Title: UK Submission for IRG Working Set 2017
Source: UK
Status: National Body Contribution
Action: For consideration by JTC1/SC2/WG2/IRG
Date: 2017-09-15

This UK submission consists of 1,000 ideographs to be considered for inclusion in IRG Working Set 2017. These ideographs derive from a wide variety of sources (see Table 2 below), and have been suggested to us for encoding by various academics and experts from the UK, USA, China, Japan, and Russia. In summary the submission consists of 243 ideographs for Old Hanzi transcription, 413 dialect use ideographs, 170 place name ideographs, and 174 other ideographs, as summarized in Table 1. The proposed ideographs comprise:

- 765 traditional form ideographs, of which one corresponds to an existing encoded simplified ideograph, one corresponds to a simplified ideograph in WS 2015, and 9 correspond to simplified ideographs in WS 2017;
- 235 simplified ideographs, of which 185 correspond to existing encoded traditional form ideographs, 2 correspond to traditional form ideographs included in IRG WS 2015, 7 correspond to traditional form ideographs in the WS 2017, and 35 do not map to any traditional form ideograph.

Mappings to corresponding traditional or simplified ideographs are given in Column (l) of the attributes file.

118 of the submitted ideographs correspond to unencoded ideographs in the Chinese standard SJ/T 11239-2001 (Chinese ideograms coded character set for information interchange — The 8th supplementary set). The mappings to SJ/T 11239-2001 are provided in Column (m) of the attributes file.

Sources

This submission uses 206 sources as primary evidence for the usage of the submitted ideographs. Bibliographic details for these 206 sources are given in the table below. The column headed “Ref. No.” is the reference number for the source, and is listed in column ‘i’ of the attributes file. The column headed “Count” gives the number of submitted ideographs primarily based on the given source. The “Count” column adds up to 1,000.
