

Title: Confirmation of seven glyphs in CJK Extension C
Type: National body contribution
Project: 10646.00.05
Source: Japan
Date: 2007-10-15
Distribution: WG2 and IRG

Japan NB verified the shapes of the seven J-column glyphs in CJK Extension C as a follow up to the disposition of UK ballot comment T.2 on 10646 PDAM 5 (See page 12 on WG2 N3325.)

Japan confirms that the seven shapes of the glyphs listed on the draft amendment (except for U+2AFA7; the shape of the revised glyph in Japan ballot comment JP4 for this character) are correct as intended by Japan NB.

To further support Japan's intention, new *evidences* for the seven characters are supplied as an amendment to IRG N1225.
