IRG N1597-Japan

This is review comments on IRG N1597 (CJK E v6.0) provided by Japan:

[J-source characters in D set]

Questionable Glyph

01214 JK-65077
03802 JK-58711
05524 JK-65430
05525 JK-65446
05803 JK-65464
07679 JK-65745
09842 JK-46469
10459 JK-66112

Attribute

04015 JK-65294
04117 JK-65330
08703 JK-65860
09864 JK-66047

All above characters are discussed and concluded at IRG #32, and recorded in IRG N1587(Editorial report) but mistakenly dropped from directions.

09838 JK-66028 Question to this glyph was already resolved and recorded in IRG N1551 (v5.1 directions)

05961 JK-65486 The problem was "G-source missing", so

JK-65486

should be set in M-set because no problem on JK-65486.

[Font upgraded]

There are 59-updated glyphs in this version and all of them are in M set.

However there are some questionable glyphs in this group.

Most of them

(except T-source glyphs) were included in D set in the previous version.

Japan request not to automatically move back such characters to M set

before confirmed by IRG editors.

00339 V04-4131 The first stroke of phonetic part of new glyph has horizontal stroke, not rightward stroke and this kind of shape is not listed in IRG N954AR.

FS=1 ?

00731 V04-424F The new glyph has 1-dot less. Str=14 ?

05429 TD-6050 Str=9 ?

07878 V04-5262 Two strokes are connecting at the top (right-upper part)

Is the new glyph correct ?

08431 UTC00791 In IRG N1535, UTC refers to Wikipedia for evidence of this

character. However, This glyph does not contain heart(-f).

Japan request

UTC re-check the evidence and this glyph. If the glyph shown in URL below,

Str should be 57.
