Title: A Preliminary Proposal on the Khitan Large Script and to be a substitute for the previous one (N4631)

Doc Type: Working Group Document

Title: A Preliminary Proposal on the Khitan Large Script

Source: China

Status: For Your Information

Authors: Project Director: Sun Bojun, Wu Yingzhe, Nie Hongyin, Wuyu

Draft Writing: Sun Xichun

Producer of Khitan Large Character: Zhonghua Ziku, Huaguang Group

Annotation of the Khitan Large Script: Wu Yingzhe, Jiruhe, Hugejileetu

Action: For consideration by JTC1/SC2/WG2 and UTC

Date: 2025-06-06

1. Introduction

In 2014, China submitted a proposal for the encoding of the Khitan large characters. The current document is a supplement and revision, and to be a substitute for the previous one (2014).

The main job was to entrust professor Sun Xichun to rewrite the forms of the large characters of the Khitan, correct some incorrect writing, and at the same time, re-examine the Khitan large character inscriptions and documents, and add some characters that were previously missing. This study has concluded a character set which can be used for computer processing the Khitan large script on the basis of those Khitan large script inscriptions collected so far and referring to those research findings on Khitan large script. It aims to provide convenience for academic research and international exchange of Khitan large script.

2. Creation and Application of Khitan Large Script

The Khitan was one of the northern nomadic nationalities in ancient China, the descendants of Donghu, one of the branches of Xianbei Yuwen tribe, which rose out of Huang and Tu two rivers, today's Xarmuren river and Laoha river basin. Before the founding of the Khitan, the Khitans

experienced the Babu period, the period of Dahe's tribal alliance and Yaonianshi tribal alliance during the different stages of development.

907 AD, Yelü Abaoji (avoid name Yi 億, childhood name Chuolizhi 嚼里只), the leader of the Khitan united some other nomadic tribes and established the Great Liao. Yelü Abaoji was respected as Emperor King, and made 916 AD as Shen Ce (神册) first year and Xilouyi as the capital. The Great Liao co-existed in history first with the Five Dynasties (五代) and then with Northern Song Dynasty (北宋). At its golden age, the territory of the Great Liao extended west to the Jinshan (金山) and Liusha (流沙), south to central Hebei (河北), northern Shanxi (山西), north to Stanovoy Range (外兴安岭). There were administration system of five Jing (capital): Shang Jing (上京 supreme capital), Zhong Jing (中京 middle capital), Nan Jing (南京 southern capital), Dong Jing (东京 eastern capital), Xi Jing (西京 western capital) and six Fu: Linhuang Fu (临潢府), today's Lindong (林东) town, Dading Fu (大定府), today's Daming (大名) town, Liaoyang Fu (辽阳府), near to modern day's Liaoyang (辽阳) City, Xijin Fu (析津府), today's Beijing (北京), Datong Fu (大同府), Datong (大同) city today and 156 Zhou, Jun, Cheng and 209 Counties, 52 tribes and 60 dependent countries. There were nine emperors of the Liao Dynasty: the emperor Yelü abaoji (耶律阿保机 916-926), Tai Zong Yelü Deguang 德光 (courtesy name Dejin 德谨, childhood name Yaogu 尧骨, 927-947), Shizong Yelü Ruan 阮 (childhood name Wu Yu 兀欲, 947-951), Muzong Yelü Jing 璟 (述律, 951-969), Jing Zong Yelü xian 贤 (courtesy name xianning 贤宁, childhood name Mingchen 明宸, 969-982), Sheng Zong Yelü Longxu 隆绪 (childhood name Wen Shu Nu 文殊奴, 982-1031), and Xing Zong Yelü Zongzhen 宗真 (courtesy name Yibujin 夷不董, childhood name Zhigu 只骨, 1031-1055), Dao Zong Yelü Hongji 洪基 (courtesy name Nielin 涅鄰, childhood name Chala 查剌, 1055-1101), Tianzuo emperor Yelü Yanxi 延禧 (courtesy name Yanning 延宁, childhood name Aguo 阿果, 1101-1125), existing 219 years. the fourth years of Baoda (保大 1124), Tian Zuo Emperor was captured by the general of Jin in Yingzhou 应州 (today's Shanxi Ying county). Liao Dynasty fell. The same year, the royal Khitan clan Yelü Dashi (大石) moved to the West and made himself a King in 1134 in Qierman (起儿漫 today's Samarkand in Uzbekistan), Balashagun (八剌沙衮) as capital, changed reign title into Kangguo (康国). It was west Liao in history. West Liao was annihilated by Naiman King Quchulü in 1211. Emperor heirs were stopped, and in 1218 destroyed by Mongol.

