1. Issues Related to Chinese Names of Taiwan Visitors

According to HKSARG Activity Report, the assignment of new code point *was not* necessary because the characters applied are considered unifiable with existing ISO/IEC10646 characters. And China at CJK-F is only going to submit characters of Square Zhuang Scrip (方塊壯字). There are a number of travelers from HK and China who need to apply for entry permits, and some characters of their names are not in the ISO/IEC 10646. Department of Taiwanese immigrants is required to create the characters for issuance, which causes inconvenience.

An example is shown as follows:

大陆居民   行证   T05   3

姓 名
葛 婧
GE XIAO

性 别   出生日期
女   1945   7日

身份证号码   有效期至
320   20   2017年

签发地点   签发日期
江苏   2012年

D<CHN LTRAKDI R

T051

TCA think this kind of case may happen in other member bodies. TCA want to seek views from IRG member bodies on whether there is a solution available for reference by TCA?
