

HKSAR's Font specification for IRG multicolumn code chart

The updated Hong Kong SAR font file [[Ming_20091002 \(PUA to cjk and ext abc\).ttf](#)] and the mapping table [[IRGN1639HKSCS.txt](#)] have been email to Mr. Michel SUIGNARD, Unicode technical editor and Ms. Wang Xiaoming, our IRG technical editor on 2009.11.30 and 2010.01.19 respectively.

Email acknowledgments were received confirming successful receipt of both files.

Summary of the font file and mapping table

The font file contains all 5,009 HKSCS characters in both ISO 10646 CJK code points and PUA.

The HKSCS (H-source) characters mapping to ISO 10646 CJK are as follow:

For characters in CJK Unified Ideographs

- 1st field: CJK Unified Ideograph Code Position
- 8th field: Hanzi H source

For characters in CJK Compatibility Ideographs

- 1st field: CJK Compatibility Ideograph Code Position
- 4th field: Hanzi H source
