

DOC TYPE: Working Group Document

TITLE: Proposal for Arabic Mathematical Alphabetic Symbols

SOURCE: Azzeddine Lazrek (Cadi Ayyad University, Marrakesh, Morocco), Murray Sargent, Roozbeh Pournader, Adil Allawi, and Deborah Anderson (Script Encoding Initiative, UC Berkeley)

STATUS: Liaison member contribution (from SEI, UC Berkeley)

ACTION: For consideration by WG2

DISTRIBUTION: ISO/IEC JTC1/SC2/WG 2

This proposal is a revision of N3085-1, which was submitted to WG2 by Azzeddine Lazrek in 2006. The repertoire only includes characters for which evidence has been provided in N3085-1 (and/or in earlier documents<sup>1</sup>).

The MathML WG would very much like to see progress on this proposal since the Arabic math alphabetic are referred to in the MathML 3.0 specification due to be published this summer.

### Background

Arabic mathematical expressions use special symbols and usually flow from right to left. Most of these symbols had been adopted through official international conventions such as *The Amman's 1987 convention* (see figure 2, page 21 in N3085-1).

Arabic mathematical alphabetic symbols constitute a widely used version of the Arabic alphabet, used over many centuries and in many contexts, e.g., in manuscripts, books on epigraphy, manuals, and traditional print editions. This way of writing expressions corresponds to the standards and conventions adopted in languages using Arabic alphabet-based scripts, such as Arabic or Persian. The majority of mathematics handbooks used in the Middle East, Libya, Algeria, etc. are typeset according to these conventions.

In some cases, both Latin and Arabic types of presentations of mathematics may be required in the same text. Therefore, the addition of those characters is necessary for the correct and accurate representation of ancient and current Arabic mathematical expressions.

### Style Variations in Math

In mathematics, style variations are very important semantically. Mathematical alphabetic

---

<sup>1</sup> Earlier versions of the Arabic Mathematical Alphabetic Symbols proposal are listed and posted at: <http://www.ucam.ac.ma/fssm/rydarab/unicode.htm>. The earlier versions may have slightly different repertoires and examples. Also see: <http://www.ucam.ac.ma/fssm/rydarab/doc/unicode/samples.pdf>

symbols in Latin-based script texts are typeset in a different way from letters in ordinary text, and may appear, at first glance, to be a font variation. Compare the letter H, which can appear as in a given document as a plain H, a bold H (**H**), an italic H (*H*), or a script H (*H*). However, these characters have distinct and usually unrelated mathematical semantics: the normal H represents a different variable from the bold H (**H**). Losing these attributes in plain text would result in distinctions being lost, and the meaning of the text being altered.<sup>2</sup> In the same way, Arabic styles – the tailed, stretched, looped, or double-struck forms – have semantic content that needs to be kept in plain text, and not handled at the font level.

### **Arabic Math Symbols vs. Arabic Presentation Forms-B and Arabic block characters**

With minor variations in shape, certain forms of the Arabic characters already exist in the Unicode Standard/ISO 10646. In particular, the isolated and initial styles of the Arabic letters appear in the Arabic Presentation Forms-B block. Because the Arabic Presentation forms were included for compatibility, the use of these characters for math could cause problems with existing systems. In our opinion, it is cleaner to have math variables separate from legacy presentation forms.

Characters in the 0627..064A block are subject to shaping, whereas Arabic math alphabetic are not. While one could handle certain Arabic mathematical symbols as characters from the 0627..064A block with U+200C ZERO WIDTH NON-JOINER, we think it makes better sense to encode a separate set of Arabic math symbols. Such a set will also facilitate the use of MathML for Arabic mathematical presentation.

### **Arabic Trigonometric Function Names**

For right-to-left Arabic mathematical text, the usual shaping, or ligaturing, of Arabic letters is omitted except for abbreviations or for entities like trigonometric function names.

Trigonometric names need to be shaped and can be handled as characters in the 0627..064A block, just as ASCII letters are used for trigonometric functions in Western mathematics. The two characters at 1EEF0 and 1EEF1 are operators that stretch, and hence are separately encoded here.

### **Order of Characters**

There are two orders of characters in Arabic, one used in mathematics or alphabetic numeration (a, b, j, d, ...), and the second which is typically found in dictionaries (a, b, t, th, ...). The mathematical order is the older, generic Semitic order. In this proposal, the abjad order is followed. Typically, linguistic sorting is not used with mathematical expressions, so the use of the abjad order for math should not present a problem. On the other hand, requiring math

---

<sup>2</sup> See further section 2.2 of Unicode Technical Report #25 Unicode Support for Mathematics by Barbara Beeton, Asmus Freytag, and Murray Sargent, 2008, <http://www.unicode.org/tr25/>.

implementations to use the a, b, t, th, the order would be problematic for math sorting. (However, sorting can be tailored if desired.)

