

IRG N2207 version 1

Title: Proposal to Re-assign T6-2C51 to U+2DC09 (Extension F)

Author: Henry Chan

Type: Individual Contribution to IRG #48 and UTC

Date: 2017/06/07

T6-2C51 is currently assigned to (U+2F8FD):

2F8FD
水 85.5
泮
T6-2C51

And its compatibility mapping is to 泮 U+6CCD.

6CCD
水 85.5
泮 泮 泮 泮 泮 泮
G3-535C HB2-CD49 T2-2769 J1-4678 K2-3F72 V0-3B26

However, the pronunciation given for T6-2C51 is jǐ while the pronunciation given for U+6CCD is bēn / bèn on the CNS11643 website.

Actually, T6-2C51 is a variant of 泮 U+6CF2 and the right hand side (本 U+2097D) is a well-known variant of 𣎵 (U+20094), not 本.

In Extension F, the following character is encoded:

2DC09
水 85.5
𣎵
JMJ-015203

Action Items

- 1) T6-2C51 be removed from U+2F8FD and reassigned to U+2DC09.
- 2) A UCI-glyph be assigned to U+2F8FD
- 3) A kSemanticVariant Mapping be added to Unihan reflecting the relationship between
洑 U+6CF2 and 洑 U+2DC09
- 4) A kSemanticVariant Mapping be added to Unihan reflecting the relationship between
本 (U+2097D) 本 (U+20094)