The Khitan people have their own language. Before the founding of country, they had no writing system. They carved wood as the contract. Established Liao Dynasty, the Khitans created two writing systems -- Khitan large script and Khitan small script which were called "Script for big ceremony" (大礼之字) and "Script for big second ceremony" (副礼之字) in Khitan language. The Khitan large script was created in fifth year of Shence (神册) (920) by Yelü abaoji assisted with Yelü Tulübu (突吕不) and Yelü Lubugu (鲁不古). The time of creation of the Khitan Small script which created by Emperor's brother Yelü Diela (迭剌) is unknown (maybe later than the large Script). These two kinds of Khitan writing systems were modeled on Chinese characters, including many phonetic components. The phonetic degree of small script is higher than the large script.

After the creation of large and small script, they were widely used in Liao. Through written and related historical materials in Khitan language discovered so far, we can learn that the Khitan small and large script were mainly used in carving memorial tablet, recording the names of the tribal members, writing the diplomatic letters, flags, and carving on card, and also writing poetry, translation of books, examination, the grief books and engraving epitaph etc.. In "Liao History" [1],

it is particularly mentioned those who knew Khitan words, such as Yelü Tulübu, Yelü Lubugu, Yelü Diela, Yelü Zhimo, Yelü Bei, Xiaoyang E, Yelü Shucheng, Xiao Yueyinnu, Xiao hanjianu, Yelü Pulu etc..

After Liao Dynasty, Khitan script was used more than 60 years by Jin. Existing works in Khitan small script as "The Langjunxingji", "Xiao Zhonggong's Epitaph", "Xiao Jushi's Epitaph" and "Zhenguo Shangjiangjun's Epitaph" are the proofs of Jin's using Khitan small script. Whether the Jurchins' using of Khitan large script or not have no final conclusion. "Jin History" mentioned that there were over 25 people knew Khitan characters, including Wanyan Zhang, Wanyan Buhui, Wanyan Zongxian etc., the number of which is larger than those mentioned in "Liao History". Of course, "Liao history", "Jin history" mentioned only those who mastered the words. Actually, there were far more than people knew the khitan script. Through the history books, we can also find the information that the Khitan language and characters were widely spread in East Asian area at that time. In "Liao History", there was a record that Korean had sent twenty kids to Liao to learn Khitan language.

Later, with the Jurchin script's maturation, in December second year of Mingchang (明昌, 1191) which is Zhang Zong emperor in Jin Dynasty, the Khitan script was stopped using. Finally, the Khitan script which had used for 270 years during Liao and Jin Dynasty had retired from the scene. However, the khitan script had been continually used in West Liao, and until West Liao died, there were still people who were able to use Khitan script. It was recorded in Book VIII of "Collection of Zhanran Jushi" (《湛然居士文集》) that Yelü Chucai (耶律楚材) had ever used Chinese words to translate Master Sigong's "Songs of Drinking"(醉义歌). Before his translation, he had learnt Khitan words from Li Shichang from West Liao. He said, "While the west expedition, I met former King of West Liao Li Shichang and express my desire of learning khitan script from him. This is probably the last record of using Khitan words which have found so far. Therefore, maybe at the end of the Yuan Dynasty or the beginning of the Ming Dynasty, the Khitan script was completely lost and became dead script.

