Status Report of UCV Update (2013/05/23)

After IRG#38 (Gyeongju, ROK), the comments to update the UCV list were given by Korea and Hong Kong.

The comments by Korea are mainly the clarification of the terms and layout for the hardcopy users. Because UCV list was originally designed for the softcopy readers and its source data is not for the fixed layout document, the improvements for the layout issues will spend more time. Currently, followings are planned.

- MUI will be prepared for contents of IRG N1928
- Documents to describe HYDCD, JIS X 0213, SCS will be attached.
- For some characters in NUC, SuperCJK excerpt will be prepared.
- Attempt to insert page breaks between subsections.
- Attempt to put head lines to each page.
-

The comments by Hong Kong are mainly the detailed review to eliminate the confusing examples in the UCV list. The Hong Kong comments could be classified into 4 types;

- A) Example should be shown by multicolumn chart
The UCV list had ever printed with the CJK fonts installed on the technical editor's computer. Sometimes the glyph of the font was different from the referential glyphs in the UCS code chart. Considering that the latest UCS code chart is printed by the scalable fonts, Hong Kong proposed to update the examples by the images clipped from the latest UCS chart.
- B) Confusing example should be removed.
Some fonts or the images clipped from UCS code charts do not show the glyphic difference for the given UCV. Hong Kong proposed to remove such examples.
- C) No unification example is shown.
Some UCV rules have no examples of the unification although the exceptional disunification examples are shown. It is confusing and required to be updated.
- D) UCV picture should be corrected or added.
Some UCV pictures (showing the component shape, in the most left column in the list) are duplicated, or, different from the shape in the examples. They should be updated for the consistency.

All comments type A) are accepted and updated, because all examples are now shown by the images clipped from UCS code chart.

Most comments type B) are accepted and updated. However, several examples are arguable whether they are suitable or not, and kept as they were.

The dispositions to the comments type C) are classified into 2 types; one is no action because the unification rule is as a reversal of the "source code separation" in Annex S. Another is no action because the UCV is thought to be applied before the submission to IRG, in the internal of the member bodies. Of course, further investigations are needed to collect for latter cases.

All comments type D) are accepted and now being updated.

The current status summary is following:

status	proportions
Done	158/253 (~62%)
No action	60/253 (~24%)
Source code separation	29/253 (~11%)
Work in progress	6/253 (~ 2%)

Following is a table to summarize the current status of the dispositions to the Hong Kong comments.

Cmt#	Date	UCV#	Comment Type	Status (2013/04/22, Thu)
1	2012/08/15	UCV#004	UCV Picture should be added.	Done
2	2012/08/15	UCV#005	UCV Picture should be added.	Done
3	2012/08/15	UCV#008	Example should be shown by multicolumn chart.	Done
4	2012/08/15	UCV#008	Example should be shown by multicolumn chart.	Done
5	2012/08/15	UCV#013	No unification example is shown.	Shown by Source Code Separation.
6	2012/08/15	UCV#015	No unification example is shown.	Shown by Source Code Separation.
7	2012/08/15	UCV#017	No unification example is shown.	Shown by Source Code Separation.
8	2012/08/15	UCV#018	UCV Picture should be corrected.	Done
9	2012/08/15	UCV#023	Example should be shown by multicolumn chart.	Done
10	2012/08/15	UCV#027a	Example should be shown by multicolumn chart.	Done
11	2012/08/15	UCV#027a	Example should be shown by multicolumn chart.	Done
12	2012/08/15	UCV#028	No unification example is shown.	Shown by Source Code Separation.
13	2012/08/15	UCV#030	Confusing example should be removed.	Done
14	2012/08/15	UCV#032	UCV Picture should be added.	Done
15	2012/08/15	UCV#032	Confusing example should be removed.	Shown by Source Code Separation.
16	2012/08/15	UCV#032	Example should be shown by multicolumn chart.	Done
17	2012/08/15	UCV#036	Confusing example should be removed.	No action yet.
18	2012/08/15	UCV#038	UCV Picture without example should be removed.	No action yet.
19	2012/08/15	UCV#039	Example should be shown by multicolumn chart.	Done
20	2012/08/15	UCV#041	No unification example is shown.	Shown by Source Code Separation.
21	2012/08/15	UCV#042	Example should be shown by multicolumn chart.	Done
22	2012/08/15	UCV#044	Example should be shown by multicolumn chart.	Done
23	2012/08/15	UCV#046	Example should be shown by multicolumn chart.	Done
24	2012/08/15	UCV#047	UCV Picture should be added.	Done
25	2012/08/15	UCV#048	UCV Picture should be added.	Done
26	2012/08/15	UCV#050	Confusing example should be removed.	Done
27	2012/08/15	UCV#051	No unification example is shown.	No action yet.
28	2012/08/15	UCV#053	Example should be replaced.	Done
29	2012/08/15	UCV#053	Confusing example should be removed.	Done
30	2012/08/15	UCV#053	UCV Picture should be added.	Done

31	2012/08/15	UCV#053	Example should be shown by multicolumn chart.	Done
32	2012/08/15	UCV#054	Confusing example should be removed.	Done
33	2012/08/15	UCV#055	Example should be moved to another UCV.	No action yet.
34	2012/08/15	UCV#055	Confusing example should be removed.	No action yet.
35	2012/08/15	UCV#055	Example should be shown by multicolumn chart.	Done
36	2012/08/15	UCV#055	UCV Picture should be added.	Done
37	2012/08/15	UCV#056	No unification example is shown.	No action yet.
38	2012/08/15	UCV#057	Confusing example should be removed.	Done
39	2012/08/15	UCV#057	Example should be shown by multicolumn chart.	Done
40	2012/08/15	UCV#060	UCV Picture should be added.	Done
41	2012/08/15	UCV#060	Confusing example should be removed.	Done
42	2012/08/15	UCV#063	Example should be shown by multicolumn chart.	Done
43	2012/08/15	UCV#063	No unification example is shown.	No action yet.
44	2012/08/15	UCV#066	No unification example is shown.	No action yet.
45	2012/08/15	UCV#067	Confusing example should be removed.	Done
46	2012/08/15	UCV#076	Confusing example should be removed.	Done
47	2012/08/15	UCV#076	No unification example is shown.	No action yet.
48	2012/08/15	UCV#079	No unification example is shown.	No action yet.
49	2012/08/15	UCV#085	No unification example is shown.	Shown by Source Code Separation.
50	2012/08/15	UCV#092	Confusing example should be removed.	Done
51	2012/08/15	UCV#093	Example should be shown by multicolumn chart.	Done
52	2012/08/15	UCV#096	Example should be added.	Done
53	2012/08/15	UCV#096	Confusing example should be removed.	Done
54	2012/08/15	UCV#096	Confusing example should be removed.	No action yet.
55	2012/08/15	UCV#096	Example should be shown by multicolumn chart.	Done
56	2012/08/15	UCV#098	UCV Picture should be added.	Done
57	2012/08/15	UCV#099	No unification example is shown.	No action yet.
58	2012/08/15	UCV#109	No unification example is shown.	No action yet.
59	2012/08/15	UCV#112	UCV Picture should be corrected.	Done
60	2012/08/15	UCV#112	UCV Picture should be added.	Work in progress.
61	2012/08/15	UCV#112	Example should be shown by multicolumn chart.	Done
62	2012/08/15	UCV#116	Confusing example should be removed.	Done
63	2012/08/15	UCV#117	UCV Picture should be added.	Work in progress.
64	2012/08/15	UCV#118	No unification example is shown.	Shown by Source Code Separation.

