

# Title: Summary of repertoire for future amendment of ISO/IEC 10646:2010

Date: 2010-04-02

WG2/N3795

Source: Michel Suignard

Status: project editor

Action: For review by WG2 and UTC experts

Distribution: WG2 and UTC

## Note

*This document is intended for delegates attending the meeting, it is not intended for general use.*

## Status

This document is intended to support the process of synchronization between the Unicode Standard and ISO/IEC 10646. It may be used by WG2 delegates interested in the results of the review of the ballot document and other pending character proposals by the Unicode Technical Committee (UTC). In this version of the document, the names and code positions are shown as currently approved by UTC for future versions of the Unicode Standard or as submitted in ballot comments and character encoding proposals. It is not a summary of WG2 decisions -- that document will be released at the end of the WG2 meeting.

## Manner of Presentation

The character names and code points shown are the same for Unicode and ISO/IEC 10646, including annotations.

In this document, the new characters are not shown in the context of the existing characters. The existing characters will be shown in the final ballot document or character names list. The occasional use of the word <reserved> in this draft is an artifact of the production process and should be ignored.

Information about the status of a character proposal in WG2 and UTC as well as other information about the proposal is presented in a marginal note. Where a proposal refers to characters that are not in a single range, the information is repeated as necessary. A series of \$\$\$\$ indicates the presence of a issue that needs to be resolved as part of synchronization. The WG2 document number for all proposals has been provided for reference, as well as the UTC document number.

## Note to Reviewers

WG2 Reviewers, please use this document as an aid during disposition of ballot comments.

*Despite best efforts there may be minor discrepancies in this document, particularly in terms of this summary and the status information printed in the margins.*

## Contents

The following list shows all 18 blocks (existing or new) to which characters are proposed to be added, or which have been affected by other changes documented here.

### Historic punctuations

- 2E32 ◊ TURNED COMMA  
 • used in Palaeotype transliteration to indicate nasalization  
 → 060C ◊ arabic comma
- 2E33 ☐ <reserved>
- 2E34 ☐ <reserved>
- 2E35 : TURNED SEMICOLON  
 • used in Palaeotype transliteration to indicate sudden glottal closure  
 → 061B : arabic semicolon
- 2E36 † DAGGER WITH LEFT GUARD  
 • used in Palaeotype transliteration to indicate retracted pronunciation
- 2E37 ‡ DAGGER WITH RIGHT GUARD  
 • used in Palaeotype transliteration to indicate advanced pronunciation
- 2E38 ‡ TURNED DAGGER  
 • used in Palaeotype transliteration to indicate retroflex pronunciation
- 2E39 § TOP HALF SECTION SIGN  
 • used in Palaeotype transliteration to indicate pronunciation on one side of the mouth only

### Dashes

- 2E3A — TWO-EM DASH  
 • scaled down to fit in cell
- 2E3B — THREE-EM DASH  
 • scaled down to fit in cell
