This document consolidates stroke count (SC) entries in IRGN954AR, IRGN1105 and IRGN2171 with revisions.

The stroke counts in this document will be used in future IRG Working Set although they might be considered different in existing UCS code charts. For example, the component 成 will be counted 7 strokes although it was counted 6 strokes for 成(U+6210), 城(U+57CE), 誠(U+8AA0) and was counted 7 strokes for 城(U+6660), 城(U+73F9), 寢(U+7A9A) in UCS Ed.5.
