

Title: Summary of repertoire for FDAM 2 of ISO/IEC 10646

Date: 2005-09-14

N2991

Source: Asmus Freytag, contributing editor

Status: contributing editor's summary of the character repertoire as result of changes in M47

Action: for review by WG2 and UTC experts

Distribution: WG2 and UTC members

Replaces: N2832, N2924

Note

This document is a summary of the tentative repertoire for the second amendment. It is intended for the convenience of the WG2 delegates. A separate ballot document will be submitted by the project editor after the meeting.

Status

The characters presented in this document include those that have been reviewed by SC2/WG2 and have been approved for addition to the FDAM-2 documents with code positions and character names as shown in this document. The purpose of this document is to allow WG2 delegates to review the character names, code positions and glyphs and notify the editor if they differ from what was approved in the meeting.

The WG2 document number for all proposals has been provided for reference, as has the UTC document number in some cases for the convenience of UTC reviewers.

Most characters presented in this document have also been reviewed by the Unicode Technical Committee — where they have been approved by UTC for addition to a future version of the Unicode Standard, that information is presented in a marginal note. A series of \$\$\$\$ indicates the presence of an issue that needs to be resolved as part of synchronization. In this document, the names and code positions are shown as currently approved by WG2 for the text of the forthcoming ballot.

Manner of Presentation

The characters have been presented in the same style that would be used for publishing the Unicode Standard, with the addition of marginal notes documenting the source of the characters. This was done deliberately in order to be able to document some of the draft annotations for the reviewers.

The character names and code points shown are the same for Unicode and ISO/IEC 10646, with exception of any ISO character name comments and Annex P annotation '*', which are suppressed in this style of presentation. Where such omission occurs, it has been noted in an annotation.

Unlike the presentation style to be used for the actual amendment, but like document N2924 which this document replaces, the new characters are not shown in the context of the existing characters. The existing characters will be shown in the actual FDAM document. The occasional use of the word <reserved> in this draft is an artifact of the production process and should be ignored.

Note to Reviewers

Please review that this document accurately reflects the decisions taken at meeting M47, and if possible, alert the contributing editors to any discrepancies before ballot is issued.

Despite best efforts there may be minor discrepancies in this document, particularly in terms of this summary and the status information printed in the margins.

Contents

This document lists 1,365 characters. Existing characters from 10646 :2003 for which glyph corrections have been requested are not shown in this summary of the approved repertoire, but they will be shown in the ballot documents. The following list shows all 25 blocks to which characters will be added.