65	2012/08/15	UCV#119	Example should be shown by multicolumn chart.	Done
66	2012/08/15	UCV#121	Confusing example should be removed.	Done
67	2012/08/15	UCV#123	Example should be replaced.	Done
68	2012/08/15	UCV#126	Example should be added.	Done
69	2012/08/15	UCV#129	Example should be added.	Done
70	2012/08/15	UCV#130	Example should be added.	Done
71	2012/08/15	UCV#132a	Example should be added.	Done
72	2012/08/15	UCV#132a	Confusing example should be removed.	Done
73	2012/08/15	UCV#134	Confusing example should be removed.	No action yet.
74	2012/08/15	UCV#136	No unification example is shown.	No action yet.
75	2012/08/15	UCV#139a	Example should be added.	Done
76	2012/08/15	UCV#140	Confusing example should be removed.	Done
77	2012/08/15	UCV#140	Example should be shown by multicolumn chart.	Done
78	2012/08/15	UCV#145	Example should be added.	Done
79	2012/08/15	UCV#148	Confusing example should be removed.	Shown by Source Code Separation.
80	2012/08/15	UCV#152	Example should be shown by multicolumn chart.	Done
81	2012/08/15	UCV#153	UCV Picture should be added.	Done
82	2012/08/15	UCV#155	Example should be shown by multicolumn chart.	Done
83	2012/08/15	UCV#157	Example should be added.	Done
84	2012/08/15	UCV#159	Example should be added.	No action yet.
85	2012/08/15	UCV#161	No unification example is shown.	Shown by Source Code Separation.
86	2012/08/15	UCV#164	No unification example is shown.	Shown by Source Code Separation.
87	2012/08/15	UCV#165	No unification example is shown.	Shown by Source Code Separation.
88	2012/08/15	UCV#166	Example should be added.	Done
89	2012/08/15	UCV#167	No unification example is shown.	No action yet.
90	2012/08/15	UCV#168	Confusing example should be removed.	Done
91	2012/08/15	UCV#169	Example should be added.	Done
92	2012/08/15	UCV#171	No unification example is shown.	No action yet.
93	2012/08/15	UCV#172	Example should be shown by multicolumn chart.	Done
94	2012/08/15	UCV#173	UCV Picture should be corrected.	Done
95	2012/08/15	UCV#173	Example should be added.	Done
96	2012/08/15	UCV#174	Example should be shown by multicolumn chart.	Done
97	2012/08/15	UCV#175	Example should be added.	Done

98	2012/08/15	UCV#177	UCV Picture should be added.	Done
99	2012/08/15	UCV#177	UCV Picture without example should be removed.	Done
100	2012/08/15	UCV#177	Example should be shown by multicolumn chart.	Done
101	2012/08/15	UCV#179	Example should be shown by multicolumn chart.	Done
102	2012/08/15	UCV#180	Example should be shown by multicolumn chart.	Done
103	2012/08/15	UCV#181	UCV Picture should be corrected.	Done
104	2012/08/15	UCV#181	Example should be shown by multicolumn chart.	Done
105	2012/08/15	UCV#182	Example should be shown by multicolumn chart.	Done
106	2012/08/15	UCV#185	Confusing example should be removed.	Done
107	2012/08/15	UCV#186	Example should be shown by multicolumn chart.	Done
108	2012/08/15	UCV#187	UCV Picture should be added.	Done
109	2012/08/15	UCV#188	No unification example is shown.	No action yet.
110	2012/08/15	UCV#193	Single example is shown twice.	No action yet.
111	2012/08/15	UCV#193	Example should be added.	Done
112	2012/08/15	UCV#194	Confusing example should be removed.	Done
113	2012/08/15	UCV#194	Example should be shown by multicolumn chart.	Done
114	2012/08/15	UCV#197	UCV Picture should be added.	Done
115	2012/08/15	UCV#197	Example should be shown by multicolumn chart.	Done
116	2012/08/15	UCV#199	Confusing example should be removed.	No action yet.
117	2012/08/15	UCV#202	UCV Picture should be corrected.	No action yet.
118	2012/08/15	UCV#202a	Example should be shown by multicolumn chart.	Done
119	2012/08/15	UCV#203	Example should be shown by multicolumn chart.	Done
120	2012/08/15	UCV#204	Confusing example should be removed.	Work in progress.
121	2012/08/15	UCV#206	No unification example is shown.	No action yet.
122	2012/08/15	UCV#214	Example should be shown by multicolumn chart.	Done
123	2012/08/15	UCV#215	No unification example is shown.	No action yet.
124	2012/08/15	UCV#216	Confusing example should be removed.	Done
125	2012/08/15	UCV#217	No unification example is shown.	No action yet.
126	2012/08/15	UCV#218	Example should be shown by multicolumn chart.	Done
127	2012/08/15	UCV#220	No unification example is shown.	No action yet.
128	2012/08/15	UCV#222	UCV Picture should be added.	Done
129	2012/08/15	UCV#223	UCV Picture should be added.	Done
130	2012/08/15	UCV#224	UCV Picture should be added.	Done
131	2012/08/15	UCV#226	No unification example is shown.	No action yet.
132	2012/08/15	UCV#228	Example should be shown by multicolumn chart.	Done

133	2012/08/15	UCV#232	Example should be shown by multicolumn chart.	Done
134	2012/08/15	UCV#235	UCV Picture should be corrected.	Done
135	2012/08/15	UCV#239	Confusing example should be removed.	Done
136	2012/08/15	UCV#239	Single example is shown twice.	Done
137	2012/08/15	UCV#242	UCV Picture should be added.	Done
138	2012/08/15	UCV#242	Example should be shown by multicolumn chart.	Done
139	2012/08/15	UCV#243	Confusing example should be removed.	Done
140	2012/08/15	UCV#244	No unification example is shown.	No action yet.
141	2012/08/15	UCV#245	UCV Picture should be added.	Done
142	2012/08/15	UCV#246	UCV Picture should be added.	Done
143	2012/08/15	UCV#247	Example should be shown by multicolumn chart.	Done
144	2012/08/15	UCV#249	No unification example is shown.	Shown by Source Code Separation.
145	2012/08/15	UCV#250	Confusing example should be removed.	Done
146	2012/08/15	UCV#252	Confusing example should be removed.	Done
147	2012/08/15	UCV#252	Confusing example should be removed.	Done
148	2012/08/15	UCV#255	Example should be shown by multicolumn chart.	Done
149	2012/08/15	UCV#260	No unification example is shown.	Shown by Source Code Separation.
150	2012/08/15	UCV#267	No unification example is shown.	Shown by Source Code Separation.
151	2012/08/15	UCV#269	No unification example is shown.	No action yet.
152	2012/08/15	UCV#270	Example should be shown by multicolumn chart.	Done
153	2012/08/15	UCV#271	No unification example is shown.	Shown by Source Code Separation.
154	2012/08/15	UCV#272	Example should be shown by multicolumn chart.	Done
155	2012/08/15	UCV#276	UCV Picture should be added.	Done
156	2012/08/15	UCV#278	Confusing example should be removed.	Done
157	2012/08/15	UCV#279	UCV Picture should be added.	Done
158	2012/08/15	UCV#279	No unification example is shown.	No action yet.
159	2012/08/15	UCV#282	UCV Picture should be added.	Done
160	2012/08/15	UCV#285	No unification example is shown.	Shown by Source Code Separation.
161	2012/08/15	UCV#290	No unification example is shown.	Shown by Source Code Separation.
162	2012/08/15	UCV#291	UCV Picture should be added.	Done
163	2012/08/15	UCV#292	Example should be added.	Done
164	2012/08/15	UCV#293	No unification example is shown.	No action yet.

