

**Universal Multiple-Octet Coded Character Set
(UCS)**

ISO/IEC JTC 1/SC 2 N4375
ISO/IEC JTC 1/SC 2/WG 2 N4604
Date: 2014-10-03

Source: WG 2 meeting 63, Hotel Taj Samudra, Colombo, Sri Lanka; 2014-09-29/10-03
Title: Recommendations from WG 2 meeting 63
Action: For approval by SC 2 and for information to WG 2
Status: Adopted at meeting 63 of WG 2
Distribution: ISO/IEC JTC 1/SC 2 and WG 2

Experts accredited by the national bodies or liaison organizations for Canada, China, Ireland, IRG, Japan, JTC1/SC35 (Liaison), Korea (Republic of), SEI - UC Berkeley (Liaison), Sri Lanka, TCA (Liaison), the United Kingdom, the Unicode Consortium (Liaison), and the USA were present when the following recommendations were adopted (see attached attendance list).

*Character count 120585 in 4th edition
101 additions in DAM1 to the 4th edition
6741 for future amendment 2 (end of meeting 62)
Character count 127427 (total allocated till end of meeting 62)*

Recommendation M63.01 (Disposition of DAM1 ballot comments):

Unanimous

WG2 accepts the disposition of ballot comments for DAM1 to the 4th edition in document [N4615](#). All the comments being editorial, WG2 further recommends that the updated text of DAM1 be sent to SC2 to forward to ITTF for publication.

count: 101 additions in Amendment 1(unchanged)

Recommendation M63.02 (Amendment 2 additions since meeting 62):

Unanimous

WG2 notes that in addition to the total of **6741** characters listed under resolutions M62.14 (in document [N4454](#)) the following additions were included in the PDAM2 ballot document SC2/N4340 (preliminary charts in [N4585](#)):

- a. A new block named Bhaiksuki 11C00-11C6F populated with **97** characters from document [N4573](#)
- b. **14** Arabic Quranic marks in Arabic Extended-A block from document [N4589](#)
- c. **5** Mongolian Birga characters in the Mongolian block from document [N4542](#)
- d. **4** CJK unified ideographs 9FCD...9FD0 requested per IRG resolutions IRG 42.4 and IRG 42.8 (document [N4582](#))
- e. **5** urgently needed CJK unified ideographs from Unicode Consortium in document [N4584](#)
- f. **20** CJK unified ideographs for Slavonic transliteration from document [N4583](#) (Table 1), and,
- g. **1** character 1123E KHOJKI SIGN SUKUN from document [N4575](#)

count: 6741+146 = 6887 additions in Amendment 2

Recommendation M63.03 (Disposition of ballot comments of PDAM2 to 4th edition):

Mr. Toshiya Suzuki objected

WG2 accepts the disposition of PDAM2 ballot comments in document [N4649](#). The following significant changes are noted:

- a. Create a new block 11660...1167F named MONGOLIAN SUPPLEMENT
Move the 5 currently encoded Birgas from 181A...181E in the Mongolian block to this new block
Accept the proposed **8** new Birgas in document [N4632](#) and add them in this new block
Rename existing ones and name new ones per suggestion for naming proposed in comment T.5 by UK with code positions, names and glyphs as shown in the charts in document [N4637](#)
- b. Insert **1** new Tangut ideograph after 17131, correct the glyphs and reorder several of the Tangut ideographs, per document [N4588R2](#) (final charts in document [N4637](#)) and in response to PDAM2 comment T.2 from China
- c. Move 6 Tamil archaic characters from 0BDF, 0BFB...0BFF to 11FF0...11FF5 in Tamil Supplement block
- d. Rename 11A29 to ZANABAZAR SQUARE LETTER-A
- e. Rename 1B100 to NUSHU ITERATION MARK and move it to 16FE1 in Ideographic Symbols and Punctuation block; reorder the Nushu block by moving up 1B101...1B28C by one code position
- f. Add **1** character 08D4 ARABIC SMALL HIGH WORD AR-RUB in Arabic Extended-A block (from document [N4592](#))
- g. Add **3** characters - 08BB ARABIC LETTER AFRICAN FEH, 08BC ARABIC LETTER AFRICAN QAF, and 08BD ARABIC LETTER AFRICAN NOON in Arabic Extended-A block (from document [N4597](#))
- h. Move 1F32D to 23FE and rename it POWER SLEEP SYMBOL, and,
- i. Several corrections to glyphs, annotations and headings in nameslists