## Input

Differentiating the Arabic mathematical isolated symbols from 0627..064A is straightforward: the latter are translated to the former by default. If characters are input as ordinary text, i.e., inside quotes, they end up in the 0627..064A block, and will be subject to shaping.<sup>3</sup>

## Code chart and Names list

Holes in the columns running from 1EE00 to 1EEBF are left open for the addition of more characters, as evidence is provided. Three columns from 1EEC0..1EEEF are also left for additional characters, as needed. The last column, 1EEF0..1EEFF is for operators and similar symbols.

The names list cross-references Arabic Presentation forms.

## Character Properties: Two Issues

### *General Category*

The proposed alphabetic characters have been assigned the general category of Sm, as these are math symbols. Alternatively, these characters could be encoded as Lo, reflecting the general category of Latin and Greek alphanumeric math symbols, if the committees recommend this change.

### *Decomposition*

Currently, no decompositions are provided. However, we will include them if the committees feel the characters should have compatibility decompositions to normal Arabic letters. This may help for using mathematical expressions as parts of file names or default document titles and in some specialized sorting scenarios. If decompositions are preferred, the best candidate for a compatibility decomposition prefix is <font>, as others have more specific meanings. A <font> label would also reflect the way Latin and Greek alphanumeric math symbols are decomposed.

### Stretching operators

The following operators stretch based on the width of the text that is displayed below or above them.

1EEF0	عـ ARABIC MATHEMATICAL OPERATOR MEEM WITH HAH WITH TATWEEL → $2211 \sum$ n-ary summation • Used in Arabic mathematics to denote summation • Stretched at the tatweel
1EEF1	حـ ARABIC MATHEMATICAL OPERATOR HAH WITH DAL • Used in Persian mathematics to denote limits • Stretched between the hah and the dal

**ISO/IEC JTC 1/SC 2/WG 2  
PROPOSAL SUMMARY FORM TO ACCOMPANY SUBMISSIONS  
FOR ADDITIONS TO THE REPERTOIRE OF ISO/IEC 10646<sup>1</sup>**

Please fill all the sections A, B and C below.

Please read Principles and Procedures Document (P & P) from <http://www.dkuug.dk/JTC1/SC2/WG2/docs/principles.html> for guidelines and details before filling this form.

Please ensure you are using the latest Form from <http://www.dkuug.dk/JTC1/SC2/WG2/docs/summaryform.html>.

See also <http://www.dkuug.dk/JTC1/SC2/WG2/docs/roadmaps.html> for latest Roadmaps.

**A. Administrative**

1. Title:	<b>Proposal to Add Arabic Mathematical Alphabetic Symbols</b>
2. Requester's name:	<i>Azzeddine Lazrek, Murray Sargent, Roozbeh Pournader, Deborah Anderson</i>
3. Requester type (Member body/Liaison/Individual contribution):	<i>Liaison Contribution (Script Encoding Initiative)</i>
4. Submission date:	<i>04 April 2010</i>
5. Requester's reference (if applicable):	
6. Choose one of the following:	
This is a complete proposal:	<input checked="" type="checkbox"/> <i>Complete</i>
(or) More information will be provided later:	<input type="checkbox"/>

