Title: Quick confirmation on IRG N1552 (CJK E v5.1) review comments and further explanation on J- questionable sources.

Summary:

Japan quickly looked through on the review comment of IRG N1552 from HKSAR and TCA. This paper describes some comments and explanations on them as the input to the editorial meeting at IRG #32.

1) CJKDv2 listed below is glyph problems reported by TCA, but they are already deleted from v5.1 M set.

00049, 00059, 00150, 00155, 00158, 00159, 00338, 00667, 01240, 01256,
01867, 03098, 03329, 03525, 03541, 03543, 08407, 03573, 03609, 03684,
03698, 03827, 03836, 05254, 05326, 05534, 06089, 06833, 07038, 07222,
07444, 07550, 10535, 10536, 07926, 08199, 08427, 08768, 08769, 09386,
09387, 09391, 09394

2) CJKDv2 listed below is requested to re-confirm glyphs, but all of their modifications are already reported several times. They can be found in IRG N1501 for example.

00071, 01982, 03354, 03950, 04017, 04117, 04355, 05322, 05524, 05525,
05737, 05775, 07214, 07506, 07679, 07687, 07875, 09838, 09842, 09864,
10095, 10459

3) CJKDv2=04015, 04117

Japan confirmed HKSAR's comment and IRG N954AR, and agree to correct their FS=2.

椅	0551.181	椅		椅					
04015	木 11 1			JK-65294					

櫟	0561.111			櫟					
04117	木 15 1			JK-65330					

4) CJKDv2=09864

Japan confirmed HKSAR's comment and IRG N954AR, and agree to correct its FS=3.

鰾	1480.361			鰾					
09864	魚 17 5			JK-66047					

5) CJKDv2=08703

Japan confirmed HKSAR's comment and IRG N954AR, and agree to correct its SC=20.

被 鍍 08703	1328.021 金 19 4				被 鍍 JK-65880					
-----------------	-----------------------	--	--	--	--------------------	--	--	--	--	--

6) CJKDv2=05803

Japan carelessly didn't report this modification. But the current J-column is the correct design and Japan believes this modification doesn't cause unification problem.

禱 05803	0846.261 示 11 4				禱 JK-65464					
------------	-----------------------	--	--	--	---------------	--	--	--	--	--

7) CJKDv2=01214, 03802

Japan cannot understand the problem.

啞 01214	0209.151 口 12 3				啞 JK-65077					
------------	-----------------------	--	--	--	---------------	--	--	--	--	--

十 03802	0509.031 木 0 0				十 JK-58711					
------------	----------------------	--	--	--	---------------	--	--	--	--	--

8) CJKDv2=06886

Original bitmap for JK-65566 was 菱. This character originally has two sources, T and J, and original T glyph was adopted to represent this character (see CJK C2 v10 #17738). Later (i.e. CJK D v2.0) T-source was deleted and this character became J- single source, however BMP keeps T-glyph. Japan doesn't think this situation is a problem.

菱 06886	1031.381 艸 6 1				菱 JK-65566					
------------	----------------------	--	--	--	---------------	--	--	--	--	--

9) IRG N1572

In IRG N1572 HKSAR recommends updating BMP column with the revised bitmap for smooth review work, but Japan cannot agree on this idea. This column should keep the original bitmap so that inappropriate change of glyphs can be detected. In case of glyph modification needed, it is enough that submitters to show the changes clearly (as an IRG documents) and reviewer should be careful to the related documents.

This document explains or clarifies some G source characters in IRGN1552_CJK_V51 D sets. China requests IRG editorial group to accept them in the next version of M set, except that one of them can be unified.

Note: The name of “CJK_D” may be changed to “CJK_E” because “CJK_D” was used to name “Urgently Needed Characters” at WG2#54 in Dublin.

Question: SC=8?

Answer: SC=7. No. “𥓓” is considered 3 strokes since it is simplified form. Thus the SC of the character should be 7. Reference:

𥓓 音义未详。《雲笈七籤》卷六十五：“先以釜置鐵𥓓上。”

This is analogously simplified form of “𥓓”. Found in Volume 65 of Yunji Qiqian (雲笈七籤) and collected in page 4259 of Hanyu Da Zidian (漢語大字典).

Question: Unified? (J, IRGN1446)

Answer: Although the two characters have same meanings and pronunciation (pronounced “yuan”, means “low wall”), the left one is important for bronze sculpture characters study because the 2 glyphs are different enough for studying the evolution of Hanzi and for transliterating characters come up out of land. Answer: Yes, unified.

Regarding China's explanations and clarifications on some G-source characters in IRG N1552 CJK_D version 5.1 D Set, HK has a few observations to share with IRG Editors.

1. 09437

China's response:

09437 1421.061	饌		FS
	食		H:FS = 3 or 5
	7	1	

Question: FS=3 or 5? (H)

Answer: FS=3.

HK would like to point out that FS should be 1 according to item 13 in IRGN954AR and IRGN1105

Num	Shape	1st Stroke	count of Strokes	Variant Shapes
13			2	

2. 02597

China's response:

Question from: IRGN1552_DV51_D_Unify.pdf

CJK_D No.: 02597

Source: G_GH100437

 02597 G_GH100437	 U+2AA5
--	---

Answer: Yes, unified.

The second character is U+2AA56, not U+2AA5, as can be seen from

2AA56	 K5-01D2
-------	---

HK finds that the right components of the two glyphs are quite different.

There are three  (U+378C) in  02597, while there is one  (U+5B71) in  K5-01D2 (U+2AA56).

It is feared that a case of over-unification will result.
