Date: February 5, 2010
Title: Comments accompanying the U.S. positive vote on PDAM2 to ISO/IEC 14651:2007
Source: INCITS/L2
Action: Forward to INCITS

The U.S. National Body is voting Yes with comments on the following SC2 ballot: SC2 N4116:
Information technology -- International string ordering and comparison -- Method for
comparing character strings and description of the common template tailorable ordering

Technical Comments:

T.1.
The U.S. requests that U+00AD SOFT HYPHEN be changed to have IGNORED for levels one,
two and three in the CTT for this amendment of 14651. This will ensure that it is ignored in
collation, because words should not be distinguished for searching or matching by the presence
or absence of a soft hyphen. This will also keep 14651 in sync with the Unicode Collation
Algorithm.
