Meeting:	34 th Meeting of the IRG in Nagaoka, Japan
Title:	Glyph Correction for four HKSCS characters submitted in Hong Kong SAR font file
Status:	Member Submission
Action Required:	For Members' Information

Background

In a recent review, we have found that four wrong glyphs have been mistakenly introduced in the HKSCS font file [Ming_20091002 (PUA to cjk and ext abc).ttf] submitted for the production of multi-column code charts.

The code points of these four characters are (H-9345 U+21303), (H-9AD1 U+20C8D), (H-9AD6 U+20D6F) and (H-8AB0 U+22D8D).

The correct glyphs of these four characters remain the same as shown in the last two columns in Annex 1 showing the glyphs in the published HKSCS-2001 and HKSCS-2004.

Correction

Revised font file will be submitted to WG2 project editor and IRG technical editor separately. Please accept our apologies for the error and refer to the revised font file for the correct glyph of these four characters.