count: 6887+13 = 6900 additions in Amendment 2

Recommendation M63.04 (Changes to sub-clauses related to presentation of CJK ideograph sources):**Mr. Toshiya Suzuki objected**

WG2 accepts the proposed changes to sub-clause 23.1, sub-clause 23.2, and the updated glyphs for 205 J column ideographs, described in section 2.2 from document [N4620](#), for inclusion in Amendment 2. WG2 further requests SC2 to communicate to Unicode Consortium to take note of recommendation in section 2.3 of document [N4620](#). WG2 additionally requests the IRG to review the resulting CJK Unified Ideographs charts that will be in document [N4624](#).

Recommendation M63.05 (Updates to CJK chart and source references):**Unanimous**

WG2 accepts the proposed changes to the seven source references and glyphs as proposed in document [N4621](#) for inclusion in Amendment 2.

Recommendation M63.06 (CJK Unified Ideographs Extension F):**Unanimous**

WG2 accepts to create a new block named 'CJK Unified Ideographs Extension F' in the range 2CEB0...2DDBF in the SMP, and populate it with the **3852** ideographs proposed in document [N4580](#) (summary form and its attached files), for inclusion in Amendment 2.

count: 6900+3852 = 10752 additions in Amendment 2**Recommendation M63.07 (Osage script):****Unanimous**

WG2 accepts to create a new block named 'Osage' in the range 104B0...104FF in the SMP, and populate it with **72** characters in code positions 104B0...104D3 and 104D8...104FB, with their names and glyphs as shown in document [N4619](#), for inclusion in Amendment 2.

count: 10752+72 =10824 additions in Amendment 2**Recommendation M63.08 (Cyrillic characters):****Unanimous**

WG2 accepts to create a new block named 'Cyrillic Extended-C' in the range 1C80...1C8F in the BMP, and populate it with **9** characters in code positions 1C80...1C88, with their names and glyphs based on document [N4607](#), with updated names and charts shown in document [N4637](#), for inclusion in Amendment 2.

count: 10824+9 =10833 additions in Amendment 2**Recommendation M63.09 (Combining Glagolitic letters):****Unanimous**

WG2 accepts to create a new block named 'Glagolitic Supplement' in the range 1E000...1E02F in the SMP, and populate it with **38** characters (all are combining letters) in code positions 1E000...1E02A, with their names and glyphs as shown in document [N4608](#), for inclusion in Amendment 2.

count: 10833+38 =10871 additions in Amendment 2**Recommendation M63.10 (Tangut radicals):****Unanimous**

WG2 accepts to create a new block named 'Tangut Radicals' in the range 18900..18BFF in the SMP, and populate it with **753** characters in code positions 18900..18BF0, with their names and glyphs as shown in document [N4636](#), for inclusion in Amendment 2.

count: 10871+753 = 11624 additions in Amendment 2**Recommendation M63.11 (Additional changes in Amendment 2):****Unanimous**

WG2 accepts the following additional changes in Amendment 2:

- a. Add A8C5 SAURASHTRA SIGN CANDRABINDU with its glyph from document [N4590](#) in the Saurashtra block
- b. Add 0C80 KANNADA SIGN SPACING CANDRABINDU with its glyph in document [N4591](#) in the Kannada block
- c. Add 20BE LARI SIGN in the Currency Symbols block, with a glyph based on the Logo in document [N4593](#) that is acceptable to the proposers
- d. Add 1018E NOMISMA SIGN in the Ancient Greek Numbers block; with the 'default' form for the glyph shown in document [N4594](#)
- e. Add 2E44 DOUBLE SUSPENSION MARK in the Supplemental Punctuation block, with glyph similar to the one in document [N4595](#)
- f. Add 1018D GREEK INDICTION SIGN in Ancient Greek Numbers block, with 'default' form for the glyph from document [N4596](#)
- g. Rotate the glyph for 3127 BOPOMOFO LETTER I by 90 degrees, with an appropriate change in the annotation, per request in document [N4609](#), and,
- h. Reverse the shape of current glyph for 301C WAVE DASH as requested in document [N4606](#)
- i. Add a new extended collection named MOJI-JOHO-KIBAN IDEOGRAPHS based on document [N4625](#), introductory text for collection from Japanese expert and an appropriate modification by the editor to Note 3 under section 4.25 to permit non-named sequences in extended collections.

Recommendation M63.12 (Progression of PDAM2):

Mr. Toshiya Suzuki abstained

WG2 recommends that its project editor prepares and forwards the final text of Amendment 2 to the 4th edition of the standard, which will include the changes arising from recommendations **M63.03** to **M63.11** above, along with the final disposition of comments (document [N4649](#)) to the SC2 secretariat for processing as a PDAM 2.1 ballot. The final code charts will be in document [N4637](#). The target starting dates are modified to: PDAM 2.1 2014-10 DAM: 2015-05, FDAM: 2015-11.

WG2 notes that a possibly revised Adlam script and characters to satisfy 'tones on human being emoji', are some additional candidates for inclusion in the text of Amendment 2.

Recommendation M63.13 (Tones for human being emoji):

Unanimous

WG2 requests SC2 to communicate to Unicode Consortium that SC2 would like UTC to have a public review issue on the encoding to satisfy 'tones on human being emoji' to enable national bodies to get public feedback from their countries or regions. SC2 is requested also to alert national bodies to keep a lookout for the announcement of such a public review issue on the Unicode web site.

Recommendation M63.14 (Project subdivision for future 5th edition of the standard):

Unanimous

Recognizing the need to amalgamate the content of 4th edition with Amendments 1 and 2, and to enable further additions to the standard that have been proposed once they are mature, WG2 recommends to its convener and project editor to generate a new project subdivision proposal for the next (5th) edition of the standard, along with a suitable schedule, and submit it to SC2 for approval.

Recommendation M63.15 (Khitan Large script):

Unanimous

WG2 invites the authors of document [N4631](#) to revise their proposal on the Khitan Large script taking into account the feedback summarized in the ad hoc report document [N4642](#), working with other experts interested in this script.

Recommendation M63.16 (Shuishu script):

Unanimous

WG2 invites the authors of document [N4638](#) to revise their proposal on the Shuishu script taking into account the feedback received at this meeting, working with other experts interested in this script.

Recommendation M63.17 (Naxi Dongba script):

Unanimous

WG2 invites the authors of document [N4633](#) to revise their proposal on the Naxi Dongba script taking into account the feedback received at this meeting, working with other experts interested in this script.

Recommendation M63.18 (Roadmap snapshot):

Unanimous

WG2 requests its convener to post the updated snapshot of the roadmaps (in document [N4617](#)) to the WG2 web site and communicate the same to SC2 secretariat.

WG2 also requests SC2 to create on SC2 LiveLink site, a standing document named 'Roadmaps', an appropriately edited version of the current '[Roadmaps](#)' page on WG2 website, with a single URL pointing to www.unicode.org/roadmaps, towards eliminating the need to create a snapshot prior to each WG2 meeting.