165	2012/08/15	UCV#298	No unification example is shown.	No action yet.
166	2012/08/15	UCV#298b	Example should be shown by multicolumn chart.	Done
167	2012/08/15	UCV#299	Example should be added.	Done
168	2012/08/15	UCV#302	Example should be shown by multicolumn chart.	Done
169	2012/08/15	UCV#303	No unification example is shown.	No action yet.
170	2012/08/15	UCV#313	Example should be shown by multicolumn chart.	Done
171	2012/08/15	UCV#315	Example should be shown by multicolumn chart.	Done
172	2012/08/15	UCV#318	Confusing example should be removed.	Shown by Source Code Separation.
173	2012/08/15	UCV#318	No unification example is shown.	Shown by Source Code Separation.
174	2012/08/15	UCV#319	Example should be shown by multicolumn chart.	Done
175	2012/08/15	UCV#320	Example should be shown by multicolumn chart.	Done
176	2012/08/15	UCV#322	No unification example is shown.	No action yet.
177	2012/08/15	UCV#324	UCV Picture should be added.	Done
178	2012/08/15	UCV#324	Example should be shown by multicolumn chart.	Done
179	2012/08/15	UCV#326	No unification example is shown.	Shown by Source Code Separation.
180	2012/08/15	UCV#329	UCV Picture should be corrected.	Done
181	2012/08/15	UCV#330	No unification example is shown.	Shown by Source Code Separation.
182	2012/08/15	UCV#331	No unification example is shown.	Shown by Source Code Separation.
183	2012/08/15	UCV#339	Single example is shown twice.	Done
184	2012/08/15	UCV#342	No unification example is shown.	No action yet.
185	2012/08/15	UCV#348	Confusing example should be removed.	Done
186	2012/08/15	UCV#348	Example should be shown by multicolumn chart.	Done
187	2012/08/15	UCV#349	UCV Picture without example should be removed.	No action yet.
188	2012/08/15	UCV#350	No unification example is shown.	No action yet.
189	2012/08/15	UCV#352a	No unification example is shown.	No action yet.
190	2012/08/15	UCV#353	No unification example is shown.	No action yet.
191	2012/08/15	UCV#354a	Example should be shown by multicolumn chart.	Done
192	2012/08/15	UCV#355	Example should be moved to another UCV.	Done
193	2012/08/15	UCV#355	UCV Picture should be added.	Done
194	2012/08/15	UCV#355	Example should be shown by multicolumn chart.	Done
195	2012/08/15	UCV#359	Confusing example should be removed.	Done
196	2012/08/15	UCV#360	UCV Picture without example should be removed.	No action yet.

197	2012/08/15	UCV#361	UCV Picture should be corrected.	Done
198	2012/08/15	UCV#362	Example should be shown by multicolumn chart.	Done
199	2012/08/15	UCV#363	No unification example is shown.	Shown by Source Code Separation.
200	2012/08/15	UCV#364	No unification example is shown.	No action yet.
201	2012/08/15	UCV#366	No unification example is shown.	No action yet.
202	2012/08/15	UCV#367	Confusing example should be removed.	Done
203	2012/08/15	UCV#367	No unification example is shown.	No action yet.
204	2012/08/15	UCV#372	Example should be shown by multicolumn chart.	Done

IRG#36, IRGN1775 CJK Editorial Group Report

The editorial group reviewed and confirmed the updates of IWDS, UCV and NUC.

The editorial group reviewed and discussed IRGN1766 and IRGN1777. The editorial group agreed to use “delta IWDSnn (e.g., delta IWDS36)” when updating IWDS. The editorial group agreed to use the term of “explanation” for recording glyph changes.

The item 4 of Japanese review report of CJK_B were reviewed and accepted, they should be added to the IWDS.

The editorial group also asks IRG to suggest WG2 to add a “corrigendum” to UCS for CJK glyph changes.

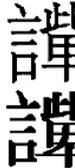

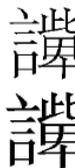

The followings (Page 1 to 4) are from “Japan review result on CJK B 2nd round (IRG N1748 chart), 2011-02-25 Source: Japan”

4. Corrigendum text (comments on IRG N1744)

Most texts in IRG N1744 only record conclusions of IRG discussion like "xxx is preferred although it is different from xxx" or "xxx remain unchanged". However, Japan expects text should record like "this is not correct regarding the unification rule" or "why this standard keeps this wrong shape" or such explanations so that people who doesn't know the IRG discussion will understand the wrong situations.

On this viewpoint Japan proposes alternate text as below.

Unicode	UCS 2003 Glyph	IRG N1707 Glyph	SuperCJK Glyph
2382C	 UCS-2382C	2382C 木 75.18  TF-6951 UCS-2382C	
The current glyph (i.e. T-glyph) is preferred, although it is different from the UCS glyph. → TF-6951 was mistakenly unified to U+2382C at the first edition of CJK UNIFIED IDEOGR EXTENSION B. TF-6951 of ISO/IEC10646 keeps this shape for the consistency to the CNS st although these two glyph shapes cannot be unified.			
23EE4	 UCS-23EE4	23EE4 水 85.11  GKX-0648.09 T7-243F  UCS-23EE4	

