

ISO/IEC JTC 1/SC2/WG2/
Ideographic Rapporteur Group

Source / Contribution Identifier: Japan

Meeting: IRG#33 @ Da Nang, Viet Nam

Title: Progress report on Japan's unified ideographs addition

Keywords: (none)

Status: For your information

Short Description:

Proposed Conclusion / Requested Action: None

Arguments / Text of Contribution:

Following page shows list of characters that Japan will propose adding to the CJK unified ideographs based on the work about Japanese e-government system. Japan still continues working on the list to aims at the official proposal to IRG#34. Characters in the list are used for the proper nouns such as person's names so cannot show the evidences of actual situation of the use from the viewpoint of privacy protection, but Japan is going to prepare for the data of the reading.

404 characters are in the list, this number will be modified at the official proposal.

Information in the list are explained as below. See also 2.2 of IRG P&P document.

SourceID

IDs in this column are temporal for internal work and they are not correct format indicated in 2.2.3.a in the P&P document. They will be revised in the official proposal.

Glyph

KXI Rad

From 1(U+2F00) to 214(U+2FD5) with an additional 0 to indicate a traditional character.

Str

Stroke Count of the Non-radical Component.

T/S (Traditional/Simplifies index)

All '0' (=traditional). All of them are traditional characters used in Japanese e-government system although some look like simplified.

IDS

Similar

Similar character that are already encoded as CJK unified ideographs are shown although Japan thinks they can not be unified.