Recommendation M63.19 (Future meetings):

Unanimous

WG2 endorses the following schedule for future meetings:

WG2 Meeting 64 - 2015-10-19/23, Matsue, Japan (location is tentative) (co-located with SC2)

WG2 Meeting 65 - 2016-10 (tentative), Russia (tentative), USA (backup) (co-located with SC2)

WG2 Meeting 66 - 2017-10 (tentative), China (pending confirmation) (co-located with SC2)

IRG Meeting 44 - 2015-06-15/19, Seoul, Korea (Republic of)

IRG Meeting 45 - 2015-10-26/30 (2015-11-16/20 as backup), HK Polytechnic Univ., Hong Kong SAR

Recommendation M63.20 (Appreciation to DKUUG for web site support):

By Acclamation

WG2 thanks DKUUG and its staff for its continued support of the web site for WG2 document distribution and the e-mail server.

Recommendation M63.21 (Appreciation to Host):

By Acclamation

WG2 thanks the Sri Lankan Standards Institution (SLSI) and Information and Communication Technology Agency (ICTA) of Sri Lanka, in particular, Dr. Senaweera, Mr. Reshan Dewapura, Ms. Aruni Goonetilleke, Ms. Chamali Perera, Ms. Rita Kern, Mr. Athula Pushpakumara, Mr. Malth Galketiya and Mr. Dinesh Fernando, for hosting the meeting, providing excellent meeting facilities, and for their kind hospitality and dinner.

Recommendation M63.22 (Appreciation to the Convener):

By Acclamation

WG2 expresses its profound gratitude for the expert guidance and leadership provided to WG2 over the past 25+ years in the progression and development of ISO/IEC 10646 by our convener Mr. Mike Ksar, and wishes him all the best in his future endeavours.

*Character count **120585** in 4th edition
101 additions in DAM1 to the 4th edition
11630 in PDAM2.1 (end of meeting 63)
Character count **132316** (total allocated till end of meeting 63)*

Attendance List

JTC1/SC2/WG2 Meeting 63, Colombo, Sri Lanka; 2014-09-29/10-03

The following **44** experts accredited by **8** national bodies and **4** liaison organizations were present at different times during the meeting.

Name	Accreditation	Affiliation
Mike KSAR	Convener, USA	Independent

Title: CJK ideograph glyphs representation and sources references

Source: Michel Suignard, ISO/IEC 10646 Project Editor

Distribution: UTC, WG2

Summary: This document proposes to clarify the identification of CJK Ideographs, both in term of glyphs representation and sources references. If adopted, it would allow the Unicode Standard and ISO/IEC 10646 to use updated glyphs and source references when industry practice and National Standards update their own information. The document addresses issues with CJK Ideographs with Japanese sources (J source), but its recommendation can be applied to other constituencies.

The document is an update of the document WG2 N4544R. The previous document only covered the glyph representation aspect.

Acknowledgement: This work would not have been possible without the information provided by Dr. Ken Lunde from Adobe. His publications, including recent blogs posting mentioned in references, were extremely valuable in creating this document.

1. Current status and issue statement

According to the text included in the clause 1 of ISO/IEC 10646 (4th edition), this International Standard ‘defines a set of graphic characters used in scripts and written form of languages on a world-wide scale’.

This definition has been interpreted for most of the blocks shown in the code charts as making sure that the graphic symbols displayed in these charts represent the modern graphic representation of these characters. This obviously does not apply to historic repertoires.

There is however an exception for the CJK Unified Ideographs where it has been accepted practice to allow showing the graphic symbols as they were when the characters were originally encoded. There is a note in sub-clause 23.1 List of source references that hints at the principle:

NOTE 2 – Even if there is a new version of the source publication, the existing source reference information in the data files will not be updated. The updated source may only identify characters not previously covered by the older version.

The note refers only to the ‘source reference’, not the graphic representation. But the effect is the same, for CJK Ideographs, sources references always contain a graphic representation and by maintaining the historic source reference, the historic glyph representation is also preserved.