Unicode	UCS 2003 Glyph	IRG N1707 Glyph	SuperCJK Glyph
<p>The current glyphs (i.e. G-glyph and T-glyph) remain unchanged. This is a case of mis-unification in SuperCJK. → T7-243F was mistakenly unified to U+23EE4 at the first edition of CJK UNIFIED IDEOGRAPH EXTENSION B. T7-243F of ISO/IEC10646 keeps this shape for the consistency to the CNS standard although these two glyph shapes cannot be unified. [Note] GKX-0648.09 can be unified to U+23EE4 although it has slight difference from KangXi dictionary shape.</p>			
24369	 UCS-24369	24369 火 86.12  TF-5024  UCS-24369	 
<p>The current glyph (i.e. T-glyph) is preferred, although it is different from the UCS glyph. → Because of mis-unification in Super CJK, UCS glyph was designed differently (one dot more) than TF-5024. To keep consistency multicolumn code chart keeps original UCS shape.</p>			
27555	 UCS-27555	27555 虫 142.17  GKX-1103.29  T5-7649  UCS-27555	 
<p>The current G-glyph remains unchanged, although it is different from the UCS glyph. → Because of mis-unification in Super CJK, UCS glyph was designed differently (one dot more) from Kangxi dictionary shape. To keep consistency multicolumn code chart keeps original UCS shape.</p>			
27B1F	 UCS-27B1F	27B1F 言 149.12  GHZ-64018.09  T7-5035  UCS-27B1F	 
<p>The current G-glyph remains unchanged because it is a correct glyph. → GHZ-65018.09 was mistakenly unified to U+27B1F at the first edition of CJK UNIFIED IDEOGRAPH EXTENSION B. GHZ-65018.09 of ISO/IEC10646 keeps this shape for the consistency of source mapping although these two glyph shapes cannot be unified.</p>			
27D41	 UCS-27D41	27D41 貝 154.4  TF-385F  UCS-27D41	 
<p>The current glyph (i.e. T-glyph) remains unchanged. It is noted that the UCS glyph is wrong. → Because of mis-unification in Super CJK, UCS glyph was designed differently from TF-385F. To keep consistency multicolumn code chart keeps original UCS shape.</p>			

Unicode	UCS 2003 Glyph	IRG N1707 Glyph	SuperCJK Glyph
28B75	 UCS-28B75	28B75 <small>金 167.13</small>  TF-686D	 UCS-28B75  
<p>The current glyph (i.e. T-glyph) is preferred, although it is different from the UCS glyph. → Shape of TF-686D in CNS standard has been changed after the first edition of CJK UN IDEOGRAPHRAPHS EXTENSION B was published, so TF-686D needs to keep this shape although it can unified to U+28B75.</p>			
293FB	 UCS-293FB	293FB <small>韋 178.20</small>  GHZ-74512.13  T5-7C22  UCS-293FB	 
<p>The current T-glyph remains unchanged, although it is different from the UCS glyph (i.e. unified). Yet an <u>exception</u> to the unification rules. → Shape of T5-7C22 in CNS standard has been changed after the first edition of CJK UN IDEOGRAPHRAPHS EXTENSION B was published, so T5-7C22 needs to keep this shape although it can unified to U+293FB. [Comment] IRG didn't agree to discuss about modifying unification rule. So this is not an "exception" rule.</p>			
29450	 UCS-29450	29450 <small>頁 181.3</small>  GKX-1399.08  T5-3D4A  UCS-29450	 
<p>The current glyphs (i.e. G-glyph and T-glyph) are preferred, although they are different from the UCS (i.e. unified). It is noted that the UCS glyph is the glyph shown in the <i>Kangxi Dictionary</i>. → GKX-1399.08 has different shape from Kangxi Dictionary. Both GKX-1399.08 and T5-3D4A unified to U+29450. [Comment] This note is not necessary because this is a case of issue 2 of 4.3 in IRG N1745.</p>			
29C52	 UCS-29C52	29C52 <small>鬲 193.12</small>  T7-5666  UCS-29C52	 
<p>The current glyph (i.e. T-glyph) is preferred, although it is different from the UCS glyph (i.e. unified). → Shape of T7-5666 in CNS standard has been changed after the first edition of CJK UN IDEOGRAPHRAPHS EXTENSION B was published, so T7-5666 needs to keep this shape although it can unified to U+29C52.</p>			

Unicode	UCS 2003 Glyph	IRG N1707 Glyph	SuperCJK Glyph
2A0B8	 UCS-2A0B8		

TCA prefers to keep its current glyph and the G-glyph and T-glyph are thus unified. Yet TCA will check with its experts.

→ Shape of T7-523A in CNS standard has been changed after the first edition of CJK UNIFIED IDEOGRAPHS EXTENSION B was published, so T7-523A needs to keep this shape although it can be unified to U+2A0B8.

[Comment] Glyph difference of G is a popular pattern of unification but T is not, however TCA will keep this shape. So IRG concluded to make note for this situation. If TCA needs further study, IRG has to discuss at the next meeting.

One more note should be added (cf. 2.2(h))

299FB	 299FB		
-------	--	---	---

Shape of GCH has been changed after the first edition of CJK UNIFIED IDEOGRAPHS EXTENSION B was published, so G-glyph for U+299FB needs to keep this shape although it cannot be unified to original UCS shape.

IRG#37, IRGN1837ErrataReportIRG37

Summary:

This document drafted notes for CJK B multicolumn code table for 3rd edition that are confirmed as unification errors and needs explanations. This document also listed additions to IRG UCS/NUCV list.

Part1 is draft notes for corrigendum notes that should be submitted to WG2 for IRG.

Part2 shows list adding to UCV (Unifiable Component Variations) list.

Part3 shows list adding to NUCV (Non-Unifiable Component Variations) list

See Page 6 to 19 for IRGN 1837.

Title: CJK B error report to WG2

Source: IRG editorial group

Meeting: IRG#37

Date: 2011-11-10

Summary:

This document drafted notes for CJK B multicolumn code table for 3rd edition that are confirmed as unification errors and needs explanations. This document also listed additions to IRG UCS/NUCV list.

Part1 is draft notes for corrigendum notes that should be submitted to WG2 for IRG.

Part2 shows list adding to UCV (Unifiable Component Variations) list.

Part3 shows list adding to NUCV (Non-Unifiable Component Variations) list

Part1: Draft text for corrigendum notes

CJK Editorial group has confirmed several mis-unifications or glyph errors in ISO/IEC10646:2003. To avoid misunderstanding of unification rule by users of ISO/IEC 10646 future edition, IRG concluded to submit draft corrigendum text to WG2. Pictures are for the confirmation and not a part of corrigendum text.

Note that 12 more texts in IRG N1775 (CJK Editorial group report at IRG#36)

u+235F1		 <small>235F1 木 75.10</small>	 <small>UCS2003</small>	 <small>V0-354D</small>	wrong gl	J: This is postponed at IRG #36 however they cannot be unified. G: and not unifiable, need V glyph	IRG N1775 tabl
No change. UCS2003 is incorrect. It is a unification error							

V0-354d was mistakenly unified to u+235f1 at the first edition of CJK UNIFIED IDEOGRAPHS EXTENSION B. IRG concluded that V0-354d of ISO/IEC 10646 keeps this shape for the consistency to the TCVN5773 although these glyphs are not able to be unified.

U+24F5	V	24F15 𧈧 104.18 癩 UCS2003 V2-7D5A	J: glyph not revised G: A stroke is missing Already menti IRGN1775_A4 (J comr K: wrong glyph	I R G N table4-2.2(f)

IRG#38, IRGN1864 CJK Editorial Group Report of CJK_E

The editorial meeting decided to add NUC examples as below:

 UCS2003	
U+29ACF	CJK_Ev7 09702

Examples are:

 09712	1452.181 高 13 1	 G_ZJW00697	 29AE7
 09713	1452.191 高 14 1	 G_ZJW00696	 29AE8
 09714	1452.201 高 15 1	 G_ZJW00699	 29AED

IRG#39, IRGN1896 CJK Editorial Group Report

6. Review of IWDS

References:

- IRGN1918 IWDS
- IRGN1839 IWDS
 - ROK comments on IWDS_summary
 - HK comments to UCV list

The editorial group accepted ROK and HK comments on IRGN1839. The editorial group asked Mr. Taichi Kawabata to update the IWDS_summary and all UCV lists to reflect these comments.

