Dear Lu Qin

In http://www.unicode.org/~suignard/CJK Unified Ideographs
Extension B.pdf

I have no created a header page. But it should contain all
font fixes as provided by the following IRG members: China,
Taiwan (latest), ROK, HKSAR, and Vietnam, including the 17
UCS2003 glyph outline fixes requested by China (these do
not change the shapes). Few notes:

- I have also fixed the mapping info for 29974, 29984, and
2A13A. 29974 and 29984 also have glyph changes.

- I checked all the glyph changes visually. I would
recommend special attention to the following characters:

Vietnam

244C7, 243B2, 26113, 23784, 2438F, 26CBF, and 22A63

Taiwan

2051C, 20994, 20ABD, 20768 (the issue here is that now G
glyph seems different from others), 21552, 227C2, 23C87,
23E8F, 240D4, 253F0, 26E49, 29540

I am not an Ideograph expert so many of the remaining
glyphs difference are probably ok, but it is probably worth

for someone else to double check those.

All other fixes seemed ok by me.

The new chart was done purely by applying the new delta
fonts as overlay to the fonts used in the previous extb
chart, so regression risks are very minimal.

Michel

Title:	Consolidated Comments on IRGN1784 CJK_B Code Charts
Meeting:	
Status :	
Actions required	To be confirmed by IRG Editors
Distribution:	IRG
Medium :	Electronic
Page:	
Appendix:	6

This document contains comments from China, Japan, R.O.Korea, Vietnam and HKSAR, submitted by 2011-09-10.

Most comments from China, R.O.Korea, Vietnam and HKSAR are consolidated to Japan's comments as long as they are mentioned in Japan's comments.

Appendix:
1. Japan's comments and other members' same comments
2. China's comments
3. HKSAR's comments
4. Vietnam's comments
5. R.O.K's comments part 2 (Comments in part 1 are consolidated to Appendix 1)
6. Excel file of all comments (Not for review but reference for checking)

ISO/IEC JTC1/SC2/WG2/IRG N1784 Japan Feedback

Date: 2011-09-09

Source:	Japan
Title:	Feenback on the revised CJK B fonts
Meeting:	
Status :	
Actions required	To be consolidated by IRG Chief Editor for discussion at IRG #37
Distribution:	IRG
Medium :	Electronic
Page:	
Appendix:	Glyph revisions: IRG N1792, 1793, 1794, 1795, 1796 and 1798 Revised code chart with new font: IRG N1784 Editorial group reports: IRG N1775 (M36), N1745(M35)

As resolved in IRG M36.3, Japan has reviewed the revised fonts.

In M36.3 IRG resolved that:

- 2011-07-01: IRG members' chief editors submit all fonts updated since the Danang meeting with clear lists (PDF format) and source changes/removals to the UCS Project Editor and IRG Rapporteur. <u>If any font is not corrected as decided at IRG meetings, the explanations should be submitted simultaneously</u>.

but no such report was submitted. So Japan expects that all corrections recorded in the editorial group report should be processed. However, it looks so many glyphs are not processed yet.

IRG should remember that WG2 is planning to start FDIS of ISO/IEC10646 3ed with multicolumn-CJK B code chart on November. Because the next IRG meeting is also on November, it is likely that the discussion result cannot be reflected at the new code chart (because usually font correction takes 1-2 month at least). This means that ISO/IEC10646 3ed will contain so many errors in the code chart and this might cause users misunderstanding on the unification principles.

Japan is seriously worrying about this point and considering some solutions to discuss at the next meeting.

Part 1. Editorial issue

For G-column in IRG N1784, it looks that UCS2003 glyphs are printed for G-glyphs, and it is different from revised glyphs reported in IRG N1792. Japan expects this might be a simple mistake of WG2 editor.

Some examples are shown below:
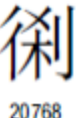

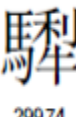

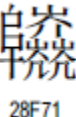

UCS	Glyph in IRG N1792	IRG N1784
U+261C5	繢	261C5 糸 120.15 繢 UCS2003 繢 GKX-0943.07 繢 T7-543E

Authors: PYO Sunh Ja, SHIN Sang-hyun & KIM Kyongsok (Rep. of Korea)

Date: 2011.09.11.

Status: NB position (Rep. of Korea)

Subject: ROK's "additional" comments for ExtB table generated on 2011-07-07

1. ROK checked whether font changes since Da Nang meeting are reflected correctly in ExtB table generated on 2011-07-07.
   - **ROK's review was based on the Editorial Group Reports IRG N1745 (2011.11.11.) and IRG N1775 (2011.04.12.)** shown below and ExtB table generated on 2011-07-07.

