

Universal Multiple-Octet Coded Character Set UCS

ISO/IEC JTC1/SC2/WG2/IRG N1824

Date: 2011-11-10

Source:	CJK editorial group
Title:	CJK Editorial Group Report
Meeting:	IRG#37, Mountain View, USA
Status :	To be Approved by IRG plenary
Actions required	To be followed by IRG members
Distribution:	IRG
Medium :	Electronic
Page:	6
Appendix:	2

Editors from China, Japan, R.O.Korea, TCA, Macao SAR, Vietnam, USA, Unicode Consortium and the UCS Project Editor met during IRG#37. The editors discussed the following issues:

1. CJK_B multi-column code charts Review

Reference:

- IRGN1784: Revised Ext. B Table(for IRG37 review to be available after July1,11), by the UCS Project Editor
- Consolidated Comments, based on reports from China, China, Japan, Korea, HKSAR and Vietnam
- Responses to the Consolidated Comments, by China, Vietnam, Unicode Consortium, TCA and HKSAR

(All files above can be obtained from the IRG web site, under the document number of IRGN1784)

- IRGN1820: Explanation for the Differences between UCS and Vietnam Sources, by Vietnam
- IRGN1812: Japan's concerns on the revised CJK B chart for 10646 3ed
- IRGN1828: CJK_B Code Charts For UCS Ed.3 FDIS, by the UCS Project Editor

The IRG editors reviewed and discussed all comments raised in the Consolidated Comments one by one with references of the Responses and IRGN 1820 (Vietnamese explanation on fonts), and drew conclusions. Solutions for All problems found in IRGN1784

(CJK_B code charts) were given. (See Appendix A)

With efforts of the UCS Project editor and help of the related IRG members, new CJK_B code charts (IRGN1828) were generated during IRG#37.

IRGN1812 (Japan's concerns) was considered after discussion of the Consolidated Comments, all editors agreed not to drop any glyphs, the new CJK_B code charts can be included in UCS Ed.3 FDIS for balloting as scheduled by WG2#58. It was considered an extraordinarily remarkable milestone for CJK_B work.

Some notes for unification / dis-unification / unification-exception and errata of UCS2003 were recorded. A draft report of these notes and errata was prepared by Mr. Satoshi YAMAMOTO. (See IRGN1838)

2. CJK_E Review

Reference:

- IRGN1779: CJK_Ev6.2, by the IRG Technical Editor, based on IRGN1634, IRGN1634 Appendix, IRGN1700, IRGN1700 Appendix, IRGN1745 and IRGN1775
- Feedbacks, by Japan, USA, Vietnam, HKSAR and the IRG Technical Editor

(All files above can be obtained from the IRG web site, under the document number of IRGN1779)

- IRGN1791: MSARG Font of Macao Characters Submitted to CJK Extension E, by Macao SAR
- IRGN1780: More Evidences for CJK_E evidences, by China
- Responses to IRGN1780, by Mr. Toshiya SUZUKI

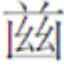

The IRG editors reviewed the TrueType fonts of Macao characters. The IRG Technical Editor confirmed that these fonts were already used in IRGn1779 (CJK_Ev6.2).

The IRGN1780 (More evidences of G characters of CJK_E) and Mr. Toshiya SUZUKI's responses were not reviewed at the meeting. The IRG editors agreed that China and Mr. SUZUKI would prepare a list of G characters (without convincing evidences) to be withdrawn from CJK_E by 2011-12-30.

The IRG editors reviewed all feedbacks to IRGN1779 (CJK_Ev6.2).

All important issues (unification / dis-unification, font error) were discussed and decided. A new version of CJK_E will be generated based on the discussion results. (For details of results, see Appendix B.)

- **REMAINING ISSUE:**

The character SN00588 (G_K06042.17)  was agreed (by the editorial meeting) to be coded in CJK_E rather than

unified to U+26C73 , and the J glyph

 of U+26C73 will be kept in CJK_B.

However, China and TCA proposed to move J4-7644 from U+26C73 to CJK_E. This proposal was postponed for more research.

Because the CJK_E work started before the development of IRG P&P, the already accepted characters in D set (during IRG#37) will be kept in CJK_E. All accepted characters (from the comments of CJK_Ev6.2) will be kept as an independent file, these characters will also be consolidated, with comments, to future M set for review. The future D sets (i.e., generated after IRG#37) will not be discussed for inclusion in CJK_E.

The IRG editors set the schedule of CJK_E review as below:

- 2011-12-30: China submits a list of withdrawn characters to the IRG Rapporteur and the IRG Technical Editor.
- 2012-01-13: The IRG Technical Editor distributes IRGN1829 CJK_Ev7.0 (M set, D set and an independent file containing characters that discussed and accepted during IRG#37) to IRG members' chief editors.

Review Round 1

- 2012-03-16: IRG members' chief editors submit review reports to the IRG Chief Editor.
- 2012-03-23: The IRG Chief Editor distributes consolidated comments on Attribute comments and significantly critical

comments to IRG members' chief editors and the IRG Technical Editor.

- 2012-03-30: The IRG Technical Editor distributes IRGN1830 CJK_Ev7.1 (M set, D set, a list of characters with Attributes comments) to IRG members' chief editors.