Interestingly enough, although the note creates a ‘principle’, it is only informative. It is also largely ignored by many constituencies which have updated their source references either by defining new ‘sources’ or by updating the existing sources. Therefore, these updates have resulted in graphic symbols updates and source updates for characters referenced by these sources which have been reflected in recent ISO/IEC 10646 code charts.

Other constituencies have adhered to the ‘Note 2 principle’ by preserving the historic nature of the standard at the price of a complicated status. A good example concerns the Japanese source references.

In ISO/IEC 10646 and Unicode the Kanji J sources are specified as follows:

J0	JIS X 0208-1990
J1	JIS X 0212-1990
J3	JIS X 0213:2000 level-3
J3A	JIS X 0213:2004 level-3
J4	JIS X 0213:2000 level-4
JA	Unified Japanese IT Vendors Contemporary Ideographs, 1993
JH	Hanyo-Denshi Program (汎用電子情報交換環境整備プログラム), 2002-2009
JK	Japanese KOKUJI Collection
JARIB	Association of Radio Industries and Businesses (ARIB) ARIB STD-B24 Version 5.1, March 14 2007

Glyphs are shown in the charts as originally specified by these sources.

However JIS X 0213:2004 has changed deeply the status of character encoding in Japan. It updated a total of 205 glyphs from previous standard and created 2828 new source references for characters encoded in previous standards, summarized as follows:

- 167 characters from J0 had their glyph changed (no source change)
- 31 character from J1 had their glyph changed and new sources created
- 7 characters from JA had their glyph changed and new sources created
- 2743 characters from J1 had new sources created (along for some a glyph change, covered above)
- 85 characters from JA had new sources created (along for some a glyph change, covered above)

Finally, the source designation J3A is a bit misleading because it actually refers to 8 level-3 characters that were added between JIS X 0213:2000 and JIS X 0213:2004 (there in fact a total of 10, but the 2 remaining were already specified in previous standards). The level-3 character set in the 2004 version is a superset of the 2000 version.

Needless to say, the current status has created some confusion.

- Many modern use Kanji characters, including 167 out of the 6536 J0 basic set, have outdated representation in the standard.

Example for U+9022, ISO/IEC 10646 J column: 逢 Modern Japanese representation: 逢

- The Japanese source reference data, because of the parallel glyph change, is obsolete in two fronts (source data and glyph). Furthermore, the complexity of the changes introduced by JIS X 0213:2004 which are only partially included in ISO/IEC 10646 makes the situation even worse.

The problem with the historic representation principle is that it prevents the standard to be used as a modern up-to-date reference for these characters. Any time that the formal content of ISO/IEC 10646 is used to represent these characters it shows an obsolete graphic representation which is not anymore in use in modern computing platforms. Furthermore, some source references are partially obsoleted by being superseded in a more recent version JIS X 0213:2004.

For example, ICANN (Internet Corporation for Assigned Names and Numbers) has launched a project to create Label Generation Rules for the Internet Domain Root Zone. The project involves creating PDF documents describing allowed characters for root domain labels. These documents reference Unicode and ISO/IEC 10646

repertoire containing many of these characters with the Japanese source references. As of now, they do not represent their modern version. This is clearly less than optimal.

2. Proposed solution

The text of the standard should be modified to favor modern representation of the characters while allowing a clear description of the history that led to their encoding. While previous versions of the ISO/IEC 10646 standard would be the natural way to retrieve that history, the ISO process makes them unavailable. Therefore another alternative has to be designed. The solution requires two part:

- 1) A modification of the Principles and Procedures to create a process to update graphic symbols when these are updated by new source references. In addition, when a new standard also clarifies and simplifies the source reference context it should be possible to use it.
- 2) Implement text changes in the standard for cases where there is already a need to implement that process.

2.1 Change in Principles and Procedures

That document should clearly mention that encoded CJK ideographs should be graphically represented following their latest version as published in national standards. Stability of source references should be explained in more details in the document, allowing them to be updated when it would result in a simplification of their description without technical change in the encoded characters.

