- CJK Stroke Counts (IRGN954AR)
- Suggestions of CJK Stroke Counts (IRGN1093)

The editorial group drew the following conclusions and asked the IRG plenary for approval.

2. Ideographic Description Sequences (IDS) scheme may be used for future review of CJK\_C1:
  - A. Two volunteers (Dr. Lu Qin and Mr. Taichi Kawabata) will prepare a document containing some examples and rules (on decomposing ideographic characters, etc.) by 2004-12-31.
  - B. Editors from China, Japan, R.O.Korea, US/Unicode, and TCA should make IDSs of 250 characters respectively as a trial by 2005-01-28. Tasks will be set by the IRG Chief Editor when CJK\_C1 E40 set is distributed (2004-12-28).  
*Note: The editorial group agreed to make 250 IDSs as a trial. The editors should raise problems they find, when making IDS in their IDS reports, for further evaluation of IDS scheme for CJK\_C1 review.*
3. In order to make attributes (especially stroke counts) of characters more perfect for easier review on CJK\_C1, IRGN954AR should be updated with a few corrections. The updated document (IRGN1105) will be drafted by editors from Macau SAR, Japan and TCA and other people who are interested by 2004-12-17. The IRG members' chief editors should confirm it by 2004-12-28.
4. Glyphs (128×128 bitmap) correction of CJK\_C1 characters will be frozen by 2005-04-20. ref: IRGN881

5. The editorial group decided to keep CJK\_C1 as a whole.