The editorial group asked Mr. Taichi Kawabata to use images for the ideographic characters rather than fonts in the lists of UCV and NUC to avoid wrong showing. The editorial group asked Mr. Taichi Kawabata to mark the updated items for better tracking.

Reminder: Some comments (such as #56, #299, #318, #372, or more) from HK is not reflected or not reflected well in the latest UCV list. Some appropriate examples are not found.

To reduce the size of this file, please browse <http://appsrv.cse.cuhk.edu.hk/~irg/irg/irg39/IRG39.htm> for the HK comments, dated 2012-08-15 and 2012-11-08, and ROK comments, under the entry of IRGN1839.

IRG#36, IRGN1775 CJK Editorial Group Report

The editorial group reviewed and confirmed the updates of IWDS, UCV and NUC.

The editorial group reviewed and discussed IRGN1766 and IRGN1777. The editorial group agreed to use “delta IWDS_n (e.g., delta IWDS₃₆)” when updating IWDS. The editorial group agreed to use the term of “explanation” for recording glyph changes.

The item 4 of Japanese review report of CJK_B were reviewed and accepted, they should be added to the IWDS.

The editorial group also asks IRG to suggest WG2 to add a “corrigendum” to UCS for CJK glyph changes.

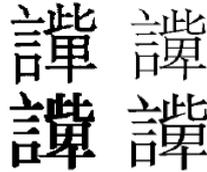

The followings (Page 1 to 4) are from “Japan review result on CJK B 2nd round (IRG N1748 chart), 2011-02-25 Source: Japan”

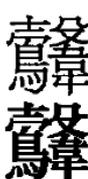

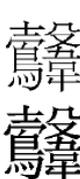

4. Corrigendum text (comments on IRG N1744)

Most texts in IRG N1744 only record conclusions of IRG discussion like "xxx is preferred although it is different from xxx" or "xxx remain unchanged". However, Japan expects text should record like "this is not correct regarding the unification rule" or "why this standard keeps this wrong shape" or such explanations so that people who doesn't know the IRG discussion will understand the wrong situations.

On this viewpoint Japan proposes alternate text as below.

Unicode	UCS 2003 Glyph	IRG N1707 Glyph	SuperCJK Glyph
2382C	 UCS-2382C	2382C 𣏟 𣏟 <small>木 75.18</small> TF-6951 UCS-2382C	
The current glyph (i.e. T-glyph) is preferred, although it is different from the UCS glyph. → TF-6951 was mistakenly unified to U+2382C at the first edition of CJK UNIFIED IDEOGRAPHS EXTENSION B. TF-6951 of ISO/IEC10646 keeps this shape for the consistency to the CNS standard although these two glyph shapes cannot be unified.			

Unicode	UCS 2003 Glyph	IRG N1707 Glyph	SuperCJK Glyph
23EE4	 UCS-23EE4	23EE4 水 85.11  GKX-0648.09  T7-243F  UCS-23EE4	
<p>The current glyphs (i.e. G-glyph and T-glyph) remain unchanged. This is a case of mis-unification in SuperCJK.</p> <p>→ T7-243F was mistakenly unified to U+23EE4 at the first edition of CJK UNIFIED IDEOGRAPHS EXTENSION B. T7-243F of ISO/IEC10646 keeps this shape for the consistency to the CNS standard although these two glyph shapes cannot be unified.</p> <p>[Note] GKX-0648.09 can be unified to U+23EE4 although it has slight difference from KangXi dictionary shape.</p>			
24369	 UCS-24369	24369 火 86.12  TF-5024  UCS-24369	
<p>The current glyph (i.e. T-glyph) is preferred, although it is different from the UCS glyph.</p> <p>→ Because of mis-unification in Super CJK, UCS glyph was designed differently (one dot more) from TF-5024. To keep consistency multicolun code chart keeps original UCS shape.</p>			
27555	 UCS-27555	27555 虫 142.17  GKX-1103.29  T5-7649  UCS-27555	
<p>The current G-glyph remains unchanged, although it is different from the UCS glyph.</p> <p>→ Because of mis-unification in Super CJK, UCS glyph was designed differently (one dot more) from Kangxi dictionary shape. To keep consistency multicolun code chart keeps original UCS shape.</p> <p>[Note] UCS shape is wrong because GKX-1103.29 is placed at 17 strokes place in Kangxi dictionary.</p>			
27B1F	 UCS-27B1F	27B1F 言 149.12  GHZ-64018.09  T7-5035  UCS-27B1F	
<p>The current G-glyph remains unchanged because it is a correct glyph.</p> <p>→ GHZ-65018.09 was mistakenly unified to U+27B1F at the first edition of CJK UNIFIED IDEOGRAPHS EXTENSION B. GHZ-65018.09 of ISO/IEC10646 keeps this shape for the consistency of source mapping although these two glyph shapes cannot be unified.</p>			

Unicode	UCS 2003 Glyph	IRG N1707 Glyph	SuperCJK Glyph
27D41	 UCS-27D41	27D41 貝 154.4  TF-385F  UCS-27D41	 
The current glyph (i.e. T-glyph) remains unchanged. It is noted that the UCS glyph is wrong. → Because of mis-unification in Super CJK, UCS glyph was designed differently from TF-385F. To keep consistency multicolumn code chart keeps original UCS shape.			
28B75	 UCS-28B75	28B75 金 167.13  TF-686D  UCS-28B75	 
The current glyph (i.e. T-glyph) is preferred, although it is different from the UCS glyph. → Shape of TF-686D in CNS standard has been changed after the first edition of CJK UNIFIED IDEOGRAPHS EXTENSION B was published, so TF-686D needs to keep this shape although it cannot be unified to U+28B75.			
293FB	 UCS-293FB	293FB 韋 178.20  GHZ-74512.13  T5-7C22  UCS-293FB	 
The current T-glyph remains unchanged, although it is different from the UCS glyph (i.e. unified). Yet this is an <u>exception</u> to the unification rules. → Shape of T5-7C22 in CNS standard has been changed after the first edition of CJK UNIFIED IDEOGRAPHS EXTENSION B was published, so T5-7C22 needs to keep this shape although it cannot be unified to U+293FB. [Comment] IRG didn't agree to discuss about modifying unification rule. So this is not an "exception" of the rule.			
29450	 UCS-29450	29450 頁 181.3  GKX-1399.08  T5-3D4A  UCS-29450	 
The current glyphs (i.e. G-glyph and T-glyph) are preferred, although they are different from the UCS glyph (i.e. unified). It is noted that the UCS glyph is the glyph shown in the <i>Kangxi Dictionary</i> . → GKX-1399.08 has different shape from Kangxi Dictionary. Both GKX-1399.08 and T5-3D4A can be unified to U+29450. [Comment] This note is not necessary because this is a case of issue 2 of 4.3 in IRG N1745.			

