Title: Towards an encoding of the Fraser script in the UCS

Source: Michael Everson

Status: Individual Contribution

Action: For consideration by JTC1/SC2/WG2 and UTC

Date: 2007-09-11

China's recent proposal N3317, "Proposal for Encoding the Old Lisu Script in the BMP of the UCS" presents a code table and names list which is similar to, but not identical with, a code table which I prepared on 2006-02-22.

In order to facilitate discussion between National Bodies at the WG2 meeting in Hangzhou, I have attached that code table and names list here.