2.2 Change in the standard itself

The Note 2 in sub-clause 23.1 (mentioned above) was already removed in Amendment 1 of the 4th edition of ISO/IEC 10646.

In addition, the description of the Kanji J sources can be updated in the same sub-clause by using JIS X 0213:2004 when it supersedes previous versions as follows:

J0	JIS X 0208-1990
J1	JIS X 0212-1990
J3	JIS X 0213:2004 level-3
J3A	JIS X 0213:2004 level-3 addendum from JIS X 0213:2000 level-3
J4	JIS X 0213:2004 level-4
JA	Unified Japanese IT Vendors Contemporary Ideographs, 1993
JH	Hanyo-Denshi Program (汎用電子情報交換環境整備プログラム), 2002-2009
JK	Japanese KOKUJI Collection
JARIB	Association of Radio Industries and Businesses (ARIB) ARIB STD-B24 Version 5.1, March 14 2007

(all sources are preserved with a clarification for J3A and a date change for J3 and J4)

Two new notes can then be added to describe the status of the various Kanji J sources.

NOTE 3 – When a more recent source such as JIS X 0213:2004 includes encoded characters already included in older sources, the former source references are used to reflect contemporary usage. This also reflects the fact that some of these more recent reference were accompanied by minor adjustment of the graphic representation of the related characters.

NOTE 4 – J Sources that have been partially superseded can be found as provisional sources in the Unihan Data base in <http://www.unicode.org/reports/tr38/> fully described as kJis1 for JIS X 0212-1990 and kJA for the JA source. The superseded graphic representations can also be found in version 7.0 and prior of the Unicode Standard (see Annex M)

In sub-clause 23.2 Source references file for CJK Ideographs, the linked file CJKSrc.txt should be updated with the updated 2828 source references. The updated values for these references is provided in a file as an attachment to this pdf file.

Finally, the code charts for the J column of these characters should have the updated graphic characters corresponding to JIS X 213:2004. Adobe has offered to provide the font ‘Heisei Mincho StdN-W3’ for the 205 glyph updates. The font was designed to precisely reflect the glyphs recommended by JIS X 0213:2004. To avoid further regression risk, the font would be only used for these 205 code points. It is possible to extend the range further if so desired.

Open to debate is whether it is necessary to identify the 205 characters with J sources which have updated graphic representations. If adopted, the collection 289 should be introduced in clause A.1 and described in a new CJK collection sub-clause (A.4.4). The content is shown below:

(167 characters came from JIS X 0208:1990, 7 characters followed by 'A' are originated from the JA source, 31 characters followed by '1' came from JIS X 0212:1990.)

2.2 Change in the Unicode Standard

The update in Unicode should parallel the changes made in ISO/IEC 10646 in term of source references and charts. And because Unicode does not remove access to former versions, when a new one is created it is easier to document past practice.

To that effect, to make the text in the Note 4 in sub-clause 23.1 from ISO/IEC 10646 accurate, the Unihan database should have a new provisional kJA field created to include all JA sources used in the standard (660 entries).

Title: CJK chart and source references update
Source: Michel Suignard, ISO/IEC 10646 Project Editor
Distribution: UTC, WG2

Summary: This document describes current issues in CJK encoding and representations and proposes changes to remedy these issues.

1. Extension C code point U+2B08F

In ISO/IEC 10646 (4th edition), that code point is displayed in the chart as follows:

2B08F	𪗇	𪗈
竹 118.9		
	TD-6162	UCI-00940

Proposed change: Remove UCI reference and modify glyph for TD-6162 to look like the one for the UCI reference. The new entry is visible below (in the ‘details’ section).

Details:

In the original introduction (Amendment 5 to ISO/IEC 10646:2003) it was shown only with the T-source and the glyph corresponding to the UCI source. This was still the case in ISO/IEC 10646:2011 (2nd edition).

