Base Character	Variation Selector	Base Character
CID+19130 示	793A 示	E0100	31350 示

**31350** 示  
19130  
31350; Adobe-Japan1; CID+19130
