1. Preface

TCA proposes 871 new ideographs as candidates for the CJK Unified Ideographs Extension IRG Working Set 2017 Project.

There are 13 chemical characters and 858 ideographs are come from the MOE's *Dictionary of Chinese Character Variants* (教育部《異體字字典》), please refer to <http://dict.variants.moe.edu.tw/main.htm>. The MOE's *Dictionary of Chinese Character Variants* is the biggest official online dictionary for Chinese characters provided by our government, and commonly used by Taiwan people. It collected more than 100,000 Chinese characters from 63 dictionaries.

This document includes submission forms, list of proposed ideographs with source information and evidences in excel files.

Appendix4:

IRGN2231R_TCA_CJK_2017_CJK Supplementary Components for IDS Use

The new ideographs that TCA proposed for IRG WS2017 submissions are mostly variants, and they are used as name or publishing.

Some characters have a longer number of IDS lines. The reasons are: 1. The number of strokes is large. 2. The current IDS DATA does not include related parts. 3. The parts are special and uncommon. It is not necessary to add single case variations to the IDS. If necessary, TCA will add more.

Based on the IRGN2225, TCA propose supplementary components as list below :