2B08F	𪗈
竹 118.9	
	TD-6162

Following IRG#36, it was determined that the original unique source (TD-6162) did not look like the glyph shown in the chart. Therefore, because the source was the only one defining the code point entry, a UCI was created to denote a code point without identified source reference. For production issues, the original and new sources persisted in the 3rd and 4th edition of ISO/IEC 10646.

For what was seen as a production error, two documents (IRG N2021 and IRG N2037) requested the removal of the extraneous T-source. However since then, Taiwan has determined that the glyph for TD-6162 actually looks like the one originally shown in Amendment 5 and has provided a glyph for it.

It does not seem that the glyph shown for TD-6162 in the 3rd and 4th edition is yet encoded.

2. Extension C code point U+2AD12

In ISO/IEC 10646 (4th edition), that code point is displayed in the chart as follows:

2AD12
木 75.15
𣎵
UCI-00938

Proposed change: Replace UCI reference by T-source TE-353F and modify glyph it to look like the one introduced in the original amendment (5):

2AD12
木 75.15
𣎵
TE-353F

Details:

In the original introduction (Amendment 5 to ISO/IEC 10646:2003) it was shown as follows:

2AD12
𣎵
TE-353F

(Note the amendment specific format)

But in the following 2nd edition, it was shown as follows:

2AD12
木 75.15
𣎵
TE-353F

Following IRG#36, it was determined that the original unique source (TE-353F) was supposedly looking like the one in the 2nd edition chart and not like in amendment 5. Furthermore, it had the incorrect radical; it should be the tree (木) and the glyph shown is already encoded at U+22E16. Therefore, because the source was the only one defining the code point entry, a UCI was created to denote a code point without identified source reference. Following this, the 3rd and 4th edition showed that entry as follows:

2AD12
木 75.15
𣎵
UCI-00938

This is obviously incorrect because while having a new UCI number is expected, the glyph should have been reversed to the glyph shown in Amendment 5. This is noted in document IRG N2027.

However, Taiwan has now determined that the glyph for TE-353F actually looks like the one originally shown in Amendment 5 and has provided a glyph for it.

3. Main Block (URO) code point U+7921

In ISO/IEC 10646 (4th edition), that code point is displayed in the chart as follows:

7921
石 112.14
礮 礮 礮
GE-3559 HB2-F2A1 T2-662B

Proposed change: Replace glyphs for H-source and T-source to look similar to the G-source:

7921
石 112.14
礮 礮 礮
GE-3559 HB2-F2A1 T2-662B

(Layout is an approximation)

Details:

This is originally a T-source error for U+7921. The glyph should have the same component structure as the G-Source glyph, 石尊, though the top portion of the right-side should be the split (four-stroke) form of Radical #140. CNS 11643-1992 is correct, but CNS 11643-2007 introduced this glyph error, which then propagated into the Code Charts.

The problem is already present in ISO/IEC 10646:2003 (first edition)

121/033	礪	礪
7921	E-3559	2-662B
	E-2157	2-7011

It was then also propagated to the H source when it was introduced in ISO/IEC 10646:2012 3rd edition. Note that the H source is part of Big-5, not HKSCS.

4. CJK Compatibility code point U+2F949

In ISO/IEC 10646 (4th edition), that code point is displayed in the chart as follows:

2F949	眇
目 109.7	
	T6-4B7A

Proposed change: Replace T-source by a new UCI source:

2F949	眇
目 109.7	
	UCI-01199

(According to <http://www.unicode.org/Public/7.0.0/ucd/USourceData.txt> the next available value is 01199)

Details:

Two characters U+4039 and U+2F949 have currently the same T-source value: T6-4B7A. This is the result of a complex dis-unification of U+4039 with a new character encoded at U+9FC3 and affecting two compatibility characters (U+FAD4 and U+2F89F). See WG2 N3196 for the details.

