Title:	Status of IRGN1552CJK_Dv51_D_Sets and Suggestions
Meeting:	IRG#31, Hong Kong, China
Actions required	To be discussed by IRG editors
Distribution:	IRG editors
Medium :	Electronic
Pages:	3

This document describes status of the so call CJK_Dv51 D sets, and gives my suggestions to IRG editors.

File Name: IRGN1549_Dv50_D_missing

Status:

This file contains 13 missing characters since CJK_Dv30, CJK_Dv40 to CJK_Dv51. All of them are M source and were requested to be added to M set by Macao SAR (IRGN1447). The IRG Editorial Group of IRG#31 agreed to accept them if they were not questioned.

Suggestion:

Move them back to next version of M set since no comments on them between IRG#31 and IRG#32.

File Name: IRGN1549_DV50_D_FromCJKC.pdf

Status:

There are 47 characters remained in this file so far, feedback is from China (IRGN1552_ChinaExplanation_D_sets.pdf) only between IRG#31 and IRG#32. Some G source characters had been already agreed by China to be unified to encoded ones, but confirmation from TCA or other IRG members.

Suggestion:

Keep them in the file till confirmation come from related IRG members.

File Name: IRGN1552_DV51_D_Attributes.pdf

Status:

This file contains various questions, Some of them had been answered by Vietnam.

- First stroke
- Stroke count (and KX index)

- KX index
- Radical
- Ordering

Suggestion:

- Characters with question on first stroke: to be moved back to M set after being rechecked by IRG Chief Editor.
- Characters with question on stroke count (and KX index): to be moved back to M set after being rechecked by IRG Chief Editor.
- Characters with question on KX index: to be moved back to M set after being rechecked by IRG Chief Editor.
- Characters with question on radical: Those with confirmation from submitters will be moved back to M set, others will be kept in D set.
- Characters with question on ordering: to be moved back to M set after being rechecked by IRG Technical Editor.

File Name: IRGN1552_DV51_D_DeletedCharacter.pdf

Status:

This file currently contains 4 characters deleted from previous versions of “CJK_D”.

Suggestion:

Update it in every round of review.

File Name: IRGN1552_DV51_D_Miscellaneous.pdf

Status:

- 1 U source character required to upgrade its font.
- 5 S source characters without clear evidences or fonts.
- 1 character with KP source but no G source.

Suggestion:

- 1 U source character required to upgrade its font: to be moved back to M set with upgraded font. (China would like to prepare a new font if UTC agrees.)
- 5 S source characters without clear evidences or fonts: to be moved to “Deleted Character List” of D set since clear evidences or fonts available.
- 1 character with KP source but no G source: to be moved to “Deleted Character List” of D set unless DPRK or China provides clear evidence in time.

File Name: IRGN1552_DV51_D_QUESTIONABLEGLYPH.pdf

Status:

Some characters should have been listed in “missing characters”, such as 10531, 10532 and 10533. (These characters were originally raised in IRGN1447.)

Some characters had been confirmed but not moved back to M set, such as 00071 and others listed in IRGN1501.

Suggestion:

The missing characters should be listed clearly and moved back to M set later. (The IRG Chief Editor and Technical Editor is requested to do it.) Other characters with glyph questions should be reviewed one by one.

The characters those had been confirmed (such as in IRGN1501) should be moved back to M set.

File Name: IRGN1552_DV51_D_Unify.pdf

Status:

Some comments should be rechecked by the submitters, for example:

 07326 G_CH301469	 U+4E1C
---	--

. This was commented in IRGN1446.

Suggestion:

All characters should be reviewed one by one.