NOTE: The characters in M set with Attributes comments will be kept in M set; the characters in M set with significantly critical comments will be moved to D set.

TERMINOLOGIES:

- Attribute comments: comments on Radical, Stroke Count.
- Significantly critical comments: comments on Unification, Dis-unification, Duplication, other serious problems.

Review Round 2

- 2012-05-25: IRG members' chief editors submit review reports to the IRG Chief Editor.
- 2012-06-08: The IRG Chief Editor distributes consolidated comments on Attribute comments and significantly critical comments to IRG members' chief editors and the IRG Technical Editor.
- 2012-06-18: The IRG Technical Editor submits IRGN1731 CJK_Ev7.2 (M set, D set, a list of characters with Attributes comments of CJK_Ev7.0 and 7.1) to IRG#38.

NOTE: The characters in M set with Attributes comments will be kept in M set; the characters in M set with Critical comments will be moved to D set.

Discussion during IRG#38 (2012-06-18 to 22)

- IRG editors will fix all attribute problems in the list of characters with Attributes comments of CJK_Ev7.0 and 7.1.
- IRG editors will discuss font problems (minor glyph changes and font quality) and will decide if those characters with fixed glyphs can be kept in CJK_E.
- IRG sets the CJK_E submission (to WG2) date.

Format of review report

SN1	Image 1 from M set	SN2	Image 2 from M set	Comment Type (Unification / D i s - Unification / Duplication/ Radical / SC / Wrong glyph / Font Quality)	Comment	Note

3. CJK Future Extension

Reference:

- IRGN1813: Preliminary proposal to add CJK Unified ideographs, by Japan

The Japanese editor presented IRGN1813 for the need of more encoded CJK characters. The IRG editors agreed to start the next stage of CJK extension (temporarily named CJK_F) at IRG#39. All submissions should be subject to requirements in IRG P&P and be submitted to IRG#39. IRG members are encouraged to submit preliminary proposals before IRG#39 for information to IRG.

4. IRG P&P Issues

Reference:

- IRGN1781: R.O.Korea's proposal to add a section RE: a procedure for a horizontal extension, , by Prof. KIM Kyongsok
- IRGN1782: R.O.Korea's proposal for indicating relevant components of CJK characters in NB's comments/feedback, by R.O.Korea
- IRGN1777: Comments on WDS, by Prof. KIM Kyongsok
- IRGN1802: Maintaining links to the latest IDS data files in IRG home page, by Prof. KIM Kyongsok
- Responses to IRGN1802, by Mr. Taichi KAWABATA
- IRGN1823: IRG P&P Update

The updated IRG P&P was reviewed by IRG editors, some sentences were edited. An Item on CJK horizontal extension was added.

5. IRGWDS Issues

Reference:

- IRGN1826: comments RE: N1648 summary of IRGWDS, by Prof. KIM Kyongsok

The IRG editors reviewed IRGN1826 and instructed the IWD Editor to accordingly make revisions to IRGWDS.

6. R.O.Korea's CJK Horizontal Extension and Font

Reference:

- IRGN1811: A request of a horizontal extension of 155 Hanja chars for ROK, by R.O.Korea
- IRGN1819: Using V50 Font for CJK Chars in K Column of UCS, by R.O.Korea

The IRG editors reviewed IRGN1811 and IRGN1819. The editors understood the R.O.K.'s need of CJK horizontal extension, and agreed that R.O.K. use V50 font in the future.

7. IVD Issues

Reference:

- IRGN1788: IRG and IVD, by Unicode Consortium
- IRGN1783: Comments on issues raised in N4084(IVD of UTC), by UK/Mr. Andrew West

The IRG editors reviewed IRGN1788 and IRGN1783. The IRG considers that IVD registration for unified characters is a viable solution. However, IRG is not the appropriate body to be a registrant for IVD registration as IRG is not the holder of any unified characters nor were we instructed by WG2 to do so.

8. Source Reference for Adobe character

Reference:

- IRGN1825: Proposal to establish a "JADOBE" source for the kIRG_JSource field, by Dr. Ken Lunde

The IRG editors reviewed IRGN1825 and would like for its members to provide feedback to IRG one month before IRG#38.

5. China Evidences(IRGN1780)

No comments.

END

1. General

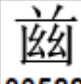

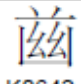

Before starting discussion on CJK E v6.2, IRG should remember history because the original document was issued five years ago and the review work was stopped from 2009. Japan expects that the work on CJK E is not well done yet.

CJK E candidate was first compiled as CJK D after IRG #26 (June, 2006) by collecting pending items of CJK C and some additions to CJK C2. IDss are generated and machine checking was done before IRG #28 (June, 2007). Worked for two years, the review of CJK E was stopped after IRG#33 to give priority to the work of multicolumn code chart review.

Therefore Japan expects the quality of v6.2 is not yet enough. It is necessary for the member bodies to pay attention to this enough on re-opening a work of CJK E.

Because there was no "directions" document published for v6.1 of CJK E, Japan understands all modifications from v6.1 were listed in IRG N1634 (editorial group report at the meeting #36). However there are some modifications that couldn't be traced. This is also a question.

2. Review comments on v6.2 of CJK E candidates
