Ideographic Rapporteur Group

(IRG)

Source/Contribution Identifier :   Hong Kong Special Administrative Region, China

Title :   HKSAR HKSCS-2008 ExtB font change since IRG#35 Da Nang Meeting

1.   In Round 1 Review of Ext B Multi-column Code Chart, member reviewed that H-source character H-87CD (U+26E88 in Ext B) has shifted to right in printing position.

UCS Code	Glyph in UCS 2003	Glyph in CD	Comment type	Comment
26E88	冀 UCS-26E88	26E88 艸 140.12 冀 GKX-1056.16 冀 T7-3232 冀 H-87CD 冀 UCS-26E88	font format ? should be checked	The H glyph should be shifted to the left. (This seems a font problem and not a layout problem.)
ISO 10646 Project Editor to follow up—H will also follow up				

2.   HKSAR has corrected the advance width of the character U+26E88 and enclosed the HKSCS-2008 font with the change.

          Font name = Ming_HKSCS-2008_26E88
          File name   = Ming_20101118 (PUA to CJK and EXT-ABC) Delta.ttf