The scholars generally believe that the Khitan language belongs to the Mongolian branch of the Altaic language family. The Khitan language regained the people's attention at the end of nineteenth Century or at the early twentieth Century. In 1922, Liao Qing Mausoleum was unearthed by some local tyrants in today's northeast Warin Mangha Bai Ta Zi Bariin Right Banner, Chifeng City, Inner Mongolia. Inside the tomb buried three emperors as well as an empress of Liao Dynasty, they were: Liao Shengzong, Xingzong, Daozong and his empress. On learning this news, a Belgium missionary named L. Kervyn arrived as soon as possible. He got two Chinese monuments and two Khitan monuments, and published his copy of all the characters one by one. The copy was first published in 1923 in "The Journal of Beijing Catholic Church"[3], later turned print in "Bulletin"[4]the same year. Since then, *Daozong Ai Ce*(道宗哀册 *Eulogy for Emperor Daozong*) and *Xuanyi Huanghou Ai Ce* (宣懿皇后哀册 *Eulogy for Empress Xuanyi*) were also unearthed from Liao Qing Mausoleum, which at that time stirred the academic world. From then on, collecting and researching work of the Khitan materials began both at China and abroad.

3.Existing Materials of Khitan Large Script

The existing materials of Khitan large script are mainly in the form of stone inscriptions, and wooden slips, paper documents and a small amount of cards, coins and seals. The paper focuses on

the materials of stone inscriptions and the paper documents which are longer in its length.

3-01. Stone Inscriptions:

1. *Jingan Temple Stone Tablet* (静安寺碑) in Khitan large script: engraved in eighth year of Liao Xian Yong (咸雍, 1072), 40 lines, 60 characters existing. It was originally at Shi Jia Zi village Ningcheng County Inner Mongolia, now housed in Liao Zhong Jing Museum Ningcheng County Inner Mongolia.
2. *The Stone Tablet of Master Gu* (故太师铭石记): engraved in second year of Liao Chongxi (重熙, 1051), a set of epitaph, 40 lines, about 1800 characters. Discovered in 1939 in a Shenyang antique shops, the original stone is missing.
3. *Xiao Xiaozhong's epitaph Xiao* (萧孝忠墓志) in Khitan large script: carved in fifth year of Da'an (大安, 1089). It is a set of epitaph, 18 lines, about 540 characters. Unearthed in 1951 in Xigushan Jinxi County of Liaoning Province, now in Jinzhou city Museum Liaoning Province.
4. *Yelü Yanning's epitaph* (耶律延宁墓志) in Khitan large Script: engraved in fourth year of Liao Tonghe (统和, 986), a set of epitaph, 19 lines, about 270 characters. Unearthed in 1964 in Baishugou Village Chaoyang County Liaoning, now housed in the Liaoning Provincial Museum.
5. *Bei Dawang's epitaph* (北大王墓志) in Khitan large script: engraved in tenth year of Liao Chongxi (重熙, 1041), a set of epitaph, 27 lines, about 780 characters. Unearthed in 1975 in Sharwendu Arhorchin Banner Inner Mongolia, and now preserved in Arhorchin Museum Chifeng city Inner Mongolia.
6. *Xiao Paolu's epitaph* (萧袍鲁墓志铭) in Khitan large script: engraved in sixth year of Da'an (大安, 1090). It is a set of epitaph, 15 lines, about 320 characters. Unearthed in 1965 in Qianshan village Faku County Liaoning, and now preserved in Liaoning Provincial Museum.
7. *Yelü Xi Nie's epitaph* (耶律习涅墓志铭) in khitan large script: engraved in fourth year of Liao Tian Qing (天庆, 1114). It is a set of epitaph, 37 lines, about 1615 characters. It was discovered in 1987 in Hortu Village Bariin left Banner Chifeng City Inner Mongolia, now in Liao Shangjing Museum Bariin left Banner Chifeng City Inner Mongolia.
8. *Epitaph for certain Langjun* (某郎君墓志) in Khitan large script: maybe carved in sixteenth year of Jin Dading (大定, 1176). It is a set of epitaph, line 16, more than 390 characters. The original monument's whereabouts is a mystery. In early 1950s, Professor Jia Jingyan got the rubbing in a bookstore in Beijing.
9. *Princess Yongning's epitaph* (永宁郡公主墓志铭): carved in eighth year of Liao Da'an (大安, 1092). It is a set of epitaph, line 36, 1485 characters. Unearthed in 2000 in Wangjiagou Village Bariin Left Banner Inner Mongolia. Now it is in Liao Shangjing Museum Bariin left Banner Chifeng City, Inner Mongolia.
10. *Yelü Changyun's epitaph* (耶律昌允墓志铭): engraved eighth year of Liao Qingning (清宁, 1062). It is a set of epitaph, cover of epitaph with 3 lines of 12 characters, now 8 characters existing; epitaph stone with 30 lines, 870 words. Unearthed in 2000 in Da Yingzi Village, Chifeng City, Inner Mongolia, now housed in Yuanbaoshan District Administration of Cultural Relics Chifeng city Inner Mongolia.
11. *Tulübu Langjun's epitaph* (突吕不郎君墓志碑) in Khitan large script: engraved in seventh year of Dakang (大康, 1081). It is a set of epitaph. Its front side has 15 rows of 610 characters, the back side has 6 rows of 177 characters. It was unearthed from Yelü Yüzhì's Tombs in 1999 in Arhorchin Banner Chifeng City Inner Mongolia Chifeng City, now in Archorchin Museum Chifeng