Unicode	UCS 2003 Glyph	IRG N1707 Glyph	SuperCJK Glyph
29C52	 UCS-29C52	29C52 鬲 193.12  T7-5666  UCS-29C52	   

The current glyph (i.e. T-glyph) is preferred, although it is different from the UCS glyph (i.e. unified).
→ Shape of T7-5666 in CNS standard has been changed after the first edition of CJK UNIFIED IDEOGRAPHS EXTENSION B was published, so T7-5666 needs to keep this shape although it cannot be unified to U+29C52.

2A0B8	 UCS-2A0B8	2A0B8 鳥 196.9  GKX-1494.15  T7-523A  UCS-2A0B8	   
-------	--	--	--

TCA prefers to keep its current glyph and the G-glyph and T-glyph are thus unified. Yet TCA will further check with its experts.

→ Shape of T7-523A in CNS standard has been changed after the first edition of CJK UNIFIED IDEOGRAPHS EXTENSION B was published, so T7-523A needs to keep this shape although it cannot be unified to U+2A0B8.

[Comment] Glyph difference of G is a popular pattern of unification but T is not, however TCA wants to keep this shape. So IRG concluded to make note for this situation. If TCA needs further study, IRG has better to discuss at the next meeting.

One more note should be added (cf. 2.2(h))

299FB	 299FB	299FB 马 187.8  GCH  UCS-299FB	  
-------	--	--	---

Shape of GCH has been changed after the first edition of CJK UNIFIED IDEOGRAPHS EXTENSION B was published, so G-glyph for U+299FB needs to keep this shape although it cannot be unified to the original UCS shape.

Summary:

This document drafted notes for CJK B multicolumn code table for 3rd edition that are confirmed as unification errors and needs explanations. This document also listed additions to IRG UCS/NUCV list.

Part1 is draft notes for corrigendum notes that should be submitted to WG2 for IRG.

Part2 shows list adding to UCV (Unifiable Component Variations) list.

Part3 shows list adding to NUCV (Non-Unifiable Component Variations) list

See Page 6 to 19 for IRGN 1837.

Title: CJK B error report to WG2

Source: IRG editorial group

Meeting: IRG#37

Date: 2011-11-10

Summary:

This document drafted notes for CJK B multicolumn code table for 3rd edition that are confirmed as unification errors and needs explanations. This document also listed additions to IRG UCS/NUCV list.

Part1 is draft notes for corrigendum notes that should be submitted to WG2 for IRG.

Part2 shows list adding to UCV (Unifiable Component Variations) list.

Part3 shows list adding to NUCV (Non-Unifiable Component Variations) list

Part1: Draft text for corrigendum notes

CJK Editorial group has confirmed several mis-unifications or glyph errors in ISO/IEC10646:2003. To avoid misunderstanding of unification rule by users of ISO/IEC 10646 future edition, IRG concluded to submit draft corrigendum text to WG2. Pictures are for the confirmation and not a part of corrigendum text.

Note that 12 more texts in IRG N1775 (CJK Editorial group report at IRG#36)

u+235 fl	 235F1	 235F1 木 75.10	 UCS2003	 V0-354D	wrong glyph J: This is postponed at IRG #36 however they cannot be unified. G: 梨 and 梨 not unifiable, need V glyph to change back.. K: V glyph wrong, an extra 人 is added.	IRG N1775 table 3
<p style="color: red;">No change. UCS2003 is incorrect. It is a unification error</p>						

V0-354d was mistakenly unified to u+235f1 at the first edition of CJK UNIFIED IDEOGRAPHS EXTENSION B. IRG concluded that V0-354d of ISO/IEC 10646 keeps this shape for the consistency to the TCVN5773 although these glyphs are not able to be unified.

u+285 99	 28599	28599 <small>走 162.11</small>  UCS2003  TS-618D  V4-6595	unification	<p>J: This is concluded at IRG #36 that V to change back to UCS2003 shape.</p> <p>H: The V-glyph has been modified, but the new glyph has one additional stroke.</p> <p>G: An extra stroke been added compares to UCS font, unifiable?</p> <p>K: non-unifiable shape</p>	IRG N1792/IRG N1775 table 1
<p style="color: red;">No change. Make a note to corrigenda as a unification error.</p>					

V4-5565 was mistakenly unified to u+28599 at the first edition of CJK UNIFIED IDEOGRAPHS EXTENSION B. IRG concluded that V4-5644 of ISO/IEC 10646 keeps this mapping for the consistency with the V4 source although these glyphs are not able to be unified.

U+2088 5	T	20885 力 19.10 勳 勳 勳 UCS2003 GKX-0148.26 T5-3669	glyph not revised	IRG N1775 table4-2.1	
T-glyph can be unified to U+2088D. But we would not change the map. It is a mapping error.					

T5-3669 was mistakenly unified to u+20885 at the first edition of CJK UNIFIED IDEOGRAPHS EXTENSION B. IRG concluded that IRG concluded that T5-3669 should be mapped to u+2088d by means of unification rule and this mapping is err. However, IRG concluded that T5-3669 of ISO/IEC 10646 keeps this mapping for the consistency with CNS standard.

U+21F1 2	T	21F12 山 46.12 嶂 嶂 嶂 UCS2003 GKX-0319.30 T5-406E	J: T source should be removed for a new character as explained in IRG	IRG N1775 table4-2.2(c)	
-------------	---	--	--	-------------------------------	--

			N1793. K: T glyph is the same as 21F2C 𪛗		
Move T-source from U+21F12 to U+21F2C. Record U-glyph of U+21F2C is wrong. It is a mapping error.					

T5-4C6E was mistakenly unified to u+20885 at the first edition of CJK UNIFIED IDEOGRAPHS EXTENSION B. IRG concluded to ask WG2 moving T5-4C6E source to map to u+21f2c.

U+24A 8A	V	<p>24A8A 玉 96.13 UCS2003</p> <p>V2-7C66</p>	J: glyph not revised H: The V-glyph has 12 strokes, not 13 as in the UCS2003 glyph.	IRG N1775 table4-2.2(f)	
No change. UCS is wrong. It is a unification error					

Shape of u+2a48a was wrong in ISO/IEC10646:2003. Although correct shape of V2-7C66 cannot be unified to the current shape in ISO/IEC10646:2003, IRG concluded to keep this mapping because of the consistency.

U+24F1 5	V	24F15 𧯧 𧯧 104.18 UCS2003 V2-7D6A	J: glyph not revised G: A stroke is missing in V glyph. Already mentioned in IRGN1775_A4 (J comments). K: wrong glyph	IRG N1775 table4-2.2(f)	
No change. UCS is wrong. It is a unification error					

Shape of u+24f15 was wrong in ISO/IEC10646:2003. Although correct shape of V2-7D5A cannot be unified to the current shape in ISO/IEC10646:2003, IRG concluded to keep this mapping because of the consistency.

U+2508 9	V	25089 𧯩 𧯩 108.10 UCS2003 V2-7D6B	glyph not revised	IRG N1775 table4-2.2(f)	
No change. UCS is wrong. It is a unification error.					