IRGN 1745 Appendix(P1, P2, P3, P4,P5, P6, P7)	Editorial Group Report	Editorial Group	2010.11.11

IRGN 1775 (Appendix Confirmed and posted on 08/05/11)	CJK Editorial Group Report	CJK Editorial Group	2011.04.12

– **Rep. of Korea noticed that many glyphs that IRG decided to change in IRG N1745 and N1775 are NOT mentioned at all in member bodies' reports IRG N1792, N1793, N1794, N1795, N1796, and N1798, which explains why ROKorea makes "additional" comments RE: ExtB Table generated on 2011-07-07.**

The following statement is a part of IRG resolution 36.3 (IRG N1770, 2011-04-15):

2011-07-01: IRG members' chief editors submit all fonts updated since the Danang meeting with clear lists (PDF format) and source changes/removals to the UCS Project Editor and IRG Rapporteur. **If any font is not corrected as decided at IRG meetings, the explanations should be submitted simultaneously.**

– **Please note that this feedback is in addition to the previous comments in document IRG N1784_ROKFeedback (=K2080): ExtB review comments sent on 2011-09-07.**

HKSAR's Response to the Consolidated Comments on IRG N1784 CJK Extension B Multi-column Code Charts

With regard to the review comments from the Republic of Korea (ROK) on two H-source characters, the Hong Kong Special Administrative Region (HKSAR) has the following response.

A. U+270D2

The comment made by the ROK:

UCS Code	Glyph in ExtB Table generated on 2011.07.07	Comment type
270D2	270D2 艸 140.17 縷 (UCS2003) 縷 (GKX-1069.21) 縷 (T7-5466) 縷 (H-8754)	Wrong glyph

Analysis

縷

1. The H-glyph H-8754 has been adopted by the Hong Kong Supplementary Character Set (HKSCS) since 2004:

HKSCS-2004	HKSCS-2008
8754 縷 270D2 F27A F27A	270D2 縷 F27A [F27A] (8754)

2. The H-glyph and the UCS-glyph differ over their lower right components:

UCS 2003	H-8754
縷 UCS2003	縷 H-8754

The components in question are listed as unifiable components on the List of

Unifiable Component Variations (UCV) of Ideographs in the IRG Working

Document Series (IWDS). Furthermore, 纏 (2F9B1), which has the same glyph

as 纏 (H-8754), is cited as a compatibility ideograph of 纏 (UCS2003):

No.	Criteria	References	Exceptions	Compatibles/Duplicates/Examples			
348	婁		05A41 21764 婁 婁	097/122 617A 慺 3-524B 3-5043	慺 2-4A36 2-4222	慺 1-5F43 1-6335	慺 2FBAA
	婁		06578 22FD9 數 數 03722 2184E 嫂 嫂	纏 27D02		纏 2F9B1	

[Source: IWDS_UCV36 p 89-102.pdf]

3. The component 婁 (U+5A41) of the H-glyph also conforms to the local glyph standard:

592	書 0000	8	婁 樓 簍 屢 數 撴 ······ 5A41* 6A13* 7C0D* 5C62* 6578* 64FB* 0001 0001 0001 0001 0001 0001

[Source: *Reference Guide on Song Style (Print Style) Character Glyphs for Chinese Computer Systems in Hong Kong*]

Response

4. The HKSAR confirms that the H-glyph 纏 (H-8754) is correct and unifiable with the

UCS-glyph 纏 (UCS2003).

B. U+27B06

The comment made by the ROK:

| UCS Code	Glyph in ExtB Table generated on 2011.07.07	Comment type
27B06		Wrong glyph

Analysis

5. The H-glyph has been adopted by the HKSCS since 1999:

HKSCS-1999	HKSCS-2001	HKSCS-2004	HKSCS-2008

6. The H-glyph and the UCS-glyph differ over their right components:

UCS 2003	H-9668

   According to Annex S of the ISO/IEC 10646:2011(E), the difference in overshoot at the stroke termination (S.1.5.b) is unifiable.