However while U+FAD4 correctly lost its T-source value (replaced by UCI-00947), the same thing did not happen for U+2F949. This is an error and should be fixed by using as reference the next UCI value available which is currently UCI-01199.

5. Main Block (URO) code point U+9FCF

In the proposed 2nd amendment to ISO/IEC 10646 (4th edition), that code point is displayed in the chart as follows:

9FCF	鍍
金 167.7	
	GFC-005900

Proposed change: Replace the radical value/stroke count from 167.7 to 167'.7.

Details:

The radical of U+9FCF should be 167' (𠄎, simplified gold), not 167 (金, traditional gold), like that of U+9FD4.

6. Extension A code point U+4CA4, and new code point (U+9FD0)

In ISO/IEC 10646 (4th edition), that code point is displayed in the chart as follows:

4CA4	𩺰	𩺰
魚 195.10	GS-224D	H-9D73

Proposed change: Remove the H-source reference (both glyph and value) and replace by a new character as follows:

9FD0	𩺰
魚 195.10	H-9D73

(Proposed in amendment 2 to the 4th edition)

Details:

The H-source character uses a traditional radical and therefore should not be unified with the G-source character. This problem has existed since the H-source was added to U+4CA4 (ISO/IEC 10646 2nd edition).

7. Extension A code point U+3D1D

In ISO/IEC 10646 (4th edition), that code point is displayed in the chart as follows:

3D1D	𠄎	𠄎	𠄎
水 85.9	GKX-0639.09	T3-422B	H-91B5

Proposed change: Move the H-source reference (both glyph and value) to U+2A3ED which currently shows as:

2A3ED	𠄎	𠄎
黍 202.2	UCS2003	T4-4876

(See alternative change in details)

Details:

The radical shape show for H-91B5 (lower half of the character) is an acceptable variant of the water radical (水). However the character was unfortunately dis-unified into U+2A3ED which provides a better mapping for the H-source character. The code point U+2A3ED also uses a different radical (黍). An alternative is to leave the sources as they are, add the alternate radical/stroke at both code points, and possible an entry in Annex P to explain the context.

Title: CJK ideograph glyph representation update**Source: Michel Suignard, ISO/IEC 10646 Project Editor****Distribution: UTC, WG2, IRG**

Summary: This document describes glyph updates that result from applying WG2 N 4621 (CJK chart and source references update) and WG2 N4620 (CJK Ideograph glyphs representation and source references).

There are two categories of glyph updates:

1. Updated glyphs resulting from using JIS 0213:2004 representative glyphs (document WG2 N4620)
2. Updated glyphs resulting from various errata (document WG2 N4621)

The first category affects 205 glyphs which code points are listed below. The result is a glyph change for the J source, note that the J-source value is also changed.

U+382F	U+5ADA	U+6753	U+7078	U+795F	U+845C

U+9041	U+9375	U+9771	U+9957	U+9CE6	

The second category affect the following code points in the following manner:

- U+3D1D: H source and glyph removed (moved to U+2A3ED)
- U+4CA4: H source and glyph removed (moved to U+9FD0)
- U+7921: H and T source representative glyphs updated, no source value change
- U+9FD0: H source and glyph added (moved from U+4CA4)
- U+2A3ED: H source and glyph added (moved from U+3D1D)
- U+2AD12: U source (UCI) and glyph replaced by new T source and glyph
- U+2B08F: T source glyph updated, U source (UCI) and glyph removed
- U+2F949: T source replaced by new U source (UCI), no glyph change

Note that U+9FD0 is a newly proposed character to encode the newly dis-unified H source character formerly encoded at U+4CA4.

The following pages describes the code chart changes resulting from these updates. Former glyph and source values can be found either in the documents WG2 N4620 and N4621 or in the currently published version of the relevant standard (ISO/IEC 10646 4th edition or Unicode 7.0).

ISO/IEC 10646:2014 charts available in <http://standards.iso.org/ittf/PubliclyAvailableStandards/index.html>
