ISO/IEC JTC1/SC2/WG2/IRG N1921_ROK_src_ref
Doc. #: Korea JTC1/SC2 K2191_25

Korea JTC1/SC2, Committee on Character Codes

Author: KIM, Kyongsok, Chairperson of Korea JTC1/SC2
Date: 2013.05.10.
Status: National Body Position, Rep. of KOREA
Subject: showing source references in review comments

1. As you can see in the IRG N1921 consolidated comments for ExtF, some images are shown WITH source references while some images are shown WITHOUT source references.
  - In preparing responses to other MBs' review comments mentioned in IRG N1921 consolidated comments for ExtF, it is easy to find characters with source reference "KA-KCxxxxx" to which ROK should prepare a response.

IRGN1921_ConsolidatedComments

Table 5: Stroke Count

SN1	Image 1	SN2	Image 2	Type	Comment	Note	Comment from
00013	冊 JMJ-056828			SC	G: 5. The second stroke should be vertical rather than turning. H: SC = 5 Reference: 5E36 帶 帶 帶 帶 帶 帶	H: Original attributes:	G,H
00056	00056			SC	SC = 9	source references SHOWN	H
00084	暢 JMJ-059301			SC	12	source references NOT shown	G,H
00087	Z_SAT80003			SC	16		G
00095	00095			SC	SC = 14 #40 of IRGN 954AR & IRGN 1105		H

- However, for characters without source references (e.g., for seq. no. 00056 and 00095), one must look up IRGN1921_P1 ~ P7 files to figure out whether ROK submitted these characters.

CJK_F v1.0 Seq. No.	Rad Stroke Fs	G Hz G Source	J Hz J Source	K Hz K Source	Sat Hz Sat Source
龘 00056	一 10 2		龘 JMJ-056846		
龖 00095	丶 13 1	龖 G_Z2271301			

Now we know that char. 00056 was submitted by Japan and 00095 by China and, therefore, ROK need not prepare a response.

The problem is: it takes much time to look up IRGN1921_P1 ~ P7 files to figure out which MB submitted these characters.

2. Analysis of MBs' Comments forms

2.1 ROK's comments show source references

SN1	Image 1	SN2	Image 2	Comment Type (Unification / Dis-Unification / Duplication/ Radical / SC / Wrong glyph / Font Quality)	Comment	Note
00002	才 JMJ-056820	U+624D	624D 手 64.0 才 G0-3245 才 T1-445F 才 J0-3A4D 才 K0-6E26 才 V1-5647	Unification		
00004	兀 JMJ-059294	U+5140	5140 儿 10.1 兀 G0-5823 兀 T1-4442 兀 J0-513A 兀 K0-6834 兀 V1-4C36	Unification	119 儿 兀 兀 (JIS X 0213-69) 儿	= 00614

2.2 China's comments show source references

SN1	Image 1	SN2	Image 2	Comment Type	Comment	Note
00004	兀 JMJ-059294	00614	兀 Z_SAT60025	Unification		
00030	弗 JMJ-059299	U+2B741	弗 JH-JTAD0F	Unification		Just for confirmatio
00077	夂 Z_SAT60045	00109	夂 JMJ-056861	Unification	Should be unified, and radical should be as that for 00109.	

2.3 Most of Japan's comments show source references; however, some NOT

05825	罟 05825			SC	SC=8
05826	罱 05826			SC	SC=8
06129	甩 06129			SC	SC=0
00854	牢 G_CY0172	01863	宰 G_CY0172	wrong source	G_CY0172 duplicates
03133	眩 G_CY1579	07573	鏡 G_CY1579	wrong source	G_CY1579 duplicates

2.4 Hong Kong's comments do NOT show source references

HKSAR's Review Comments on CJK Extension F v1.0

The Hong Kong Special Administrative Region has reviewed p. 1-300 of CJK Extension F v1.0 (IRG N1921) and has the