7. The List of UCV in IWDS provides another proof of unification for the components in question:

No.	Criteria	References	Exceptions	Compatibles/Duplicates/Examples
101	善 善			085/132 5584　善 善 善 善 善 ∣ 善 0-4948 1-6143 0-4131 0-603C 1-4F55 2F846 0-4138 1-6535 0-3317 0-6428 1-4753

[Source: IWDS_UCV36 p 22-24.pdf]

8. In *Lexical Items with English Explanations for Fundamental Chinese Learning in Hong Kong Schools* (ISBN 978-988-8019-29-8) published by the Education Bureau of the HKSAR Government, 善 (U+5584) is adopted as the standard form of the character:

1778 善
- **P** shàn
- **C** sin6〔羨〕

kind; charitable

善良	shànliáng	sin6 loeng4	1
	kind; good-hearted		
善款	shànkuǎn	sin6 fun2	1
	donation		
善意	shànyì	sin6 ji3	2
	goodwill; good intention		

Response

9. The HKSAR confirms that the H-glyph 譱 H-9668 is correct and unifiable with the UCS-glyph 譱 UCS2003 .

Hong Kong Special Administrative Region
September 2011

END

Authors: PYO Sunh Ja, SHIN Sang-hyun & KIM Kyongsok (Rep. of Korea)

Date: 2011.10.26.

Status: NB position (Rep. of Korea)

Subject: ROK's response to comments in IRG N1784 Consolidated comments for ExtB table generated on 2011-07-07

1. There are comments to three K characters in IRG N1784 Consolidated comments for ExtB table generated on
   2011-07-07

2. A Response to K glyphs for U203DD and 25566

UCS Code	Glyph in UCS 2003	Glyph in CD (2011.07.07.)	Comment type	Comment	Note	Comments from	Related IRG Members
203DD	偺 UCS2003	203DD 人 9.13 偺 UCS2003 偺 K4-008D	Wrong glyph	K glyph is the same as 50E3 偺		K	K
25566	礤 UCS-25566	25566 石 112.11 礤 UCS2003 礤 T5-562F 礤 K4-008A 礤 H-9BE5	Unification	Is K glyph appropriate to be unified?		K	K

- These two glyphs were wrong in CJK_ExtB_KR-v45 (k1863-3_CJK_ExtB_KR-v45-20100122_166chars).
- These two glyphs were corrected in CJK_ExtB_KR-v47 (k1997_2_ExtB_KR-v47_20101123_166chars.ttf)

and stayed unchanged in the next three versions:

    v48 (k1998_2_Hg11172_CJKmABCc18065_EUC_KR1084_v48TTF4c_20101223.ttf)
   v49 (k2022_2_Hg11172_CJKmABCc18065_EUC_KR1084_v49_20110307_tmp04.ttf)

   v50 (k2055_2_Hg11172_CJKmABCc18065_EUC_KR1084_v50_20110523.ttf)

- The two glyphs in v50 are shown below:

- Rep. of Korea hopes that these two glyphs will be corrected in the future version of CJK Extension B table by using one of the recent fonts (version v48 or later).

3. A Response to K glyphs for U2166B by Taiwan(T):

- There is no K glyph in U2166B.

- There seems an error in the process of consolidation.

- Korea made a comment RE: T glyph. (In other words, Taiwan did NOT made a comment RE: K glyph).

U+2166B	T	2166B 大 37.10 UCS2003 T6-5B72	J: glyph not revised K: One extra vertical bar of T glyph.	IRG N1775 table4-2.2(c)

UCS code	comments from		comments	comments to
2166b	k		One extra vertical bar of T glyph.	k

- The value 'k' in <comments to> column should read as 'T', not as 'k'.

ISO/IEC JTC1/SC2/WG2/**IRG N1748 COMMENTS**

Universal Multiple-Octet Coded Character Set
International Organization for Standardization

Doc Type: ISO/IEC JTC1/SC2/WG2/IRG

Title: IRG N1784 US/Unicode Feedback

Source: Dr. Ken Lunde (小林劍)

Status: Member Body Contribution

Action: For review by IRG

Date: 2011-11-05

Though it is brief, the US/Unicode would first wish to apologize for the extreme tardiness of this report.

The US/Unicode reviewed IRG N1784, primarily within the scope of the US/Unicode comments that were submitted for IRG N1707 (U+229B6 through U+2536B) and IRG N1748 (U+2536C through U+27D21), to confirm whether glyph issues that had been reported were fixed, and we hereby report the following:

- One serious glyph issue remains from our review of US/Unicode comments on IRG N1707, specifically that the T glyph for U+24C36 is unchanged, and remains the same as the glyph for U+24C53.
- Our review of US/Unicode comments on IRG N1748 indicated that all serious glyph issues have been fixed.

Note that the above comments exclude findings that have already been reported against IRG N1748 by other national bodies.

That is all.