Inner Mongolia.

12. Yelü Qi's epitaph (耶律祺墓志) in Khitan large script: engraved in eighth year of Liao Qiantong (乾统, 1108) . It is a set of epitaph, the cover of stone with 3 lines, 13 words; base stone with 46 lines, 2845 characters. Unearthed in 1993 from Yelü Qi family cemetery Arhorchin Chifeng Inner Mongolia, now housed in Inner Mongolia Institute of Cultural Relics and Archaeology.

13. *The Stone of Mongolia Eastern Gobi Province* in Khitan large script: maybe engraved in fourth year of Liao Qingning (清宁, 1058) . It is a Stone, 7 lines, more than 150 characters. The original stone is now in the possession of the Mongolia National Museum.

14. *Master Liuyin's epitaph* (留隐太师墓志铭) in khitan script: engraved in ninth year of Liao Qiantong (乾统, 1109) . It is a epitaph, incised 25 lines, more than 800 characters. The unearthed time and location are unknown; the original stone's whereabouts is a mystery.

15. Epitaph for Yelü Dawang (耶律大王墓志) in Khitan large script: engraved in eleventh year of Liao Chongxi (重熙, 1051) , one epitaph, the front side with 20 lines, 21 lines on the back side, on east and west side of the stone were carved 3 lines respectively, a total number of more than 2000 characters. The unearthed time, place and collection are not known.

16. Yelü Zhun's epitaph (耶律准墓志铭) in Khitan Script: Engraved in fourth year of Liao Xianyong (咸雍, 1068) . It is a set of stone, 36 lines, 1300 characters. The unearthed time, place and collection are not known.

17. Yelü Li Jianu Muzhi (耶律李家奴墓志铭): Carved in seventh year of Liao Dakang (大康, 1081) . It is a set of epitaph, 31 lines, 1000 characters. The unearthed time, place and collection are not known.

3-02. Other Materials in Khitan Large Script

18. Manuscripts of Khitan large script in Russia: perhaps composed in Liao Dynasty, a total of 128 pages, about 15360 characters, the whole text has not been disclosed. The original manuscript preserved in the Oriental Literature Institute of the Russian Academy of Science.

19. Wooden slips in khitan large script: composed in Liao dynasty. Two wooden slips. One has 63 lines on one side and 67 lines on the other side; the other with 1 line. It was discovered in 1999 from Liao Dynasty tombs Khorchin Right Wing Middle Banner Hinggan Aimeg Inner Mongolia, now housed in Khorchin Right Wing Middle Banner Museum Inner Mongolia.

20. Residual stone of Liao Taizu: engraved in early Liao Dynasty, ten blocks of residual stone, saving about 78 words. In the mid twentieth Century, it was discovered from Liaozu Ling Bariin Left Banner Chifeng city Inner Mongolia, now housed in Inner Mongolia Museum and Liao Shangjing Museum Bariin left Banner separately.

