Dear IRG editors,

ISO 10646 2<sup>nd</sup> Edition CJK code chart was produced in whole at the end of WG2 Meeting No. 55 and we are instructed by WG2 to start the review process. Because some members have not submitted their member body's official fonts, the code charts are generated using unofficially submitted font such as Vietnam and TCA. However, this should serve as the first chart for us to start the review process.

As was discussed in WG2 Meeting No. 55, some member's fonts for the first edition of ISO 10646:2003 are changed due to some standardization in the member bodies country/region. Therefore, the review process will be very heavy. To help facilitate the review work at IRG Meeting No. 33 this month in Da Nang, I am requesting member bodies having their characters listed in the code chart to submit a preliminary review report on the correctness of characters in the code chart(IRGN 1616).

So, for members having characters shown with source references in the code chart please fill up the review report as explained below:

- (1) For characters in BMP which is correct but had minor difference compared to ISO 10646 Edition1, list the unifiable changes (This is not a error report, but just to alert members for review). This is also applicable to Ext B characters in the G column(China national body only). If such changes are due to standard revision, they need to be indicated.
- (2) All characters with incorrect glyphs which require correction before generating next version of the code chart
- (3) Missing characters(loss of source reference and glyph of character in the chart)
- (4) For a member body whose national/regional standard has been changed after Edition 1 was published), if your revision requires source reference mapping change(not unifiable glyph change to Edition 1), you need to list the new mapping information
- (5) Any other mistakes not listed from (1) to (4)

**Due time: Nov. 19, 2009**

Attached document is the template for the review report. Please add your member body label at the end of the file name when submitting it to me.

Thanks,

Lu Qin

Title: CJK Review Report of R.O.K (Nov. 2009)

Keywords: (none)

Position: Korea National Body

Short Description: This paper summarizes the review result on the fonts in K column in 10646 2nd ed. CD by the Korean Mirror Committee of IRG

Proposed Conclusion / Requested Action: None

Arguments / Text of Contribution: (none)

## **CJK Review Report of R.O.K**

1. The Korean Mirror Committee of IRG reviewed the fonts in K column in 10646 2nd ed. CD and drew up five lists of characters with change by comparing them with those in ISO 10646 1<sup>st</sup> ed.(the main contribution by Pyo Suhn-ja, Sin Sang-hyun, Kim Kyongsok) The number of characters in 10646 2ed CD whose glyphs are changed when compared to glyphs in 10646 1st ed., 2003, is 1004.

2. All of the following files contain a list drawn up according to each of the types proposed by Dr. Lu.

a) IRGN1617\_ROK\_k1840-11(type1)

This list contains 987 characters in BMP which are correct but had minor differences compared to ISO 10646 Edition1

b) IRGN1617\_ROK\_k1840-12(type2)

This list contains 12 characters with incorrect glyphs that require correction before generating next version of the code chart.

c) IRGN1617\_ROK\_k1840-13(type3)

This list contains 2 characters without glyph of character in the chart.

d) IRGN1617\_ROK\_k1840-14(type4)

No character is found for this type.

e) IRGN1617\_ROK\_k1840-15(type5)

This list contains 3 characters of which glyphs need to be improved. (They are not erroneous.)

|----------|------------------------------------------------------------------------------------------|
| Source:  | China                                                                                    |
| Title:   | Preliminary review result on ISO 10646 2 <sup>nd</sup> Edition CJK code chart from China |
| Status:  | Submit to IRG #33 for further discussion and action at IRG #33 at Da Nang, Vietnam       |
| Medium : | Electronic                                                                               |

According to the requirements in IRG document N1617, we conducted a preliminary review to G fonts for CJK Main Block and Extension A in ISO 10646 2<sup>nd</sup> Edition CD.

As listed in IRGN1617form1, there are 617 characters can be sorted to type1, and 6 characters be sorted to type2.

The result could not be precise because of the time limit, it's just for further discussion on IRG#33 meeting, Vietnam.

Nov.18<sup>th</sup>, 2009

Title: J-Glyphs modified

Source: Japan

44 J-glyphs in CJK C are modified from 10646 Amd.5. All modifications are unifiable ones as listed below.