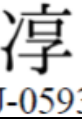

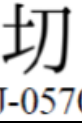

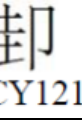

SN1	Image 1	SN2	Image 2	Comment Type (Unification / Dis-Unification / Duplication/ Radical / SC / Wrong glyph / Font Quality)	Comment
00004	冗 00004	00614	冗 00614	Duplication	
00013	冊 00013			SC	SC = 5 Reference: 5E36 帶 帶 帶 帶 G1-3478 HB1-B161 T1-5A27 J0-5668

3. A suggestion

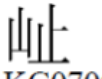

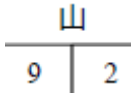

- ROK suggests that MBs include source references in review comments (instead of showing only seq. nos.) so that MBs can easily figure out to which comments/characters they need to prepare responses.

Doc. #: Korea JTC1/SC2 K2191_26

Korea JTC1/SC2, Committee on Character Codes

Authors: SHIN, Sanghyun; CHO, Sungduk; KIM, Kyongsok
Date: 2013.05.21.
Status: National Body Position, Rep. of KOREA
Subject: Comments RE: four JMJ chars (seq. no. 00498, 00500, 00501, 00518)

1. Background

- The four characters whose sequence numbers are 00498, 00500, 00501, and 00502 in Table 7: Glyph and Font (IRGN1921UpdatedComments_Table7.pdf) are shown below.

00498	 JMJ-058412	00501	 JMJ-059343
00500	 JMJ-058413	00518	 JMJ-059347

- ROK suggests not to encode these four characters.

2. ROK's analysis of the four chars.

- ROK considers that those four characters are derived/modifed as follows:

2.1 orignal char -> cursive form (行書) or handwriting -> print (block) form 行書의 楷書化

original char		cursive form (行書) or handwriting		print (block) form (楷書化)
與	⇨	㚔 JMJ-058412	⇨	㚔 JMJ-058413
與	⇨		⇨	㚔 JMJ-059343

- **Problems**: In general, several cursive forms could be derived from the ONE original char; furthermore, several print (block) forms could be derived from EACH cursive form. Therefore, in general, tens of print (block) forms could be derived from ONE original char.

2.2 Simplification (簡化): original form -> simplified form

original char simplified form

與 ⇨ 㑩 JMJ-059347

- In case of Chinese Simplified char, there is a "fixed and stable" correspondence between Traditional and Simplified chars.
- **Problems**: However, in general, several (or even tens of) simplified forms could be derived from the ONE original char depending on which part to simplify and how much to simplify.

3. Relevant sample data from Taiwan

- 中華民國教育部 異體字字典 : http://dict.variants.moe.edu.tw/
  The search result for '與' in the dictionary is shown below:

4. ROK's questions

4.1 Does IRG really want to encode all the variants in UCS?

- Which of them can be encoded in UCS and which cannot?
- Can IRG set up rules as to which of them can be encoded in UCS and which cannot so that IRG and experts in general can accept such rules?

4.2 In principle, it is desirable to minimize the number of variant chars encoded in UCS.

- Specifically, it seems that the four JMJ chars can be unified with 與(U8207).

4.3 This discussion is NOT just about four chars.

- If IRG should allow these four JMJ chars to be encoded in UCS, then hundreds of or thousands of (or even more than 10,000) variants chars may have to be encoded in the future.
- Is it desirable?
- Does IRG really want to see such a chaotic situation happen?

4.4 Furthermore, if we encode lots of variants in UCS, then,

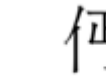

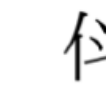

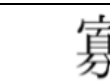

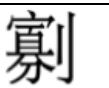

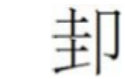

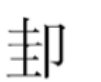

- users will have difficulty in choosing the correct(?) one among several similarly looking variants; and
- many existing search systems won't work well.
- It is contrary to the VERY basic idea of CJK Unification.
- It implies that information interchange becomes harder and inefficient.