21. Stone residue unearthed from Liao Shangjing relics: carved in Liao Dynasty, two blocks of residual stone. The front side of one with 10 lines, about 64 characters, the back side is not able to be clearly seen, knowing only 3 words; the front of the other with 8 lines, about 52 words. Unearthed from Liao Shangjing Relics Bariin Left Banner Chifeng city Inner Mongolia, now housed in Liao Shangjing Museum Bariin left Banner Chifeng City Inner Mongolia.

22. Residual stone of Khitan large script from Liao Shangjing Relics: engraved in Liao Dynasty, 3 blocks of the debris, existing more than 20 characters. Found in Liao Shangjing sites, now housed in Liao Shangjing Museum Bariin left Banner Chifeng City Inner Mongolia.

23. Residual stone in Khitan large script unearthed around Zu Ling Guifu: engraved in Liao Dynasty, existing 4 lines, 6 characters. Found in Liao Zu Ling ruins, now housed in Liao Shangjing Museum

Bariin left Banner Chifeng City Inner Mongolia.

24. Square pillar with Khitan characters: engraved in Liao, a pillar. It is with 2 lines both on the front and back side, 30 words. Unearthed in 1989 in Maliang Villiage Chifeng Inner Mongolia, now housed in Songshan District Cultural Relics Administration Chifeng Inner Mongolia.

25. Mongolia Kent Province Stele in Khitan large script: carved in tenth year of Liao Dakang (大康, 1084) . One stone, 4 lines of 25 characters. The original stone is in Salbar Mountain Mangnai County Kent Province Mongolia.

Besides, some scattered material in Khitan large script were also found, such as: the sarcophagus inscription, coins, seals, tokens, the bronze mirrors etc., which will not be introduced here because of limited words on them.

VI. Tulibu Langjun's Epitaph in Khitan large script(the first side)

Tulibu Langjun's Epitaph in Khitan large script

VIII. Manuscripts of Khitan large script preserved in the Oriental Literature Institute of the Russian Academy of Science

4. Nature of Khitan Large and Small Script

In 1935, a Japanese man Yanmashita Taizo published the local rubbing of *Da Liao Da Hengzhang Madam Lanlanlingjun Jianjingan Temple monument* [5], and put forward the inscription is different from *Yan Bei Lu* and the Khitan script of Chingling rubbing, They are the third kinds of Khitan words. This paper was the first published article about the inscription of the large script; unfortunately, this paper did not get the wide attention of the academic circles.

In 1951, people found the Khitan *Xiao Xiaozhong's Epitaph* in Liaoning province Jinxi Xigu hill (1089). The epitaph played an important role for the further judgment of script types. Jin Guangping, ZengYigong suggested the style of Qingling rubbing as the small script, and that of the Xigu hill as the large script [6].

The khitan script research group adopted the views by Jin Guangping, Zeng Yi Gong, and made a further introduction of Khitan large, small script [7]. At this point, the argument about the large and small words came to the end. However, the problem has not been solved completely, some scholars are still skeptical about the research.

For a long time, subject to the reading level, scholars unable to get the nature of the large script, and tend to consider them as a kind of ideographic script. In 2004, Mr. Liu Fengzhu has made new progress in interpreting the Khitan large script in *Yelu Changyun's Epitaph* (1062), He constructed

the pronunciation to more than 180 Khitan large characters, and put forward his opinions[8] on the properties of Khitan large script, He said,

Khitan large script basically is the syllable alphabet, generally, a Khitan character is a syllable. But there are a few Khitan large script are multi syllabled... In most cases, it is a transliteration of one Chinese character by one Khitan character. Sometimes two or three Khitan characters equal to one Chinese character.

The understanding of the nature of the Khitan large script is formed after repeated revisions by Mr Liu. Japanese scholar Yoshiike Kouichi had done a detailed introduction and analysis in 2007. Aixinjueluo expounded his views to the types of Khitan characters. He suggested Khitan large script is an "ideographic - syllabic" script, the Khitan small script is an "ideographic - syllable and phoneme" script.

