Subject: Japan comments on CJK Ev8.0 (Re: [irgeditors] Fwd: CJK E OTHERS AND Excel

Dear Ms. Wang and Mr. Chen, cc IRG editors,

Japan reviewed CJK E v8.0 and have some questions as below.
Please check.

(1) There is no explanation on IRG N1877 and Japan wonders how to publish

CJK E draft for submission to WG2. I understand that:
both IRGN1877_CJK_E_V80_M.pdf and
IRGN1877_CJK_E_V80_M_Return.pdf
are candidates of CJK E and they will be merged into one file before submission.

I'm expecting that CJK E v8.1 will be a merged chart.

(2) V04-486a (03098)

I think IRG had discussion on V04-486a only about SC. But in IRG N1877,

the glyph shape is modified and non-unifiable change is made at the right-

upper part. This must be changed back.

(3) ZJW00209 (01814)

According to the editorial report of IRG#35 (IRG N1745), ZJW00209 was

concluded to remove from CJK E because of no source (wrong evidence).

CJK E v8.0 still keeps this character and this should be removed.

(4) ZJW00473(04195), ZJK01226(04465), ZJW00817(01607)

According to the editorial report of IRG#35 (IRG N1745), China is requested to

show "real evidences" of these three characters, but this is not done untill now.

So I think it is appropriate to remove these characters from CJK E draft.

Thanks,

I'm expecting that CJK E v8.1 will be a merged chart.

Ok.??I'll merge them together on next version. For
proofreading convenient, I separated them now.

HKSAR's Review Comments on CJK Extension E v8.0

The Hong Kong Special Administrative Region has reviewed CJK Extension E v8.0 (IRG N1877) M Return and has the following comments:

BMP D V20	Kxi Rad Stroke Fs	Source Glyph	Comment Type	Comment
穀 00944	0944.251 糸 12 1	穀 G_ZJW00792	First stroke	FS should be 2 (See the record of discussion on v7.0 (IRG N1864A1(R))).
姪 05941	0871.121 子 8 4	姪 G_ZJW00566	Kangxi index	KX should be 0280.051 (See the record of discussion on v7.0 (IRG N1864A1(R))).
番 08557	290.151 田 11 3	番 TD-6D5B	Kangxi index	KX should be 0766.181 (See the record of discussion on v7.0 (IRG N1864A1(R))).

2. With reference to the CJK Editorial Group Report of CJK Extension E (IRG N1864), the HKSAR proposes addition and removal of characters as follows:

- i. It was recorded in the report that given Vietnam's agreement to change all questioned radicals as suggested in the CJK Extension E comments list (see Vietnam's responses to IRGN1875), the editorial meeting agreed to accept all related characters with changes of radicals. The following characters should therefore be included in the M Return:

BMP D V20	Kxi Rad Stroke Fs	V Hz V Source	Return Note
𪚩 00049	1537.031	𪚩 V04-403E	Radical
	龍

	15 4		
𪚯 03679	0477.181	𪚯 V04-4A55	Radical
	文		
	11 1		

- ii. The report stated that after an inconclusive discussion on the stroke counts of components 𡗗 and 𡗘, the editorial meeting agreed to remove characters with these components (in CJK_Ev7.0 and v7.1 comments) from CJK Extension E. For the sake of consistency, it is proposed that the following characters should also be removed from the M-set pending conclusion on the stroke counts:

BMP D V20	Source Glyph	Kxi Rad Stroke Fs	Note
𡗗 00361	𡗗 UTC00385	$\frac{0118.051}{人}$ 12 2	The stroke count of the component 𡗗 is yet to be agreed by member bodies.
𡗘 00397	𡗘 TD-6749	$\frac{0121.061}{人}$ 15 3	Ditto
𡗙 00406	𡗙 V04-4146	$\frac{0121.211}{人}$ 16 2	Ditto

3. At IRG#38, the HKSAR requested that glyph 00342 be reinstated in the M-set as it had been removed due to a misquote in HKSAR's review comments on CJK Extension E v7.0 (M Set). The request was accepted by the editorial meeting and thus the character below should be included in the M Return.

𡗚	0116.041			𡗚
	人			
00342	11 1			TD-353D

Subject: [irgeditors] ROK has no comments on CJK_E v.8.0

Dear Dr LU & editors,

ROK has no comments on CJK_E v.8.0 (IRGN1877) other than
the comments on CJK_E v.7.x.

Thanks.

? ?? KIM, Kyongsok

This character is missing in CJK_Ev8.0.

SC should be kept 27, because “象” is counted 12 as agreed at IRG#38. The sc of character is wrongly changed to 26 in CJK_Ev8.0.