4.5 ROK will probably submit further feedbacks with more relevant data in the future.

SAT Feedback to the review comments
Source: SAT Committee
Date: 2013-5-18
Reference: IRGN1921
Meeting: IRG #40

We would like to thank for reviewing our characters. We checked the reviews, then, (1) agree to the suggestion of unification with the characters which are represented by other source ID or the UCS code point in the following list, (2) need further discussion, and (3) would like to encode the characters separately.

(1) Agree to the suggestion of unification.

SAT Feedback to the review comments (radical, stroke, and first stroke)
Source: SAT Committee
Date: 2013-5-19
Reference: IRGN1921
Meeting: IRG #40

We would like to thank for reviewing our characters. We checked the reviews, then, we think (1) accept the suggestion and (2) need further discussion.

(1) Accept the suggestion.

Radical (Accept):

Table 7:

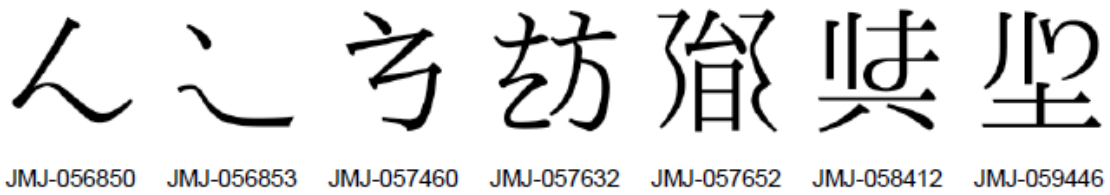

Japan national body requests Korea to withdraw comments in IRGN1921 Table7 on JMJ-057632, JMJ-057652 and JMJ-058412.

Korean comments on these characters was discussed in IRG #39, and already resolved to accept with request to WG2 to add some appropriate notes.

Father comments are welcomed if there are new discussions rather than the discussion IRG had.

Details of the discussion is as follows:

Japan itself had submitted "IRG N1907 (Consideration on the cursive like shape) " concerning following submissions.

IRG editorial group concluded this issue in IRG #39 as follows (IRG N1896):

2.3 Typeface of Font and Acceptance of Ideographs with Cursive-like Shape

References:

- IRGN1914 Requirement of the Submission of Song or Ming -ti Glyph Images to CJK Ext. F
- IRGN1907 Ideographs with Cursive-like Shape

The editorial group reviewed IRGN1914 and emphasized again that Song or Ming-cho style fonts are mandatory for CJK submission.

The editorial group discussed and accepted IRGN1907. The editorial group also noticed that the mentioned 7 characters were proposed to CJK_F in IRGN1882. The editorial group suggested to add a note in UCS, saying that this typeface (especially

JMJ-057632  JMJ-057632) is exception of Song/Ming-cho style.

Note: IRG editorial group confirmed the purpose described in IRG N1907, and concluded to accept JMJ-057652  JMJ-057632 as a part of Japan proposal to CJK extension F, although it looks different style from Song/Ming design.
This does not mean to modify the requirement for glyph written in IRG PnP and the future submitter are requested to explain their situation, if same cases happened.

All other glyph shapes listed in IRG N1907 can be recognized as Song/Ming style.

(IRG requests UCS project editor to explicitly make appropriate note in appropriate place to avoid needless misunderstanding.)

IRG plenary meeting also resolved this issue unanimously as follows (IRG N 1910):

Resolution IRG M39.4: Cursive like stroke shapes on the proposed glyph (IRGN1907)

Unanimous

The IRG editorial group reviewed IRG N1907. Characters shown in the documents are reviewed and all of them are accepted as Song/Ming styles that IRG PnP request with one exception. Considering the importance of the purpose, IRG also accepts JMJ-057632 with recording note in the editorial group report.
