

# ISO/IEC JTC1/SC2/WG2/IRG N1525

## Universal Multiple-Octet Coded Character Set International Organization for Standardization

Doc Type: ISO/IEC JTC1/SC2/WG2/IRG

Title: Characters to be Withdrawn from UNC

Source: John H. Jenkins, Unicode Consortium

Status: Liaison Contribution

Action: For consideration by the IRG

Date: 2008-11-10

Because of our inability to provide appropriate evidence of use, the UTC is withdrawing from its UNC proposal the following characters:

UTC00291 龐, UTC00294 錄, UTC00296 潭, UTC00297 嫺, UTC00300 藹,  
UTC00301 莖, UTC00302 璉, UTC00303 糞, UTC00304 決, UTC00305 規,  
UTC00306 埽, UTC00308 耀, UTC00311 頰, UTC00312 陸, UTC00314 腴, and  
UTC00315 覬

These characters may be resubmitted for a future extension if appropriate evidence is found.

After consultation with Ken Lunde, we will not be withdrawing the following, even though Dr. Lunde has found evidence in favor of unification with other characters:

UTC00855 互, UTC00856 座, and UTC00867 涼

Dr. Lunde would like a formal determination on the part of the IRG as to whether or not these three are unifiable as suggested in IRG N1496.
