

Preliminary proposal to encode Vexillology Symbols in Unicode

Anshuman Pandey
pandey@umich.edu

April 6, 2017

1 Introduction

This is a preliminary proposal to encode symbols used in the field of vexillology for conveying information regarding usage and features of national flags. These symbols are used in printed materials and in digital content. A tentative character set is shown in the attached code chart and names list. The set contains two categories of characters: 64 flag information symbols and 19 flag typology symbols.

The flag information symbols have character names beginning with ‘FLAG SYMBOL’. The glyphs for these symbols were produced from SVG images generated by the `fiav_dots.pl` Perl application written by Claus Faerber (2006). The flag typology symbols have names beginning with ‘FLAG TYPOLOGY SYMBOL’. Glyphs for these characters were designed by António Martins-Tuválkin and Željko Heimer.

Research on encoding vexillology symbols is ongoing and a formal proposal is forthcoming. Please submit comments and questions to the proposal author at the above address.

2 Description

2.1 Flag information symbols

The flag information symbols were officially adopted by Fédération internationale des associations vexillologiques (FIAV). The symbols are described in the “Flag Information Code”, which was adopted on August 27, 1981, and amended on July 5, 1995. Section 5 (“National Flag Use”) of the code states:

- (a) The following grid is used to describe the use or uses of a flag whose primary function is to identify nationality rather than some other characteristic (such as the rank of an individual, the existence or a specific government or military institution, or some other concept):

++

(b) The six areas of the grid indicate the six basic uses of national flags: (1) use by private individuals and institutions on land; (2) use by nonmilitary government institutions on land; (3) use by military institutions on land; (4) use by private individuals and institutions at sea; (5) use by nonmilitary governmental institutions at sea; and (6) use by military institutions at sea. Private, nonmilitary governmental, and military use is indicated from left to right by the three vertical columns; use on land and sea is indicated from top to bottom by the two horizontal rows.

(c) The grid is to be written or printed in the line of identifying text near an illustration of a flag, together with the ratio indicating proportions. The use or uses of the flag design are indicated by placing a point (•) or an × in the appropriate area or areas of the grid.

The ++ grid may be visualized as per the following schema:

| | | | |
|-----------------|--------------------|-------------------|---------------------|
| | <i>Private use</i> | <i>Public use</i> | <i>Military use</i> |
| <i>Land use</i> | Civil flag | State flag | War flag |
| <i>Sea use</i> | Civil ensign | State ensign | War ensign |

Some vexillologists use symbols based upon a 3×3 grid, in which an additional row is added to the top for indicating air flags. The expanded grid has not been officially recognized by FIAV.

2.2 Flag typology symbols

The flag typology symbols are used for describing the design and additional features of flags.

3 Tentative encoding model

Although there are a variety of methods for representing flag information symbols, the tentative model proposes encoding each of the 63 configurations as distinctive characters in addition to 1 empty grid. Alternate models will be discussed in the formal proposal.

Flag information symbols

Grid symbols based upon the Flag Information Code adopted by Fédération internationale des associations vexillologiques (FIAV). The first row represents land use; the second row represents sea use. From left, columns indicate civil, state, and military usage.

- 1FA48  FLAG TYPOLOGY SYMBOL SINISTER
• Obverse side meant to be hoisted with pole to the observers right
- 1FA49  FLAG TYPOLOGY SYMBOL AUTHORISED
• Design officially authorized to represent nation by government of that nation
- 1FA4A  FLAG TYPOLOGY SYMBOL HISTORICAL
• Design used in the past, but now abandoned
- 1FA4B  FLAG TYPOLOGY SYMBOL MIRROR
• Reverse side is mirror image of obverse side
- 1FA4C  FLAG TYPOLOGY SYMBOL EQUAL
• Reverse side is congruent with obverse side
- 1FA4D  FLAG TYPOLOGY SYMBOL NO REVERSE INFO
• Information on reverse side is not available
- 1FA4E  FLAG TYPOLOGY SYMBOL VERTICAL NORMAL
• Flag can be hung vertically by hoisting on a normal pole, then turning the pole 90°
- 1FA4F  FLAG TYPOLOGY SYMBOL VERTICAL ROTATED
• Flag can be hung vertically by rotating the design first
- 1FA50  FLAG TYPOLOGY SYMBOL VERTICAL UNKNOWN
• Vertical hoist method of flag is unknown
- 1FA51  FLAG TYPOLOGY SYMBOL VERTICAL INAPPLICABLE
• Design has no element that can be rotated
- 1FA52  FLAG TYPOLOGY SYMBOL VERTICAL EXCLUSIVE
• Flag can be hoisted vertically only

Flag typology symbols

Additional symbols proposed by FIAV, but never officially adopted.

- 1FA40  FLAG TYPOLOGY SYMBOL NORMAL
• Normal or de jure version of flags, or obverse side
- 1FA41  FLAG TYPOLOGY SYMBOL PROPOSED
• Design proposed but not officially adopted
- 1FA42  FLAG TYPOLOGY SYMBOL RECONSTRUCTION
• Design is a reconstruction based on observations
- 1FA43  FLAG TYPOLOGY SYMBOL REVERSE
• Reverse side of flag
- 1FA44  FLAG TYPOLOGY SYMBOL VARIANT
• Design is an acceptable variant
- 1FA45  FLAG TYPOLOGY SYMBOL ALTERNATE
• Alternative version of flag
- 1FA46  FLAG TYPOLOGY SYMBOL DE FACTO
• De facto version of flag
- 1FA47  FLAG TYPOLOGY SYMBOL TWO AND SIDED
• Flag has different designs on its obverse side and its reverse side
