Status:	Member Submission

HKSAR's Request for Horizontal Extension and Update of Glyphs

Background

1. Since 1999, the Hong Kong Supplementary Character Set (HKSCS) has been established to facilitate electronic communication and data exchange conducted in Chinese between the public and the HKSAR Government and within the community.

2. The Hong Kong Supplementary Character Set-2008 (HKSCS-2008) published in December 2009 has 4 579 ideographs and 430 symbols. For the publication of the ISO/IEC 10646:2011, the HKSCS-2008 was consulted as one of the source references (H-source) for ideographs, and the glyphs of these 4 579 ideographs were included in the H-column.

Publication of HKSCS-2016

3. The HKSAR Government published the HKSCS-2016 in May 2017. This latest version of the HKSCS consists of 5 033 characters, of which 23 Chinese characters and one symbol are newly added. All the glyphs of the Chinese characters have been aligned with those in the Reference Glyphs for Chinese Computer Systems in Hong Kong newly published by the HKSAR Government.

Request to Include by Horizontal Extension New HKSCS Characters

4. The 23 Chinese characters newly added to the HKSCS-2016 are already

included in the ISO/IEC 10646 standard. The HKSAR requested the inclusion of these 23 ideographs by horizontal extension in the H-column of the ISO/IEC 10646 standard. The information required for the addition is provided in Table 1 (S/N 1-23) of this document.

Re-mapping of the Character "𱹏" (H-8FA8)

5. It is also requested that the HKSCS character "𱹏"(H-8FA8) be mapped with the CJK Unified Ideographs Extension B code point 270F0, instead of the CJK Compatibility Ideographs Supplement code point 2F9B2, where only H-8FA8 is assigned to. The information required for this relocation is also included in Table 1 (S/N 24).

Request to Update HKSCS Glyphs

6. In line with the Reference Glyphs for Chinese Computer Systems in Hong Kong lately published by the HKSAR Government, the style of many glyphs of the HKSCS-2016 is aligned. As such, we request that the HKSCS glyphs be updated in the light of the HKSCS-2016. The comparison of all the 4 579 HKSCS-2008 glyphs with those in the HKSCS-2016 is shown in Table 2. For ease of reference, changes are illustrated in Annexes I to VII.

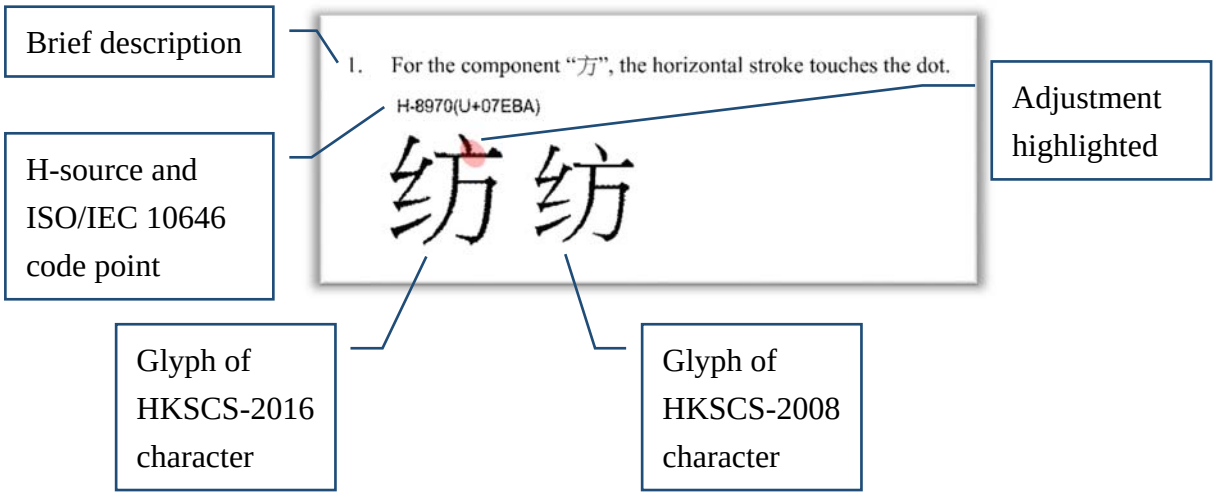
Highlights of changes in HKSCS Glyphs

1. Glyphs of characters of the Hong Kong Supplementary Character Set – 2008 (HKSCS-2008) are shown in the H-column of the ISO/IEC 10646:2014 document. In the updated version, Hong Kong Supplementary Character Set – 2016 (HKSCS-2016) released in May 2017, changes in glyphs have been made in accordance with the Reference Glyphs for Chinese Computer Systems in Hong Kong for the sake of consistency. For ease of reference, these changes are detailed in Annex I to VII as follows:

Annex I:	List of characters with minor adjustments in terms of contact of strokes/components
Annex II:	List of characters with minor adjustments to separate strokes/components
Annex III:	List of characters with minor adjustments in hook, overshooting of strokes and scale of strokes/components
Annex IV:	List of characters with minor adjustments in the turning of strokes
Annex V:	List of characters with minor adjustments in the right falling strokes
Annex VI:	List of characters with a change in component/structure
Annex VII:	List of characters with miscellaneous alignments

2. An illustration is provided below:



Annex I: List of characters with minor adjustments in terms of contact of strokes/components

1. For the component “方”, the horizontal stroke touches the dot.

H-8970(U+07EBA)

2. For the component “广”, the horizontal stroke touches the dot.

H-8CED(U+09FB2)

3. For the component “宀”, the bent stroke touches the dot.

H-9CDB(U+28009)

4. For the component “不”, the dot touches the vertical stroke.