**B. Technical – General**

1. Choose one of the following:		
a. This proposal is for a new script (set of characters):	<input checked="" type="checkbox"/> <i>new block</i>	
Proposed name of script:	<i>Arabic Mathematical Alphabetic Symbols</i>	
b. The proposal is for addition of character(s) to an existing block:		
Name of the existing block:		
2. Number of characters in proposal:	<i>143</i>	
3. Proposed category (select one from below - see section 2.2 of P&P document):		
A-Contemporary <input checked="" type="checkbox"/>	B.1-Specialized (small collection) <input type="checkbox"/>	B.2-Specialized (large collection) <input type="checkbox"/>
C-Major extinct <input type="checkbox"/>	D-Attested extinct <input type="checkbox"/>	E-Minor extinct <input type="checkbox"/>
F-Archaic Hieroglyphic or Ideographic <input type="checkbox"/>	G-Obscure or questionable usage symbols <input type="checkbox"/>	
4. Is a repertoire including character names provided?	<input checked="" type="checkbox"/> <i>yes</i>	
a. If YES, are the names in accordance with the "character naming guidelines" in Annex L of P&P document?	<input checked="" type="checkbox"/> <i>yes</i>	
b. Are the character shapes attached in a legible form suitable for review?	<input checked="" type="checkbox"/> <i>yes</i>	
5. Fonts related:		
a. Who will provide the appropriate computerized font to the Project Editor of 10646 for publishing the standard?	<i>Roozbeh Pournader</i>	
b. Identify the party granting a license for use of the font by the editors (include address, e-mail, ftp-site, etc.):	<i>Azzeddine Lazrek with Roozbeh Pournader</i>	
6. References:		
a. Are references (to other character sets, dictionaries, descriptive texts etc.) provided?	<input checked="" type="checkbox"/> <i>See N3085-1</i>	
b. Are published examples of use (such as samples from newspapers, magazines, or other sources) of proposed characters attached?	<input checked="" type="checkbox"/> <i>Contained in N3085-1 (L2/05-319)</i>	
7. Special encoding issues:		
Does the proposal address other aspects of character data processing (if applicable) such as input, presentation, sorting, searching, indexing, transliteration etc. (if yes please enclose information)?	<input type="checkbox"/> <i>No</i>	

**8. Additional Information:**

Submitters are invited to provide any additional information about Properties of the proposed Character(s) or Script that will assist in correct understanding of and correct linguistic processing of the proposed character(s) or script. Examples of such properties are: Casing information, Numeric information, Currency information, Display behaviour information such as line breaks, widths etc., Combining behaviour, Spacing behaviour, Directional behaviour, Default Collation behaviour, relevance in Mark Up contexts, Compatibility equivalence and other Unicode normalization related information. See the Unicode standard at <http://www.unicode.org> for such information on other scripts. Also see <http://www.unicode.org/Public/UNIDATA/UCD.html> and associated Unicode Technical Reports for information needed for consideration by the Unicode Technical Committee for inclusion in the Unicode Standard.

<sup>1</sup> Form number: N3702-F (Original 1994-10-14; Revised 1995-01, 1995-04, 1996-04, 1996-08, 1999-03, 2001-05, 2001-09, 2003-11, 2005-01, 2005-09, 2005-10, 2007-03, 2008-05, 2009-11)

### C. Technical - Justification

1. Has this proposal for addition of character(s) been submitted before? If YES explain	<i>yes</i> <i>N3085-1 (L2/05-319) was an earlier version of this proposal</i>
2. Has contact been made to members of the user community (for example: National Body, user groups of the script or characters, other experts, etc.)? If YES, with whom? If YES, available relevant documents:	<i>yes</i> <i>Azzeddine Lazrek, Cadi Ayyad University, Marrakesh, Morocco and others</i>
3. Information on the user community for the proposed characters (for example: size, demographics, information technology use, or publishing use) is included? Reference:	<i>221 million speakers</i> <i>Ethnologue 2009 (web version)</i>
4. The context of use for the proposed characters (type of use; common or rare) Reference:	<i>common</i>
5. Are the proposed characters in current use by the user community? If YES, where? Reference:	<i>yes</i>
6. After giving due considerations to the principles in the P&P document must the proposed characters be entirely in the BMP? If YES, is a rationale provided? If YES, reference:	<i>N/A</i>
7. Should the proposed characters be kept together in a contiguous range (rather than being scattered)?	<i>yes</i>
8. Can any of the proposed characters be considered a presentation form of an existing character or character sequence? If YES, is a rationale for its inclusion provided? If YES, reference:	<i>no</i>
9. Can any of the proposed characters be encoded using a composed character sequence of either existing characters or other proposed characters? If YES, is a rationale for its inclusion provided? If YES, reference:	<i>no</i>
10. Can any of the proposed character(s) be considered to be similar (in appearance or function) to an existing character? If YES, is a rationale for its inclusion provided? If YES, reference:	<i>yes</i> <i>yes</i> <i>rationale is provided in this proposal (these are symbols with no joining behaviour)</i>
11. Does the proposal include use of combining characters and/or use of composite sequences? If YES, is a rationale for such use provided? If YES, reference: Is a list of composite sequences and their corresponding glyph images (graphic symbols) provided? If YES, reference:	<i>no</i>
12. Does the proposal contain characters with any special properties such as control function or similar semantics? If YES, describe in detail (include attachment if necessary)	<i>no</i>
13. Does the proposal contain any Ideographic compatibility character(s)? If YES, is the equivalent corresponding unified ideographic character(s) identified? If YES, reference:	<i>no</i>