Shape of u+25089 was wrong in ISO/IEC10646:2003. Although correct shape of V2-7D68 cannot be unified to the current

shape in ISO/IEC10646:2003, IRG concluded to keep this mapping because of the consistency.

U+2A6C C0	G	2A6C0 地 213.8 𪗇 UCS2003	𪗇 GKX-1538.20	𪗇 T5-7B5E	glyph not revised	IRG N1775 table4-3	
No change and add a note to corrigenda as Unification error.							

GKX-1538.20 was mistakenly unified to u+2a6c0 at the first edition of CJK UNIFIED IDEOGRAPHS EXTENSION B. V4-5644 of ISO/IEC 10646 keeps this shape for the consistency to the GKX source although these glyphs are not able to be unified.

22936	𪗇 UCS2003	𪗇 UCS2003	𪗇 GKX-0408.28	𪗇 T5-6777	Unification	The T-glyph is different from the <i>KX Dictionary</i> glyph.	
-------	--------------	--------------	------------------	--------------	-------------	---	--

No change. Add a note to corrigenda as a unification error

T5-6777 was mistakenly unified to u+22936 at the first edition of CJK UNIFIED IDEOGRAPHS EXTENSION B. T5-6777 of ISO/IEC 10646 keeps this shape for the consistency to the CNS standard although these glyphs are not able to be unified.

28321	 UCS2003	 UCS2003	 GKX-1244.18	 T6-632A	Unification	The T-glyph is different from the <i>KX Dictionary</i> glyph.	
-------	---	---	---	---	-------------	---	--

No change and add a note to corrigenda as a unification error.

T6-632A was mistakenly unified to u+22936 at the first edition of CJK UNIFIED IDEOGRAPHS EXTENSION B. T6-632A of ISO/IEC 10646 keeps this shape for the consistency to the CNS standard although these glyphs are not able to be unified.

22BA3	 UCS2003	 GKX-0440.17	Wrong glyph	Difference in the top part of the glyph	G
No change and add a note to corrigenda as a unification error.					

GKX-0440.17 was mistakenly unified to u+22BA3 at the first edition of CJK UNIFIED IDEOGRAPHS EXTENSION B. GKX-0440.17 of ISO/IEC 10646 keeps this shape for the consistency to the GKX source although these glyphs are not able to be unified.

23023	 UCS2003	 T5-6C34	Wrong glyph	Difference in the right component of the glyph	T
No change and add a note to corrigenda as a unification error.					

T5-6C34 was mistakenly unified to u+23023 at the first edition of CJK UNIFIED IDEOGRAPHS EXTENSION B. T5-6C34 of ISO/IEC 10646 keeps this shape for the consistency to the CNS standard although these glyphs are not able to be unified.

24229	 UCS2003	 GKX-0672.02	Wrong glyph	The bottom difference	G
No change and add a note to corrigenda as a unification error.					

GKX-0672.02 was mistakenly unified to u+23023 at the first edition of CJK UNIFIED IDEOGRAPHS EXTENSION B. GKX-0672.02 of ISO/IEC 10646 keeps this shape for the consistency to the GKX source although these glyphs are not able to be unified.

IRG#39, IRGN1896 CJK Editorial Group Report

6. Review of IWDS

References:

- IRGN1918 IWDS
- IRGN1839 IWDS
 - ROK comments on IWDS_summary
 - HK comments to UCV list

The editorial group accepted ROK and HK comments on IRGN1839. The editorial group asked Mr. Taichi Kawabata to update the IWDS_summary and all UCV lists to reflect these comments.

The editorial group asked Mr. Taichi Kawabata to use images for the ideographic characters rather than fonts in the lists of UCV and NUC to avoid wrong showing. The editorial group asked Mr. Taichi Kawabata to mark the updated items for better tracking.

Reminder: Some comments (such as #56, #299, #318, #372, or more) from HK is not reflected or not reflected well in the latest UCV list. Some appropriate examples are not found.

See Page 22 to 103 for HK comments dated 2012-08-15.

See Page 90 to 104 for HK comments dated 2012-11-08.

See Page 105 to 122 for ROK comments.

HKSAR's Comments on the Updated UCV List (IRG N1839)

The Hong Kong Special Administrative Region has reviewed the updated UCV list and has the following comments:

No	UCV	Exceptions	Examples	Comments
27a	𪗇	04907 2887B 𪗇 𪗇		The glyph of U+4907 is wrong. It should be 𪗇. 4907 𪗇 𪗇 𪗇 西 164.9 GKX-1285.27 T7-3454 K3-3374
32	𪗇	26FBD 26FDA 𪗇 𪗇		The glyphs of U+26FBD and U+26FDA are wrong. They should be 𪗇 and 𪗇 respectively. 26FBD 𪗇 𪗇 𪗇 种 140.14 UCS2003 GKX-1063.40 T5-6433 26FDA 𪗇 𪗇 种 140.14 UCS2003 G4K

38		<p>53DB 又 29.7</p>  <p>3AB5 斗 68.5</p> 	<p>This group of components are unified under “Differences in throwing away at the stroke termination”. U+53DB and U+3AB5 are, therefore, not appropriate examples of the UCVs since the left components of the glyphs throw away at the stroke termination without exception.</p>
----	---	---	--

月月月月

05E50 03B3A

0670C 080A6

0670F 080DD

06710 080CA

06713 08101

06718 08127

For most of the exceptions listed, the pair of glyphs look identical to each other.

- i. It is suggested that the component 月 or 月 should be adopted for the following characters to better illustrate the exception:

Source:	IRG
Meeting:	IRG#38, Gyeongju, Korea
Title:	IRG#39, Hanoi, Vietnam
Status:	IRG Working Document Series (IRGWDS)
Actions required:	Member's submission
Distribution:	Feedback Requested
Medium:	IRG
Pages:	Electronic
	5

Introduction:

IRG Working Document Series (IRGWDS) is a set of IRG maintained documents which keeps the up-to-date lists of CJK unification related example cases to supplement the published Annex S of ISO/IEC 10646 for IRG unification work. The maintenance of the IRGWDS should comply with the operational procedures established in Annex E of the *IRG Principles and Procedures*.

In addition to this document (labeled as SUM) which explains the IWDS with a summary of the examples, there are also 3 document series as listed below:

Series 1: List of UCV (Unifiable Component Variations) of Ideographs(labeled as UCV)

Series 2: List of Non-Unifiable Components of Ideograph and Overly-Unified Ideographs(Labeled as UCV)

Series 3: List of Possibly Mis-Unified Ideographs(Labeled as MUI).

Names of IRGWDS files:

Each IRGWDS file is named as IRGWDS_*SSS*_nn where *SSS* is the name of the specific series and *nn* refers to the IRG meeting where the list is confirmed. Thus, file names of lists of unification/separation examples which are updated from time to time will look like:

IRGWDS_SUM_nn: a summary of IRGWDS documents

IRGWDS_UCV_nn: UCV list (Series 1)

IRGWDS_NUC_nn: Non-Unifiable Components (Series 2)

IRGWDS_MUI_nn: Possibly Mis-Unified Ideographs (Series 3).

