

Title: Proposal of Nushu Code Chart based on WG2 N4610
Source: suzuki toshiya
Date: 2015/01/12
Status: Individual contribution
Action For consideration by WG2 and Nushu experts

As reported in Nushu ad-hoc group report in WG2 #63 meeting (WG2 N4647), Nushu ad-hoc group concluded that the changes from PDAM should be proposed with the revised code chart or explicit instructions. Following to the conclusion, here I submit the revised code chart without the characters that WG2 N4610 classified as “further discussion is needed”.

More editorial improvements on the representative glyphs would be proposed in later, but this submission only exclude some characters.

Codepoint map between PDAM2.1 and the chart proposed in this document.

Following table shows the mapping of the codepoints in PDAM 2.1 text (WG2 N4637) and those in this proposal. For the characters which WG2 N4610 proposed to postpone from Amd.2 (they are not included in the code chart in this document), the referential tags are shown instead of the codepoint. For example,

	U+1B117	(See M025)
---	---------	------------

means that the character coded at U+1B117 in PDAM2.1 is not included in the proposed code chart, and the reason is described in WG2 N4610 M025.
