

NOTE for DIS 10646.1-2: Pages 248 to 253 are blank.

25 CJK unified ideographs

Entries in the code tables for CJK (Chinese/Japanese/Korean) unified ideographs are arranged as follows:

Row/Cell Hex Code	C G-Hanzi-T	J Kanji	K Hanja
078/000 4E00	0-523B 1-4421	0-306C	0-6C69
	0-5027 1-3601	0-1676	0-7673

Annotations:

- Row/Cell in decimal: points to 078/000
- Code in hexadecimal: points to 4E00
- Source code, section and position number: points to the source codes (e.g., 0-523B)
- Source code and code in hexadecimal: points to the hex codes (e.g., 0-523B)

The leftmost column shows the code position in this International Standard, giving the coded representation both in decimal and in hexadecimal notation.

Each of the other columns shows the graphic symbol for the character, and its coded representation, as specified in a source standard for coded character sets that is also identified in the table entry. Each of these source standard is assigned to one of four groups indicated by G, T, J, or K as shown in the lists below. In each table entry, a separate column is assigned for the corresponding character (if any) from each of those groups of source standards.

An entry in any of the G, T, J, or K columns includes a sample graphic symbol from the source character set standard, together with its coded representation in that standard. The first line below the the graphic symbol shows the coded representation in hexadecimal notation. The second line shows the coded representation in decimal notation which comprises two digits for section number followed by two digits for position number. Each of the coded representation is prefixed by a one-digit source code number followed by a hyphen. This source code number identifies the coded character set standard from which the character is taken as shown in the lists below.

Hanzi G sources are:

G0 GB 2312-1980

- G1 GB 12345-1990 with 58 Hong Kong and 92 Korean "Idu" characters
- G3 GB 7589-1987 unsimplified forms
- G5 GB 7590-1987 unsimplified forms
- G7 General purpose Hanzi list for modern Chinese language
- G8 GB 8565-1989

Hanzi T sources are:

- T1 TCA-CNS 11643 1st plane with some additional characters
- T2 TCA-CNS 11643 2nd plane
- TE TCA-CNS 11643 14th plane with some additional characters

Kanji J sources are:

- J0 JIS X 0208-1990
- J1 JIS X 0212-1990

Hanja K sources are:

- K0 KS C 5601-1987
- K1 KS C 5657-1991

For CJK (Chinese/Japanese/Korean) ideographs in the BMP, the names shall be algorithmically constructed by appending their two-octet coded representation in hexadecimal notation to "CJK UNIFIED IDEOGRAPH-". For example, the first CJK ideograph character in the BMP has the name "CJK UNIFIED IDEOGRAPH-4E00".
