

ISO/IEC JTC1/SC2/WG2/IRG Ideographic Rapporteur Group (IRG)

Title: Request to drop 50 characters of the SAT proposal in CJK F1

Source: SAT

Status: Expert Contribution

Action: For Discussion in IRG#43

As we asked in the IRGeditors mailing list on 8/8/2014, we would like to drop 50 characters from CJK F1 in ISO/IEC 10646:2014/PDAM 2.2. See 50 characters in the end of this document. Since one character (Z_SAT03090, CJKF=03908) in the list is unified with G character (G_Z4851402), it would have only G source. Other all characters have SAT single source.

We deeply apologize for our late treatment of the characters and introduction of confusion into the process of proposing the F1 set to the WG2. The main reason of the late request is that a new specialist whom we've recently accepted adopts more strict rules according to general sense of CJK characters in order to define glyph shapes based on each evidence than our previous rule that gives high priority to the shapes themselves in the evidences. Although the proposed characters would be appropriate, it seems to be better to have time to discuss each character with his suggestion for the International Standard. As the result of his review and our discussion, the 50 characters were found to be discussed further.

Regarding the CJK F2, we've already listed such kind of characters in order to report during IRG#43. After that, our list must be fixed.

The list of the characters which we asked to drop:

CJK_F v1.0 Seq. No.	SAT source reference
02982	Z_SAT00055
04187	Z_SAT00268
00480	Z_SAT00307