In short, the Khitan does still not fully understand by us, especially the Khitan large script, Only 10% of 2245 characters have been read. Half of the 400 Khitan Small words have been read, but differences of opinion in many aspects such as sound interpretation are still exist. Therefore, at this stage it is difficult to make a final conclusion of the type or the nature of the Khitan scripts. Now the understandings of large and small script are similar. There are ideograph, tables, and even syllable phoneme ingredients in Khitan large and small script. If so, the difference between Khitan large and small script is that the ideographic component in former is more than the latter.

In fact, the classification on text types in philology according to the general nature of the written body tone, the identification is not taking every element properties into account. As we all know, Japanese kana is recognized as the syllable words, but it also has a phoneme alphabet.

By far, rarely did we interpret 200 original characters are polysyllabic; some scholars believe that there is no duplicate syllabic alphabet. Anyway, so far the "syllable composition" in Khitan small script of the original character takes the absolute advantage, which is in the affirmative. So the type of small script might be judged as "syllable alphabet". The type of the Khitan large script can temporarily be judged as "ideographic and syllable alphabet". As for the proportion of the ideographic and phonetic, can only be look forward to the future research.

5. A Plan for Computer Processing of Khitan Large Script

The collection and electrification of Khitan characters started late, which influence the digital management of related research works of printing, publishing and literature to some extent. Firstly, we collected inscriptions, pictures or copy of Khitan Large script found so far widely in order to build a sound foundation for further study.

Secondly, cards are made one by one for the capital characters from the neatly and clearly engraved *Princess Yongning's Epitaph*, *Yeli Xilie's Epitaph*, *Yeli Qi's Epitaph*. In order to facilitate the review and verification, simple classification is made after each making a card according to the strokes. After a period of hard working, kinds of different shape are extracted from the original documents. Then, according to the various rubbings, detailed screening of cards, excluding some repeat words, finally sums up to 2245 letters.

One point to emphasis is, although the Khitan characters alphabet itself is simplified Chinese characters and symbols, but this is deformation based on Chinese characters, which has the very big difference from Chinese characters font, then it is difficult to classify according to the radical principle of Chinese character. Therefore, in the precipitated radicals, we should summarize the

simple characters as far as possible, and for the ranking of character, we should still follow the previous scholars, which arranged according to horizontal stroke (横), vertical stroke (竖), left-falling stroke (撇), dot stroke (点), turning stroke (折) as sequence.

Then, in accordance with the computer font production requirements, a calligrapher will be hired to write every Khitan large script neatly on the matt by soft pen. Finally, according to the name of strokes, the input code of each word will be determined. Mapping of strokes and shape the Khitan large script on the keyboard are as follows: dot stroke (丶) is D, horizontal stroke (一) is H, vertical stroke (丨) is S, left-falling stroke (丿) is P, right-falling stroke (㇏) is N, turning stroke (㇚) is Z, hook stroke (乚) is G, raising stroke (ノ) is T, turning (厶) is W, 斜 slope stroke (㇚) is X ect..

This method of using initials of strokes and shapes (or at the beginning of the phonetic alphabet) to determine the input code can effectively avoid arbitrariness between the strokes and the keys, and also improve the input speed. If the initials of names of these ten strokes will be ranked according to character's shape of Khitan words and the rules of Chinese strokes, and then the input code of each word will be got. Even so, we are unable to provide the quite mature glyph table because of the complete degree of the materials and the clarity degree of the rubbings and also the research level. In the glyph table we made, there are still some variants, wrongly written character and even repeated font. We intend to further consolidation and standardization in the follow-up study.

Because there is no a Khitan dictionary found, interpretation of the Khitan characters is very limited, this system mainly uses research results of Mr. Liu Fengzhu and the Australian scholar Daniel Kane recently published "Khitan language and characters" [9]. As for the unknown speech and meaning of the characters, we will annotate them using "Unkown" with the serial number according to the order appeared in the glyph table.
