Date: 2024-11-26

WG2 N5290 L2/24-267

Source: Michel Suignard (Code Chart editor)

Status: Summary of Characters Approved for Publication in Unicode Version 17.0, and the 7th edition of ISO/IEC 10646

Action: For review by UTC, WG2 experts

Distribution: UTC and ISO

Replaces: N/A

Status

This document presents all assigned code points that constitute tentative new repertoire for the Unicode Standard 17.0 and ISO/IEC 10646 7th Edition with code positions, representative glyphs and character names.

The intent is to be synchronized with the table of Characters Approved for Publication in Unicode Version 17.0 published in the Unicode pipeline at <https://www.unicode.org/alloc/Pipeline.html> as of November 25th 2025. Note that ISO/IEC 10646 7th edition is targeting a publication date past Unicode Version 17.0 and may contain additional repertoire.

Feedback is welcome regarding all aspects of these characters, including whether they are acceptable for eventual encoding and publication.

Manner of Presentation

The character names and code points shown are in the same format used for official Unicode code charts. The new characters are shown in the context of the existing characters, using a yellow highlight to distinguish them.

In addition, a blue highlight is used to show changes for existing characters, either in glyph appearance, or new sources for CJK Ideographs, or new standardized variation sequences. Note that Hanja K6 horizontal extensions to CJK Unified Ideographs Extended B are not highlighted due to their large number.

Note to Reviewers

Please use this document as a summary of UTC review of pending proposals. Note that some document references may address code points not yet approved for Unicode 17.0, but just provisionally assigned.
