

Universal Multiple-Octet Coded Character Set UCS

ISO/IEC JTC1/SC2/WG2 IRG N xxxx

Date: 2008-11-07

Source:	China
Meeting:	IRG#31, Kunming, China
Title:	Request of withdrawing 3,215 G-source CJK_D characters
Status:	Member's submission
Actions required:	To be considered by IRG
Distribution:	IRG
Medium:	Electronic
Pages:	26

This document requests to withdraw 3,215 G-source characters of CJK_D.

IRG requires its member body to provide “evidences” such as source, meaning, pronunciation, etc. for every CJK_D candidate. When searching for these “evidences” we found that we would be unable to collect all necessary information for every G-source character in CJK_D in time. Some of the original proposers did not leave enough materials to their successors, we are still searching. Some “evidences” are not collected in time because of lack of hands.

To reduce the work load of CJK_D, we request to withdraw 3,215 G-source characters of CJK_D. (This does not mean that these characters were unchecked when they were proposed at the beginning of CJK_D.)

We feel so sorry for making inconvenience to IRG colleagues.

The following pages show glyphs and indexes of the 3,215 G-source characters.

To be Removed 3215 Chinese Characters from CJK D