Files may be added an additional IRG N number.

-→File names may include IRG N number in addition.

Detailed Specification of the Standing Document Series

This section explains the nature of each series as well as the format and the information contained in each series.

1. List of Unifiable Component Variations (UCV)

The UCV list provides the list of component variations to be unifiable observed from existing UCS multi-column charts, or proposed and agreed among IRG members to be unifiable.

If two ideographs differ only in terms of the components in the UCV list, but satisfy the requirement for dis-unification according to dis-unification rules, such ideographs may be encoded differently. However, such cases are exceptional and should be exhaustively listed in this document under the related components to avoid confusion for consideration of other characters.

Unification is meant to be at the component level only. In other words, if the components themselves are also ideographs proper, this list does not imply that the corresponding ideographs proper are unifiable.

The following is the format for each entry in the file:

- a. No.: The serial number of the entry for reference that is unique throughout the standardization works.
- b. UCV: List of actual glyphs of UCV
- c. References: Excerpt from existing document (e.g. JIS X 0213 and HYDZD)
- d. Exceptions: The exhaustive list of dis-unification examples.
- e. Unified Examples: The example list of unified ideographs and compatibility ideographs, and notes if necessary

The following is an example of a typical entry in UCV list.

No.	UCV	References	Exceptions	Examples
			2235A 24C7F 甯 甯 22B85 22BA7 擗 擗

// end of gim's comment

The above example shows Japanese JIS X 0213 Unification Criteria Number and Hanyu-Dacidian Unification number.

// I wonder why  is included.

//  seems relevant. However,  does not seem relevant ???

2. List of Non-Unifiable Components of Ideograph(NUC)

The NUC list provides the list of component variations which are not to be unified. This list should be kept as minimum as possible. Components that are not obviously unifiable will not be listed here. That is, it should only list those that are close in glyph shapes which cognitively can be confusing. In other words, this list should only contain the components which are (possibly inappropriately) unified by precedence during the IRG working processing, or components that are stated to be unifiable by some local national standards, but not in the UCS.

Furthermore, this list should not contain components which are either (1) KangXi radicals (such as 𠂇、 vs. 𠂇) or (2) simplified vs. traditional components with no precedence of unification (such as 𠂇 vs 𠂇).

b-2. Separations: ?? If examples for separations come from UCS, then we need to capture the relevant portion so that people can see UCS code position and other info. If not, where do these examples come ? I am confused here.

Need to add explanation as to the meaning of separation.

b-3. ??-only: Nearly the same comments for b-2 apply here.

Need to add explanation as to the meaning of ??-only.

// end of gim's comment

c. ~~Examples~~ → samples: List of ~~exhaustive possibly over-unified ideographs (if exists)~~

The following is an example of a typical entry in NUC:

// start of gim's comment:

Need to add the following portion from UCV so that people can understand “These examples come from UCS. These shows that usually G-Source and TJK-Source of U+58F3 are usually separately encoded as shown in ‘Separations’, while only U+58F3 these shapes are unified”.

No.	Components	Analysis	Samples
163	臣 臣	Unifications	
		Separations	宦宦, 弮弮, 柅柅, 臣臣, 莖莖, 躋躋, 頤頤, 啞啞, 熙熙, 啞啞, 纂纂, 脛脛, 鼈鼈, 躡躡
264a	吉 吉	Unifications	<div style="display: flex; flex-direction: column; align-items: center;"> <div style="display: flex; justify-content: space-around; width: 100%;"> 088/243 壳壳壳壳 </div> <div style="display: flex; justify-content: space-around; width: 100%; font-size: small;"> 0-3F47 3-282D 1-385E 2-2B3E </div> <div style="display: flex; justify-content: space-around; width: 100%; font-size: small;"> 壳 58F3 0-3139 3-0813 1-2462 2-1130 </div> <div style="margin-top: 10px;"> 聶 聶 293FD </div> </div>
		Separations	殼殼, 殼殼, 殼殼

The number of the first entry in NUC is 163, NOT 1 (see the above figure).

The next number is 264a.

My understanding is that, in the past, all entries in UCV and NUC are numbered in sequence.

Since we now keep UCV and NUC separately, it may be somewhat hard to use/assign one sequence of numbers for both UCV and NUC.

We could consider giving a separate sequence of numbers for NUC while UCV uses the old numbers. The last number used for UCV seems 408. We can use 409 for the next UCV entry.

For NUC, we could probably use, say, 8nn (starting with 800 or 801).

Furthermore, since we have only about 16 entries for NUC, we could give 8nn numbers to the existing entries in NUC while keeping the old number in parentheses. For new NUC entries we can give just an 8nn number only. By doing this, we can easily understand that 8nn are NUC

entries.

- Probably we can give 9nn for MUI in the future.

If we give 8nn numbers to the existing NUC entries, the number column will change as follows:

(before giving 800 numbers to NUC entries)

No.	Components	Analysis
163	臣 臣	Unifications
		Separations
264a	吉 吉	Unifications
		Separations
294	厶	Unifications
		Separations

=>

(after giving 800 numbers to NUC entries)

No.	Components	Analysis
801 (163)	臣 臣	Unifications
		Separations
802 (264a)	吉 吉	Unifications
		Separations
803 (294)	厶	Unifications
		Separations

// end of gim's comment

// start of gim's comment

I suggest to start each of the following sections (a-1, a-2, .. b-1, ...) on a new page.

Suppose that one has a printed copy of this list with personal notes and that one NEW entry was inserted into section a-1. Then we may have to print all pages since page breaks are changed on almost every page; furthermore we may have to copy all the personal notes in the old copy to the new copy – a time-consuming job!!!

If we start each section on a new page, then we can print only section a-1 while keeping the old copy of the other sections.

Summary of UCS Ideograph Unifiable Component Variations

Table of Contents

a. Differences in rotated strokes/dots

a-1. Differences in stroke initiation direction

a-2. Differences in open direction of two strokes

a-3. Differences in throwing away at the stroke termination

a-5. Differences of stroke or dot

b. Differences in intersection and extension of two strokes or dots

b-1. Differences in intersection at the stroke initiation and/or termination

b-2. Differences in contact of strokes

b-3. Differences in crossing of strokes

b-5. Differences in contact point of two strokes

c. Differences in contact of strokes

// end of gim's comment

3. List of Possibly Mis-Unified Ideographs(MUI).

MUI list provides the possibly mis-unified ideographs as pairs of CJK compatibility ideographs and their corresponding CJK unified ideographs, which have different semantics and pronunciations with the supplied related reference information in a single document (possibly a dictionary).

It is possible that the coded CJK compatibility ideographs listed in this document need to be proposed as new CJK unified ideographs. However, extreme care must be taken to assure the compatibility with existing standards in accordance with Annex I of WG2's Principles and

Procedures.

The following is the format for each entry in the file:

- a. U-code: The UCS codepoint
- b. Characters: List of possibly non-unifiable ideographs.
- b. References: Excerpts of their usage from a single document source .

The following is an example of a typical entry in MUI:
