HKSAR Comments on CJK Ext D v5.0

Please refer to IRGN1549_HKSAR_ExtDv5.xls for detail of comments.

It is observed from the submissions that choosing of First Stroke may not tally with the glyph shape of the character in some cases.

In the examples given below, the stroke of the general written style, which is a ‘dot’ – ‘4’ is taken but the shape of the glyph in Truetype font shows that it is a horizontal bar – ‘1’.

It is suggested members to discuss at the 32nd IRG meeting to come up an agreed view on how the FS is to be chosen.

Title: Review report on IRG N1549 (CJK Ext D v5.0) (Japan)

In IRG N1563, ROK proposes to withdraw all K-sources from Ext D, but it is not processed in IRG N1549.

With modified J-source glyphs (TrueType font), attributes of some characters has been changed as listed in IRG N1501 but they are not processed yet.

Out from the further study of its proposals, Japan decided to withdraw two characters from Ext D.
